Many people prefer making and taking calls the old-fashioned way - and your landline phone might well be cheaper or more convenient than a mobile, particularly if your broadband service includes a phone package. Not all landline handsets are alike, however. The best cordless phones are easy to set up and easier to use, with great audio quality and smart features for handling voicemail, contacts and nuisance calls.We've tested dozens of cordless phones to find the best handsets for comfort, features and call quality; below you'll find our recommendations for the best cordless phones, along with our buying guide that will help you choose the perfect DECT handset for you. Every cordless phone these days offers a basic set of features. You can take an address book, caller display and a list of recent calls for granted, for a little more you can add extras such as a built-in answerphone and call-blocking facilities (depending on how you use your phone, you may also prioritise a longer battery life, extended wireless range or water-resistance for use outdoors. Some phones offer fun features such as a wide selection of ringtones or a colour screen.A final thing to consider when buying is whether you might want a second or third handset - most models are offered in two-packs and three-packs, which normally works out cheaper than buying units individually.On some phones you can simply press a button while you're in a call to instantly add that number to your blacklist. You might also be able to manually enter numbers (or parts of numbers) to prevent specific callers from getting through. Either way, when blacklisted numbers call, your phone won't ring. It's up to you whether you send them straight to answerphone or reject them entirely. Some phones also offer a screening feature, which asks unknown callers to give their name, then relays it to you so you can decide whether to answer or not. Just be aware that all these features rely on your having a caller ID service from your home phone provider. The UK's analogue PSTN telephone network is due to be switched off in 2025 - but don't panic. It's being replaced by an all-digital network, and almost all DECT phones made in the past few years will continue to work with the new technology. In most cases, you'll just need to plug your existing DECT phone into a socket on your internet router, or a new socket in the wall, to continue using it. However, you might need to arrange for a new phone service from your ISP, if you don't already have one.Some cordless phones are designed to mimic smartphones, with colour touch screens and photo backgrounds. More practically, if your landline is smart enough to communicate with your mobile then you can copy contacts from your mobile to your home or office phone. It may even be possible to use your DECT phone to make and take mobile calls. This lets you use a more comfortable handset with large physical buttons and an ergonomic design, while your smartphone sits charging, or in a spot that gives you the best coverage.Finally, designed to work over longer distances, or even outdoors. Want to do research when you're down at the bottom of the garden? Do your shopping in a large, open garden? You might have put up with a larger, uglier phone, but it will hold up to more abuse and you won't miss it wherever you are. If you return to townWe tested the cordless phones in, and around, a three-bedroom detached house, making calls to check the quality of the connection at different distances and looking for any sign of interference or poor range. We also took the phones outside, in a long back garden, to check whether the connection still held up over longer distances and through external walls.Beyond this, we used the phones as a main landline phone over several days, looking for issues with call quality and checking the usability of any directory or answerphone features. We tried out different ringtones for clarity, volume and how likely they are to annoy. We also checked out any call-blocking features, to see whether these are effective and easy to use.READ NEXT: Best wireless routersPrice when reviewed: £53 single, £80 twin | Check price at Amazon Plagued by unwanted calls? BT has the answer. Its trueCall virtual assistant intercepts unknown callers and prompts them for their name before putting the call through - so you can decide whether to accept the call, block it or send it to the answering machine. Specific numbers can
be blocked permanently, and you can set the phone to entirely ignore anonymous or international calls. We also like the controls for outgoing calls, which allow you to block mobile, international or premium-rate numbers.Another neat feature of the Premium Cordless Home Phone is its mobile sync capability, which lets you copy your contacts across from your smartphone into the huge 1,000-entry phonebook. You can even use the handset to receive calls on your mobile. The latest version also adds Voice Control features, enabling you to directly access the Google Assistant or Siri feature on your smartphone.Call quality is another strength, the 21-hour talk time is among the best around and the 1.5in colour LCD screen looks more than decent. A superb phone for anyone who values their privacy - or who just likes having access to the latest features.Key specs - Type: DECT phone with colour display; Assistant: 1,000 entries; Answerphone: £33 single, £40 twin | Check price at Amazon The Gigaset A270A keeps things simple, with a relatively basic set of features and a design that focuses on ease of use. There's an 80-entry phonebook and basic intercom features if you have two or more handsets, plus a built-in answering machine - but otherwise very little else to think about.That's not a big drawback. We found it a well-built phone with responsive keys and a well-designed menu system and we particularly like the illuminated hands-free button, which is easy to pick out in a hurry. The answering machine controls on the base station are also nice and chunky, and while 25 minutes isn't a huge amount of recording time, it should be enough for most people.Another plus point of Gigaset is that it's hearing-aid compatible and uses Gigaset's Eco DECT technology to auto-adjust the power of the wireless signal to keep energy usage to a minimum. The manufacturer promises a lengthy 16 hours of talk time between charges. The one feature we miss is nuisance-call blocking, but all in all this is a good, solid cordless phone that just happens to be very affordable too.Key specs - Type: DECT phone with mono screen; Phonebook: 80 entries; Answerphone: 25 minutes; Speakerphone: Yes; Nuisance call blocking: No; Talk time: 16 hours; Standby time: 200 hoursPrice when reviewed: £40 single, £60 twin | Check price at Amazon With its big, clearly-labelled buttons and straightforward menus, the Panasonic KX-TGE820 is an easy-to-use and very practical handset, offering a long 18-hour talk time between charges and a big 200-entry phonebook.We are particular fans of the way Panasonic handles nuisance calls. You can block whole groups of numbers by their prefix, or block a number at a press of the dedicated button, while unknown callers are prompted to enter an access code, so automated systems don't get through.The phone is well suited to those with impaired hearing. While the sound perhaps isn't quite as sharp and clean as you'll get from Gigaset, it's louder than your average DECT handset when you're holding it to your ear and talking on speakerphone, and it's hearing-aid compatible. But with its highly accessible design and features, this is a phone we're happy to recommend to anyone.Key specs - Type: DECT phone with mono screen; Phonebook: 200 entries; Answerphone: 40 minutes; Speakerphone: Yes; Nuisance call blocking: Yes; Talk time: 18 hours; Standby time: 250 hoursPrice when reviewed: £55 single | Check price at Currys Panasonic's cordless phone is so sharply designed that you might not even recognise it as a phone. When sitting on its cradle the handset looks like a smooth tapered cylinder, with only a single blue LED on the rear to alert you when there's a message or a call. Lift it out though and it looks much more like a regular DECT phone, with a simple keyboard layout and a nice, crisp monochrome screen. It won't be everyone's cup of tea, but it certainly makes a statement.At any rate, there's plenty else to like about this phone, including a 30-minute answerphone, a nice clear speakerphone and the ability to block specific numbers, withheld numbers or numbers with a certain string of digits. There's also a useful Do Not Disturb mode that only allows calls from your nearest and dearest - or crucial work calls - through.In our tests, we were very happy with the Panasonic's call quality and there's an optional Eco mode to cut the radiation and minimise power consumption. Both inside and out, it's an excellent phone.Key specs - Type: DECT phone with mono screen; Phonebook: 120 entries; Answerphone: 30 minutes; Speakerphone: Yes; Nuisance call blocking: Yes; Talk time: 18 hours; Standby time: 200 hoursPrice when reviewed: £77 single, £120 twin | Check price at Amazon If you spend a lot of time outdoors, or need a phone for the workshop/warehouse, this handy handset will be just what you're looking for. With a high-power base station and a sensitive external antenna, it promises a range of 150m indoors and up to a kilometre outside. We had no problem getting a clear signal from the far end of the garden, though your actual mileage will naturally depend on walls and other obstacles.It's also IP67-rated for protection from water and dust, and with 13 hours of talk time and 160 hours of standby, it will keep going for days between charges. Features are fairly limited, but you get a 200-number phonebook, a 30-minute answerphone and basic nuisance-call-blocking. It's a bit more expensive than other phones and the design isn't exactly modern - but if you need the range and rugged build it's an excellent choice.Key specs - Type: Ruggedised DECT phone with mono screen; Phonebook: 200 entries; Answerphone: 30 minutes; Speakerphone: Yes; Nuisance call blocking: Yes; Talk time: 13 hours; Standby time: 160 hours If you're looking for a cordless phone that's more true to life, The Long Range Dual Keypad Base Answering System is also designed with useful features like intercom to help make your daily communications more enjoyable. Lastly, the Long Range Dual Keypad Base Answering System is expandable to 12 handsets, making it an excellent choice for larger households or small businesses. With just one phone jack, you can easily add accessory handsets (use CL80107 or CL80067 models) up to 12 total. 2. Link2Cell voice Assist Cordless Phone Set Looking for a reliable and convenient cordless telephone with digital answering machine? Look no further than this expandable phone system that can accommodate up to six handsets! With the ability to store up to 18 minutes of messages, you'll never miss an important call or message again. And with the Quick-read Message Counter, checking for messages is a breeze - simply retrieve them from the base unit or from any of the handsets. But that's not all - this phone also allows you to connect to your mobile phone, making and receiving calls even in cell dead zones. You can even pair up to two cell phones with the base unit via Bluetooth for increased call clarity and reliability. And with the one-touch Call Block button, you can easily block up to 150 nuisance callers. If you're looking for clearer phone conversations, you'll appreciate the Noise Reduction feature. This function reduces surrounding noise from the other party's phone, allowing you to hear their voice more clearly. And with the Full Duplex Speakerphone, you can use your handset hands-free and even use voice commands for added convenience. But this phone system isn't just for phone calls - it also functions as a baby monitor! With the ability to monitor different areas of your home (like a baby's room) from your handset, you can keep an ear out even when you're away. Please note that this model does not have a jack for connecting headsets. Overall, this cordless telephone with digital answering machine is a great choice for anyone looking for a reliable, convenient, and feature-packed phone system. 3. Smart Block Phone With 2 Handsets - Panasonic. Introducing the Cordless Telephone with Digital Answering Machine, an expandable home phone system that offers a variety of useful features to keep you connected with your loved ones and important contacts. This phone system boasts a digital answering system that can store up to 17 minutes of messages, allowing you to receive and review messages at your convenience. The Quick-read Message Counter feature also enables you to check for new messages with ease. In addition, this phone system allows you to block up to 150 nuisance callers with just one touch of the Call Block button. You can also store up to 100 numbers in your phonebook, ensuring that you never forget an important contact. With Noise Reduction technology, you can hear the voice of the person on the other end of the line more clearly by reducing the surrounding noise from their phone. The Taking Caller ID feature also announces the caller's name or number in English or Spanish, making it easier for you to screen your calls. This phone system also includes a full duplex speakerphone that enables you to use your handset hands-free and monitor different areas of your home, such as a baby's room. You can enjoy up to 10 hours of talk time and up to 5 days of standby time on a single charge, and the low battery alert ensures that you never miss an important call due to a dead battery. 4. Vtech Home Phone With Caller ID & Answering Machine. This corded/cordless telephone system is a reliable and versatile communication solution for any home or office. With DECT 6.0 technology, the system delivers crystal clear sounds and stable operation range up to 1000 ft (outdoor), ensuring you can stay connected without any interruptions. In the event of a power outage, the Line-power mode of the base unit supports your calls using the corded handset and base keypad, providing added security and peace of mind. The integrated digital answering device is easily accessible from the base unit, cordless handset, and remotely. It records up to 14 minutes of incoming messages,
outgoing announcements, and memos. The lighted message counter makes it easiest to keep track of messages, ensuring that you receive messages even when you're not around. The system records up to 22 minutes of incoming messages, outgoing announcements and memos, ensuring you never miss an important message. The backlit large screens and keypad make it easy to read incoming caller ID or call history records, even in low-light conditions. The high contrast text on the extra-large screen is especially helpful for those who are visually impaired. The enlarged font and extra-large and lighted handset keypad allow for easy dialing in low-light conditions. This cordless system has built-in simultaneous full-duplex speakerphones on both the handset and base, allowing both ends to speak - and be heard - at the same time for conversations that are more true to life. The Long Range Dual Keypad Base Answering System is expandable to 12 handsets, making it an excellent choice for larger households or small businesses. With just one phone jack, you can easily add accessory handsets (use CL80107 or CL80067 models) up to 12 total. 2. The system is also expandable up to 5 handsets with only one phone jack, making it perfect for larger households or offices. 5. Motorola C6160 Corded Telephone - Answering Machine & Call Blocking This phone is designed with convenience and practicality in mind, offering a range of features that make it an excellent choice for both home and office use. With a 200 name and number phonebook, it allows you to store a large number of contacts, making it easy to keep in touch with your family, friends, and colleagues. The visual ring indicator is a useful feature that lets you know when you have an incoming call, even if you're not close to the phone. This is particularly handy if you're in a noisy environment or if you're hard of hearing. The answering machine is another great feature, providing up to 30 minutes of digital recording time. This means that you'll never miss an important message, even if you're away from the phone. You can easily retrieve your messages at a later time, giving you the freedom to manage your time more efficiently. The hands-free speakerphone is a particularly useful feature if you need to multitask while on the phone. It enables you to talk on the phone without having to hold the handset, freeing up your hands to do other things. This is particularly useful if you're taking notes or if you need to type on a computer while on a call. 6. Reliable Home Phone With Answering Machine The Vtech Cordless Telephone is a trusted communication device for families worldwide. With its DECT 6.0 technology, it transmits secure signals ensuring crystal clear sounds, interference-free, and stable operation range up to 1000 ft outdoor. This technology has been trusted by families for decades and is known for its long-range and clear sound. The integrated digital answering device is easily accessible from the base unit, cordless handset, and remotely. It records up to 14 minutes of incoming messages, outgoing announcements, and memos. The lighted message counter makes it easiest to keep track of messages, ensuring that you receive messages even when you're not around. The system records up to 22 minutes of incoming messages, outgoing announcements and memos, ensuring you never miss an important message. The backlit large screens and keypad make it easy to read incoming caller ID or call history records, even in low-light conditions. The high contrast text on the extra-large screen is especially helpful for those who are visually impaired. The enlarged font and extra-large and lighted handset keypad allow for easy dialing in low-light conditions. This cordless system has built-in simultaneous full-duplex speakerphones on both the handset and base, allowing both ends to speak - and be heard - at the same time for conversations that are more true to life. Accessing phonebook and call logs has never been easier with the 50 names and numbers phonebook directory, 30 names and numbers caller ID records, and 10 last called number records. The system is also expandable up to 5 handsets with only one phone jack, making it perfect for larger households or offices. 5.
