By Ken Michaels, Guest Writer In Shakespeare's work "Hamlet", Polonius asks the prince: "What do you read, my lord?" He is not at all satisfied with what he is reading, Hamlet responds, "Arme, parole, parole."1 I have previously described the communication model in which a sender encodes a message and then sends it through a channel (or medium) to a receiver, which decodes the message and, ideally, understands what was sent. Surely the most common way of coding a message is to choose the most appropriate words for the listener or reader. In the case of Hamlet, he didn't like what he read that he described it in an elementary way, as simple words, rather than a message. So I thought I'd give a little ink to the words themselves. The words "Nym" have specific meanings that end in nym describe classes of words. Some of the most used words are synonymous (equal media); antonym (meaning the opposite); the same sound; and acronym (a word derived from the first letters of a more complex term, such as SCUBA or AIDS). Homo means "same", hetero means "different". Therefore, if there are omonyms, it is right that there are also etheronimas. While the homones have the same sound but different orteggiatures (such as couple and pear), etherons are written the same but have different meanings and, often, pronunciation: a sewing person is a sewer, but a repository for waste products is a sewer. Sewer, then, is an etheronim. But the lexiconwords without any means ends here. One of the Sites I visited recently2 lists no less than 26 words, many of which are quite arcane and of interest to relatively few. Some are really funny. Do we really need a word to say another word of two identical parts? If so, then tutu, pawpaw, yo-yo, and bye-bye are tautonyms. A couple of weeks ago, my son asked me what a metonym means. I didn't know, so we looked up. In retrospective, I should have been able to logic out, as "meta" means change. A metonym is a word that designates something from a word that is associated with it. For example, Hollywood is a metonym used to indicate the US film industry, while the Crown refers to royalty, and the bottle refers to alcohol. My use of the expression "a little ink" a couple of paragraphs back is also a metonym for written communication, even when it is not involved in real ink or writing on paper. The point of all this has to do precisely in the use of our language. It won't do me well to code a message using a word like metonym, or etheronimo, or tautonym, unless I'm sure that my listeners (or readers) know its meaning. Or this, or I am ready to add the definition for their benefit, in such case I may have just used the definition first. However, learning the correct use of words, however arcane, can be useful, and if you like the words themselves, even fun. What's your Godfather? In his book "Ilof facts: Because everything we know has a deadline," Samuel Arbesman3 discusses changes in the language that occur over time, and the two fields that see this phenomenon differently. He explains the prescribed grammars like those who focus on how words should be used, and descriptive grammars like those who are more interested in the way they are actually used. Arbesman states that each individual develops its own set of rules on how to use words, and that all of us, you, me and all the others, have our own idiolet. This delightful term describes our unique language and our model of speech, as determined by what we learned when we were young, as well as by those around us, and includes our grammar, vocabulary, word pronunciation, and also our accent. There is an important lesson here. If we really want to communicate effectively, we must be aware that every time we encode a message, someone whose idiolet is significantly different from ours can most likely decode it in such a way as to get a completely different message. So you pay to be careful about our choice of words; is it really a message, or simply "words, words, words"? © 2013 Ken Michaels. All rights reserved. Now, once you have passed your initial disappointment that thesaurus is not a new fresh dinosaur, you thought it was enough nifty, dandy and super to have all the synonyms (and antons) you would ever need to collect in a book! And today, because the Internet is so impressive, you can also pull on an online thesaurus with some buttons, making it even easier to find the perfect word for each occasion. Your teacher probably punched it in your head that not all synonyms mean exactly the same thing. They're not interchangeable, in other words. You could describe a dancer as delicate and graceful .— perfectly acceptable descriptions. But if you use fragile, fragile or flimsy synonyms, you might end the unfortunate recipient of a fast kick from a pointed shoe! So, if you have a surf, a glut, a deluge or a plethora of synonyms in your arsenal of words, there is no doubt I associate this quiz and be able to brag at all your chums, friends, colleagues and companions! How much do you know about dinosaurs? What is an octane assessment? And how do you use a noun? Luckily, HowStuffWorks Play is here to help. Our award-winning site offers reliable and easy-to-understand explanationsThe world works. From fun quizzes that bring joy to your day, to photography and fascinating lists, HowStuffWorks Play offers something for everyone. Sometimes we explain how the stuff works, sometimes, we ask you, but we're always exploring in the name of fun!
