

I'm not a bot

Designed for the ordinary person in the extraordinary moment, Philips HeartStart OnSite AED (M5066A) is ready to act and virtually ready to go. It allows anyone with little or no training to treat the most common heart rhythm in sudden cardiac arrest (SCA) by delivering a shock quickly and effectively, wherever SCA happens. The OnSite automated external defibrillator provides practical real-time guidance through step-by-step voice commands from pad placement to performing CPR. When every minute counts, Philips HeartStart OnSite defibrillator is the partner by your side.If youre interested in purchasing more than 3 devices, please contact our sales team via the sales contact form Our offers Secure Checkout Free shipping on orders over \$100 Orders are shipped next day Defibrillator, battery (one, pre-installed), SMART Pads (one set, pre-installed), set-up/maintenance guide with expiration date tags, owner's manual, quick reference guideSMART Truncated exponential biphasic. Waveform parameters adjusted as a function of patient impedanceDefibrillation peak current - Adult32 A (150 J nominal) into a 50 ohm loadDefibrillation peak current - Pediatric19 A (50 J nominal) into a 50 ohm load (using optional infant/child SMART Pads Cartridge)Shock-to-Shock Cycle TimeTypically less than 20 seconds between shocks in a seriesAble to deliver a shock after the end of a CPR interval, typically in eight secondsDetailed voice messages guide responder through use of the defibrillatorInstructions for adult and infant/child CPR available at user selectionVia adhesive pads placed on patient's bare skin as illustrated on padsGreen SMART Pads cartridge handle, green On/Off button, blue i-button, orange Shock buttonReady light, blue i-button, caution light
