  "Input Language," pick the language you want to add*Under "Keyboard layout/IME" make your selectionClick OK in each dialog window. Open Control PanelDouble-click "Add"Pick the layout you want to add*Click OK in each dialog window. Open Control
 Panel (via Start menu or My Computer)Double-click "Keyboard" Click "Keyboard" Click "Keyboard" Click "Keyboard Click "Keyboard Click "Keyboard" Click "Keyboard Click "Keyboard Click "Keyboard" Click "Keyboard Click "Keyboa
Canadian Keyboard: French (Canadian) The best way to type accents on a PC is by using the international keyboard, which requires a simple control panel configuration - there is no keyboard to purchase or software to download. If you're really set against the international keyboard, you can type accented characters with ALT codes, which use the
ALT key and a 3 or 4 digit code. However, ALT codes only work with the numeric keypad, not the row of numbers across the top of your keyboard. So they won't work on a laptop unless you hit number lock to activate the number pad "built into" the right-side of your keyboard, which is a big hassle because then the letters won't work. Bottom line, if
you're on a laptop, choose a different keyboard rather than messing around with ALT codes. To type accents with ALT codes, hold down the ALT key, then on the numeric keyboard rather than messing around with ALT codes, hold down the ALT key, then on the numeric keyboard rather than messing around with ALT codes, hold down the ALT key, then on the numeric keyboard rather than messing around with ALT codes. To type accents with ALT codes, hold down the ALT key, then on the numeric keyboard rather than messing around with ALT codes.

 especially for PowerPoint, keep reading. To insert French letters with Accent in PowerPoint: Open your PowerPoint document. Place the insert tab on the Symbol dialog box. The Symbol dialog box will appear. From the "Subset" drop-down
 list, select Latin-1 Supplement. You should see all the French characters under this category of symbols. Select the particular French letter you want to insert and click on the Insert button. Otherwise, just double-click on the symbol you want to insert the Special French
 Letters in Microsoft PowerPoint using the Insert symbol dialog. Another easy way you can get the French Letters on any PC (whether Windows or Mac) is to use my favorite method: copy and paste. All you have to do is to copy the symbol from somewhere like a web page or the character map for windows users, and head over to where you need the
symbol (say in Word, Excel, or PowerPoint), then hit Ctrl+V to paste. Below are the French Letters for you to copy, switch over to your document, place your insertion pointer at the desired place, and press Ctrl+V to paste. Copy & Paste Special French
Letterséàèuâêîôûçëïü You can also use the Character Map to copy and paste any symbol or character Map to copy and paste any symbol or character Map app will appear in
the search results, click on it to open. The Character Map dialog will appear in the Character to copy the symbol, place the insertion pointer at the
desired location and press Ctrl + V to paste. This is how you may use the Character Map dialog to copy and paste any symbol on Windows PC. Among all these several options to type the Special French Characters, I think using the alt code method for Windows is the fastest option, provided you know the alt code for that particular symbol you want to
type. If you happen to use the Special French Characters often, you may consider making a cheat sheet for your reference. Using the keyboard shortcut to type French letters is also a handy method for Mac users. However, you can also use the mouse-based approach if you are inserting these symbols in any of the Office programs like Word, Excel, or
  PowerPoint. Here is the list of French alt codes, French accents marks on letters with accents marks on letters Symbol Descriptions. You can copy and paste French characters to copy. See that little appendage on the "c"? It's an accent
mark, and it makes a huge difference in French pronunciation. This obviously begs the question—how do we type these symbols?Let's take a look at all of the French accent marks, followed by creative ways totype French accent marks, followed by creative ways totype French accent marks on English keyboards.ContentsFrench Accent marks, followed by creative ways totype French accent marks on English keyboards.ContentsFrench Accent marks, followed by creative ways totype French accent marks on English keyboards.ContentsFrench accent marks, followed by creative ways totype French accent marks on English keyboards.ContentsFrench accent marks on English keyboards.ContentsFre
ê, î, ô, ûl'accent trémaë, ï, üla cédilleç1. L'accent Aigu — Acute Accent (´) The accent Aigu — Acute Accent (´) The accent aigu looks like this: ´, a little apostrophe-like mark that floats up into the sky (é). This can only be on the letter e. Think of eggs or a tasty French omelette to help you remember this rule. The aigu is placed on the end of a word to indicate that the letter e is
pronounced like ay, as in marché (market), or parlé (spoken) or the place you've probably already visited several times this week, café . When the aigu is used at the beginning of a word, it often indicates that an s used to follow that vowel, for example étudiant (student) or étudier (to study): Un étudient qui étudie à l'école. A student who studies at
the school. 2. L'accent Grave — Grave Accent (`) The accent grave here." The accent mark goes down, into the grave. The grave can be found on an a, e or u. However,
it only changes the pronunciation of the letter e. It makes the e sound like ehh.On the a and u, it helps distinguish between words that are spelled the same: 1. L'accent Circonflexe, or circumflex, is also called the hat or le petit chapeau (little hat). That's easy to remember, isn't it? This cute little hat goes on the a
e, i, o and u (â, ê, î, ô, û). There are two good things about this accent that you will want to take note of. The first is its effect on pronunciation is so slight you won't need to worry. In fact, there are some language reform groups who are in favor of getting rid of it. The second thing is that there really aren't that many words in French that wear the
circumflex. You'll probably run into the little hat if you travel and stay at a hôtel (pronounced more or less like owe-tel, and almost identical to the English "hotel" without the "h"). Sometimes the circumflex is used as a marker to reference the old spelling of a word. With the word forêt (forest), the accent indicates that an sonce followed the vowel
as it does in the identical English word "forest," but over time was dropped. Think of it like a kind of gravestone that pays tribute to the original Latin version of the word. Aside from these, the circumflex has a more important job when it is used to distinguish between words with different meanings. This is when you want to make sure that it is worn
correctly. For example: With Circumflex Without Circumflex dû (past participle of devoir) du (a contraction of de + le) dû (owed) du (of the, some) mûr (ripe) mur (wall) sûr (sure) sur (on, upon) And, just to keep you on your feet, there are a few French words that use the little hat simply to give the word more prestige. Among them are: 4. L'accent
Tréma — Trema ( ") You know those two little dots that you sometimes see hovering above an e, i or u? That's the tréma. It is used when two vowels are next to each other and both must be pronounced, as in naïve, a word English has borrowed from the French, without the tréma. Usually, the "is placed above the second of two consecutive vowels
Think of the English word "coincidence . 5. La Cédille — Cedilla ( ) Enfin! (At last!) We made it to the thumb, or the little tail as it's commonly nicknamed. This little guy, the cédille, is present in other languages like Portuguese and Catalan
but in French, it only goes under the letter c as so: ç. Facile, no? (It's easy, right?) The cédille is used to give the c an s sound instead of a hard k sound—for example leçon (lesson) or français (the French language), as in "Parlez-vous français?" (Do you speak French?) You will also hear this often in the daily greeting, ça va? (How are you?) And then
there's the infamous garçon (boy/waiter)! How to Type French Accent MarksNow that you know how to use the five French accent marks, how can you easily type them on a computer? Using a MacInternational KeyboardWith an international keyboard on
 Mac: Go to System Preferences. Choose "Keyboard," then "Input Sources." Click the + Sign, then choose "English" as the language to see a list of keyboards. Select "US International" and then "Add." To type French accent marks, simply type the accent as you normally would, followed by the letter you want it to appear over. For example, to type ô
 hold down shift while pressing the "6" key (which is how you would type the ^{\circ} symbol normally). Then type the letter "o." Voilà!If you are using the international keyboard and want the symbol. To sum up:French accent mark: Shift + 6 + o = ^{\circ}
Symbol and vowel separate: Shift + 6 + space bar + o = ^oIt's really intuitive, and takes no extra effort or time once you get used to how it works. Regular KeyboardYou can also stick with a regular keyboardYou can also stick with a regular keyboardYou can also stick with a regular keyboard and use pre-configured key combinations instead. Map" and then select the character you want. Alternatives to Typing with CodesIf all of this work to set up an international keyboard or memorize lots of codes seems too much for you, there are alternatives that might be easier. You can find point and click resources for inserting codes into your text: TypeIt lets you type accents from many different
languages, including French. You will see a field where you can type, above which are buttons that include all of the accents here and copy and paste them into your word processor, or you could even type your entire text directly into the site. Lexilogos does basically the same thing as TypeIt, but with more features included.
An advantage of Lexilogos is that it also includes a French dictionary and a spell checker. Your word processor will likely include the French character set—just choose your font and look for the French character you want to
 include. Now that you understand how essential it is to put the accents in their proper places, you'll have an easier time pronouncing and writing French. Knowing the rules means you're one step closer to fluency. Congratulations! If you like learning French at your own pace and from their proper places, you'll have an easier time pronouncing and writing French. Knowing the rules means you're one step closer to fluency. Congratulations! If you like learning French at your own pace and from their proper places, you'll have an easier time pronouncing and writing French.
comfort of your device, I have to tell you about FluentU. FluentU makes it easier (and way more fun) to learn French by making real content like movies and series accessible to learners. You can check out FluentU chrome extension. One of the features
 I find most helpful is the interactive captions—you can tap on any word to see its meaning, an image, pronunciation, and other examples from different contexts. It's a great way to pick up French vocab without having to pause and look things up separately. FluentU also helps reinforce what you've learned with personalized quizzes. You can swipe
through extra examples and complete engaging exercises that adapt to your progress. You'll get extra practice with the words you find more challenging and even be reminded you when it's time to review! You can use FluentU on your computer, tablet, or phone with our app for Apple or Android devices. Click here to take advantage of our current
sale! (Expires at the end of this month.) 124.3K Accent marks are a required aspect of writing in French, but many beginning French learners wonder if they really matter. They do! However, learning how to read and write French accent marks is only part of the battle. Since we live in the twenty-first century, it's important to know how to type
 French accents, too. But French accent marks don't appear on most US English keyboards. The good news is that typing French accents will help you whether you're working with a French tutor, taking a language class, learning French words for
a trip to Paris, or just working your way through the basics of French grammar. This guide covers typing French accent marks in Word and Google Docs. French accent marks help to determine French pronunciation and distinguish between word meanings
 Learning how to use and type French accents accurately can help you communicate and have conversations in French for class, work, or travel. These are the five French accent marks and how they're used and pronounced. AccentUsagePronunciationExamplesaiguéaydesolé, médicin AccentUsagePro

 include it! If you're wondering how to type an accent mark when you're writing a paper, essay, or article, Google Docs and Microsoft Word both have features that allow you to insert special Characters and type French accents that don't appear on the keys. In Google Docs, start by clicking "Insert," then "Special Characters." Two drop-down menus
and a grid of symbols will pop up. Select "Latin" from the first drop-down menu, and then select the accented letter you want to type from the grid. In Microsoft Word, you also begin by clicking "Insert." Next, click "Advanced Symbol." If the "(normal text)" font doesn't show up in the dropdown menu right away, navigate to the "Segoe UI Symbol"
font. A grid of symbols will pop up—select the accents on an Apple device with Option Key Accents codes and by using your keyboard. The modern Mac OS offers an exceptionally fast method of typing French accents, and it's easy to use: AccentCodeaigu (é)Press Option
e followed by the lettergrave (à, è, ù)Press Option + ` (the key to the left of the "1") followed by the lettercirconflexe (â, ê, î, ô, û)Press Option + c Whether you're composing an email, writing in a doc, or using an app, you can use simple Mac keyboard
 shortcuts to type French accents. Simply hold down a letter key on your keyboard until an accent menu appears. Once the menu is visible, you can use the arrow keys to move to the accent you want, or you can use the corresponding number key to choose an accent. A menu will only display if that letter has possible accents. Fortunately, Windows has
 shortcuts in Word and Outlook to type French accents on a PC. AccentCodeaigu (é)Press CTRL + ' (apostrophe), followed by the lettercirconflexe (â, ê, î, ô, û)Press CTRL + Shift + 6, followed by the lettertréma (ë, ï, ü)Press CTRL + Shift + : (colon), followed by the
 Code\'{e}Alt + 0233 \not EAlt + 0232 \not EAlt + 0201 \grave{a}Alt + 0224 \not AAlt + 0232 \not EAlt 
 and French accent options will appear (with other non-French accents, as well). If you want to type "e" with an accent, hold down the "e" key, and you'll instantly see these options pop up: è é ê ë e e e and a count, hold down the "e" key, and you'll instantly see these options pop up: è e and a count, hold down the "e" key, and you'll instantly see these options pop up: è e ê e e and a count for typing in French, you could get bogged down using
keyword shortcuts every time you need to type French accents. In this case, another option is to add an alternational keyboard. French keyboard is the most user-triendly to US-based users who are
used to a QWERTY-style layout. The French keyboard is AZERTY and has several keys in different places than a US English keyboard, which can make switching back and forth confusing. The Canadian French keyboard has all the unmodified letters in the same spots, but has some additional characters. When you use the International keyboard, be
careful when typing quotation marks and apostrophes before letters that accents aigu, cédilles, and trémas typically modify. If you don't put an extra space between the punctuation and the letter, it'll assume that you want the accent mark. For example, for c'est not to become cést, you would have to type it as "c' est" and then go back and remove
keyboards. On the French keyboard, several accent marks are available as keys. On the Canadian French, fewer are available as keys, but the codes are simpler. AccentFrench KeyboardCanadian French, fewer are available as keys, but the codes are simpler. AccentFrench KeyboardCanadian French, fewer are available as keys, but the codes are simpler.
