The camp offers various facilities, including the Marina City and the Marine Road 168. While it's nearby to Haeundae Beach, many visitors prefer to use the Dong-jo-dong or Middle-jo-dong building due to its convenience.In fact, over 70% of users rely on the Dong-jo-dong or Middle-jo-dong buildings when placing orders and making returns. The camp's logistics also supports these buildings. However, if you're unsure about the delivery times, consider that most shopping malls are closed on weekends and usually deliver products on Mondays.Considering the large number of users (967,989,000 won), it might be challenging to maintain a user-centric service. Advertising could become repetitive, making it less appealing to customers. With so many users, it's hard to find a balance between providing excellent customer service and covering all potential complaints in detail. Moreover, with limited technological capabilities, automated systems may not be able to handle every issue efficiently.Given the high number of users, some might think that finding an alternative service provider could be difficult. However, this thought process is common among customers when considering the limitations of existing services.
