Bloons TD 6 > General Discussions > Topic Details BTD6 is not opening I click play and this box comes up called unity then closes then the game never opens. I have verified integrity of game files, I have uninstalled and reinstalled and nothing is working, can anyone help pls Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. The not opening problem faced by Bloons TD 6 players can be encountered for many reasons. This error, which is only encountered in the Windows operating system, can bring many errors. If you are encountering such an error, you can easily find a solution by following the suggestions below. In order to get rid of Bloons TD 6 not opening, we first need to find out why we encounter such an error. Then we can find the root of the error and find the solution. Why Bloons TD 6 Won't Open? The general reason for this error is seen as a problem that occurs with the game file being damaged or corrupted. Of course, we may not encounter this problem alone. Possible reasons for Bloons TD 6 not booting are: Framework may not be installed. Drivers may not be up to date. May be a security issue. Windows operating system may not be up to date. There may be a network connection problem. There may be errors or damage to Windows files. We have explained above the general reason for this error that users rarely encounter. Now, let's move on to the solution below and give information on how to fix the problem. We can solve the problem by following the suggestions below to fix this error. 1-) Check Game Frameworks The lack of game frameworks on your computer can create various errors in the game. Therefore, your computer must have DirectX, .NET Framework, VCRedist applications. After performing the update, you can restart your computer and run the game and check if the problem persists. 2-) Update Graphics Card Driver In such continuity problems, we may encounter an update error in the graphics card. For this we will need to update the graphics card. If you're ready, let's get started. For Users with Nvidia Graphics Card; First of all, Nvidia company's GeForce Experience We need to download and install the program. After the download and installation process, we open our program and open the Drivers menu above. Download our update by clicking the Download button that appears above. After our download is complete, let's perform the installation process by clicking the quick installation button. Restart your computer after this process is finished. For Users with AMD Graphics Card; Published by AMD company AMD Radeon Software We need to download and install the program. After completing the download and installation process, we open our program and click the Check for Updates button under the driver and software menu on the right, and check if our video card is up to date. You can restart your computer by performing the update. For Users with Intel Graphics Card; Users with an Intel processor can use the graphics card in the Intel processor, since they do not have a graphics card. This may require updating the intel graphics card. First, download the program Intel Driver After the download is complete, open the program. After the installation process is complete, click the "Launch" button and wait to be redirected to the page. After this process, Intel Driver & Support Assistant will scan your system. Once the scan is complete it will extract some drivers that you need to update. Perform the installation process by downloading the updated version of the drivers. After updating our graphics driver and restarting our computer, we can try to open Bloons TD 6 3-) Turn off Antivirus Program Disable any antivirus program you use, or delete it completely from your computer. If you are using Windows Defender, disable it. For this, Open the start search screen. Open the search screen by typing "Windows security settings". Click on "Virus and Threat Protection" on the screen that opens. Click on "Ransomware Protection" in the menu. Turn off "Controlled Folder Access" on the screen that opens. After this, let's turn off real-time protection. Type "virus and threat protection" into the start search screen and open it. Then click on "Manage settings". Turn Real-time protection to "Off". After performing this operation, we will need to add the Bloons TD 6 game files as an exception. Type "virus and threat protection" into the start search screen and open it. Virus and threat protection settings, select Manage settings, and then under Exclusions Exclude select add or remove. Select Add an exclusion, and then select the Bloons TD 6 game folder saved to your disk. 4-) Open Game from Local File Some players say they fixed the problem by running the game over the local file. You can reach the solution of the problem by performing this operation. Access the file directory of the Bloons TD 6 game. Run the game launcher program in the opened window. 5-) Fix Windows Errors The files in Windows are damaged or corrupted, which can lead to various errors. For this, we will share two code blocks with you and try to scan and repair damaged or corrupted files. Do an SFC Scan Damaged or corrupted files that occur in Windows files can cause many error codes. For this, we will tell you a few ways to solve the problem. Type "cmd" in the start search screen and run as administrator. Type "sfc /scannow" into the command prompt that opens and press enter. After this process, corrupted or damaged files will be scanned and corrections will be made. Do not shut down or restart your computer until the process is complete. After this process, let's perform another suggestion. Do a DISM Scan Type "cmd" in the start search screen and run as administrator. Type the following commands in the command prompt screen that opens and press enter. Dism /Online /Cleanup-Image /CheckHealth Dism /Online /Cleanup-Image /ScanHealth Dism /Online /Cleanup-Image /RestoreHealth After the process is completed successfully, you can restart your computer and check if the problem persists. Yes, friends, we have solved our problem under this title. If your problem persists, you can ask about the errors you encounter by entering our FORUM platform. Bloons TD 6 can be a lot of fun if you're playing with a lot of friends. But the game isn't perfect, as just like any other multiplayer game, it has its fair share of troubles. One such issue is the Bloons TD 6 stuck on reconnecting screen issue that many players have been reporting recently. Imagine you're on the last wave and out of nowhere, a reconnecting screen pops up that refuses to go anywhere. It's not hard to see why this issue is so annoying. So today we have decided to do something about it. We have compiled a list of possible fixes that can help you with this issue. Let's get to it. Well, there are not a lot of fixes for this issue out there and to add insult to injury, the game doesn't really let you disconnect if you leave the game. Well, sometimes it will and sometimes it won't. But, below we're gonna be talking about some methods that have worked for a few people in the past. 1) So, the first thing you want to do is make sure that your internet is working correctly. Just quickly restart your router and try to log in again. 2) If you're on an Android device, then clearing the cache of your game can go a long way to fixing all your problems. Just go into the app info, click on Storage and clear the cache. You should now be past the reconnecting screen. 3) If nothing else works, then you might have to reinstall your game. This is almost guaranteed to fix any problems that the game might be giving you. 4) And, for our last bit of advice, we have something from Reddit. Redditors believe that anytime you're stuck on the reconnecting screen, just put a tower down and you should immediately be able to reconnect. 5) If you've done all of this and still can't get through the reconnecting screen, then you're going to need to wait for the devs to do something about this annoying issue. We hope we were able to help. Bloons TD 6 > General Discussions > Topic Details Fix for Infinite Loading Screen long story short how to fix the game-breaking bug is to do the following! 1: make sure steam cloud is enabled 2 open file explorer go to Windows (C:) then program files (x86) then click on the steam folder then userdata then their should be your steam id, click on it and it should come up with all your games (they will be named their ids and BTD6 is 960090) 3: now go back into steam and exit steam via clicking on the steam button in the top right then press exit 4: open the recycling bin and drag a folder called with btd6s is (wich is 960090) into it, then empty the recycling bin 5: verify the integrity of the game since you kinda deleted 90% of it! NOTES: this will delete your save unless you linked the account via steam or another way of linking and made backups, i suggest making back-ups incase you get this glitch again. any issues just add me and we will talk about it. also the files location is the default settings so if you changed where they go you will have to find them! EDIT: credit to qsager5 for being my rab rat and deleting the folder 1st, as i had trouble finding the folders Last edited by Bad Aim Bodyslot Barry; 22 Dec, 2018 @ 11:58am Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. Bloons TD 6 is an exciting tower defense game that offers hours of fun and strategic gameplay. However, like any computer game, it can sometimes encounter issues such as crashing, black screens, or refusing to open. These problems might leave players feeling frustrated and unsure of what to do next. But fear not, as we have gathered a list of solutions that can help you get back into the game and back to popping those pesky Bloons! Solution 1: Restart the PC When you experience shutdown on Windows 11 or any bug in Bloons Tower Defence 6, it's recommended to start by restarting the computer before attempting any other fixes. This is because restarting the computer can resolve any temporary errors caused by outdated cookies and cache or conflicts with other software on your system by simply restarting Windows 11/10. Solution 2: Run the Program as an Administrator (Permanently) PC When running Bloons Tower Defence 6 on PC, there may be times when you need to give the program administrative privileges in order to access certain features or settings and in our case to get rid of black screen on startup. One way of doing it is by simply right-clicking on the program and selecting "Run as administrator", but it may not always be enough, as you may need to grant these privileges permanently in order to avoid constantly having to repeat the process. Here's how to run a program as an administrator permanently on Windows 11/10: Go to the folder/Application Right-click on it A menu will open Select Properties A new window will open Navigate to the "Compatibility Tab" Under the Settings heading Find "Run this Program as an administrator" Check the box for this option Click "Apply" Now your program successfully Runs as an Administrator on Windows 11/10 (Permanently) and you can easily open the program without repeating the steps. Solution 3: Update BTD6 For critical errors like black screen, publishers release updates for an optimized and smooth gaming experience. It's wise to check for any update released before troubleshooting other possible issues. Playing with outdated versions can also lead to technical glitches, compatibility issues, or even missing out on new content. Here's how to keep any game updated using its dedicated launcher: Open the Game Launcher and from its settings locate "Update" Options. Either enable automatic updates or do a manual update if there are any. Restart the Launcher and check if you are still facing black screen. Solution 4: Close Intensive/Unwanted Programs Or Settings Your game/PC can be set to maximum performance, try running the game on lower settings to consume fewer resources. This can include: A lower resolution (From 4k to 1080p or 1080p to 720p) A lower frame rate (try playing at 60Hz) If there are too many programs running in the background, using too much internet/RAM/Disk can cause Bloons TD 6 crashing on Windows 11. Closing unwanted programs will help you eliminate the not loading issue on your PC as your game would be able to get the required resources from Windows. Press Ctrl + Shift + ESC keys to open Task Manager Now check which program is using more Resources, usually indicated by a darker background Right-click on that program and select End task Now check if the not loading is solved or not. Solution 5: Try Enabling/Disabling VPN while playing Bloons Tower Defence 6 Still running into crashing error on Windows 11? If you've got a VPN on, try turning it off to see if it makes a difference. If it's off, switch it on and check again. But heads up! Don't jump between too many regions; you don't want to get blocked. Remember, the right VPN can be a game-changer. Solution 6: Add Game Exceptions on Antivirus PC Sometimes antivirus thinks game files are bad guys and stops them, causing the black screen on startup. To fix this, tell your antivirus that BTD6 files are cool by adding them to the "exceptions" list. This way, you can play without the antivirus messing things up! Follow the steps below to add an exception on Antivirus (This guide is for Avast, and would be similar for other antiviruses): Launch Avast on your PC. Select Menu at the top-right corner of Avast. Choose Settings from the menu. From the left sidebar, choose General > Exceptions Click ADD EXCEPTION and then type the URL you want to add to it. Click ADD EXCEPTION to save the URL and check if you can access the URL. If you are still facing Avast Blocking Websites, continue to the next solution. Solution 7: Check if Windows or Any Driver is Outdated Sometimes compatibility issues can be a reason for continuous Bloons TD 6 not opening on Windows 11/10/7. Often, it's all about the updates. First off, head to your Windows settings and see if there's an update waiting. While you're on this updating spree, dive into your device manager and update your Wi-Fi drivers and update graphics drivers making sure they are on the latest versions. These updates can make a big difference, fixing a lot of errors. Solution 8: Contact BTD6 Support Tried everything and that game error's still bugging you? As a last resort, head to the BTD6's official website and click 'Support' or 'Contact'. Send them an email, jump into live chat, or post in their official forums. Share what's happening and any error messages. Remember to double-check you're on the official site. Sometimes, reaching out is the best way to get back to gaming! Stay smart and game on! Final thoughts In conclusion, encountering technical issues while playing Bloons TD 6 can be quite frustrating. However, with the solutions we have provided, you should be able to troubleshoot and resolve any problems you may experience. Remember to restart your computer, run the game as an administrator, update the game, close unnecessary programs, disable VPN if needed, add game exceptions to your antivirus, check for outdated Windows or drivers, and reach out to the game's support if necessary. Now you can get back to enjoying the thrilling world of Bloons TD 6 without any pesky technical difficulties holding you back!
