Hello, I ran into a couple problems having android studio to install and work. thought I'd share my findings! First, it wouldn't install. Not finding Java.exe to something else before the installation. Don't forget to change it back to java.exe once
installed. After installing Android studio, it wouldn't run (normal or admin didn't change a thing). You will need to create a system environment variable named JDK HOME with your JDK installation path (in my case C:\Program Files\Java\jdk1.7.0 21\). Android studio should now launch. (more help here )Now that Android Studio launches, it asks for
the latest android SDKJust download and install the SDK 22 from Heremake sure you run the .exe as administrator after installation NB: For those having issues starting Android Studio in some Linux distros, such as Studio not finding JAVA HOME, STUDIO JDK, set any of those variables to the directory where Java is installed (e.g.
/usr/java/jdk1.7.0_21) previously to the whole validation statements in the startup shell file (studio.sh) and everything should be fine... Hope this saves some head scratching! (more help here ) worked perfectly for me. Thanks Does Android Studion requires JDK 7 or greater ?? coz i have JDK 1.6 on my Windows 7 it doesn't start up even
after setting JDK HOME or JAVA HOME. It should work fine on 1.6. Maybe it depends if you're 32bit or 64bit? My personal setup is Windows 8 64 bit running the 64bit version of Java 1.7. Also, for the SDK issues, if you already have the SDK installed from using Eclipse, you can just point Android Studio to that SDK under Project Settings or
something (I forget the exact wording of the setting and I'm not at my computer right now...) Thank you! I was having trouble getting Android Studio to start once installed. Setting JDK_HOME fixed this. Im using Windows 7 Ultimate 64 bit and set the JDK_HOME variable but it wont start.../Edit: it works now. Last edited: May 16, 2013 HI Thanks for

HEREI checked out that the process of creating the environment variable JAVA HOME and such tricks also works in Windows 8. Confirmed. Also found that if the SDK updating gives an error - due to the explorer and java, exe still running - can solve it trough this procedure in Windows 7/8:1. Make a copy of the "/tools" SDK folder and rename it
"tools2"2. Execute "cmd.exe" as administrator, enter the new "\tools2" folder of the SDK (for example, cd C:/Program Files\Android\android-studio\sdk\tools2\")3. From there, execute "android.bat", or if that fails, enter "\lib" folder and execute "sdk manager.exe" inside.4. Update everything trough the manager - will take a while - and close
everything.5. Delete old "\tools" directory and rename "\tools".6. Enter Android Studio and should be able to run everything now. Might need to do it again sometime, though...Hope it helps someone. I posted in the Google pages about this.Make sure that the JAVA HOME is set to the JDK, but also make sure the JDK bin folder
is set on your Windows path. This will allow Javac to work and other JDK functions required by the studio at runtime. Thanks for your tips! That's work fine for me! The AVD isn't launched and Android Studio is still running as if I had never tried to launch one. Previously, on Ubuntu, I had issues running AVDs with hardware graphics, where I would get an error

On Arch, it makes no different whether I set them up for hardware or software graphics, they don't launch. I was wondering if anybody could help me with this. same thing as creating the symlinks would - forcing Android Studio to use the system version of libstdc++ instead of the one supplied with Android Studio. Weird that this fixes things... you would expect that using a specific version of a dependency the software ships with would work better. This workaround reminded me of how I used the same
workaround to fix this issue on Ubuntu. And it actually started happening within the last year, where before that, it was working fine without the workaround. This seems to be an ongoing issue affecting multiple distros. I wonder if there's a way to modify the way Android Studio is installed in Arch to automatically apply a workaround until a solution
is found upstream. gnox Member Registered: 2013-05-18 Posts: 87 With this (fish shell) without moving files works also: env LD PRELOAD=/usr/lib/libstdc++.so.6./emulator -netdelay none -netspeed full -avd So maybe just an export of LD PRELOAD in .bashrc or .profile could be enough. and plantations (notably including shade-grown coffee), while the highlands are mainly scrubland, with a bamboo forest in the northern portions. Ampangorina is the main village and administrative center. The island attracts significant ecotourism, thanks in part to its black lemurs. During the early 1800s, the region was heavily settled by Sakalava
refugees and their slaves fleeing the hegemony of the Merina. France gained control of the island in 1840 and converted it to a logistic center for the import of indentured servants. Although Nosy Komba hosts a traditionally protected forest and an arboretum established in the colonial era, protection for the latter is essentially unenforced, and illegal
logging continues. Only small pockets of old-growth forest remain, in remote areas. railroad bridge in New York City, United States. The bridge carries two tracks of Amtrak's Northeast Corridor and one freight track between Astoria, Queens, and Port Morris, Bronx, via Randalls and Wards Islands. Its main span is a 1,017-foot (310m) steel through arch across Hell Gate, a strait of the East River that separates Wards Islands from
Queens. The New York Connecting Railroad began construction of the bridge in 1912, and it opened in 1917. The main span, a two-hinged arch flanked by stone towers on either bank of Hell Gate, was the world's longest steel arch bridge until the Bayonne Bridge opened in 1931. It is one of the few rail connections from Long Island, of which Queens
is part, to the rest of the United States. This panoramic photograph shows the main span of the Hell Gate Bridge, with Wards Island on the left of the image and Astoria on the right. A tugboat tows a barge in the foreground towards the Hell Gate
