Harry potter children's book

The Harry Potter series ended after seven beloved books and eight incredibly successful movies, but there's still more to explore inside the wizarding world. Hogwarts will always have a special place in the hearts of Potterheads, but there's no denying that the idea of attending other magical schools has a certain appeal. While eleven wizarding institutions have been confirmed, only eight have been named and given substantial backstories that show the diversity of the international magical community. 8 Koldovstoretz Pupils Played Quiditch On Entire Trees Instead Of Broomsticks Little is known about the mysterious Koldovstoretz, but it was said to be hidden in Lake Ladoga, Russia. Despite being in Russia, the wizarding school welcomed applicants from other countries. Koldovstoretz's daring students played their own version of Quiditch where they rode uprooted trees instead of common broomsticks. As Durmstrang didn't admit Muggle-born students and Koldovstoretz is located closest to Durmstrang, it is presumed that Muggle-borns were encouraged to attend Koldovstoretz. Situated in the Rwenzori Mountains of Uganda, Ugadou was the largest of the eleven wizarding schools, housing witches and wizards-in-training from all over Africa. As old as Hogwarts, Ugadou was internationally known for its expertise in Astronomy, Alchemy, and Transfiguration, with many of its students successfully turning into Animagi throughout their careers. Ugadou's pupils were formally admitted to the school through Dream Messages and practiced magic using hand gestures instead of wands. One of the wizarding school's most distinguished graduates, Babajide Akingbade, eventually succeeded Dumbledore as head of the International Confederation of Wizards. South American students attended Castelobruxo, the Brazilian magic school that was enchanted to appear like pre-Colombian ruins in the middle of the Amazon rainforest. The students were bright green robes and specialized in subjects like Herbiology and Magizoology as their location was rich in magical species. Aside from its popular exchange program for European students, Castelobruxo was known as the alma mater of two famous wizards: Libatius Borage, the author of the Advanced Potion-Making (a standard textbook at Hogwarts), and João Coelho, the Captain of Peru's celebrated Quidditch team, the Tarapoto Tree-Skimmers. Atop a Japanese volcanic island stood Mahoutokoro, the most prominent wizarding school in East Asia. Despite its prestige as an academic powerhouse, Mahoutokoro had the smallest student body out of all eleven magical institutions as it only welcomed Japanese students. Once admitted, Mahoutokoro pupils would receive an enchanted robe that changed colors as they advanced in their magical training, eventually turning gold if they'd reached mastery or white if they'd turned to the Dark Arts. The school was also well-known for its grueling Quiditch training, which made the Japanese Quiditch team one of the best worldwide. Located in an elegant castle somewhere in the Pyrenees, Beauxbatons was mostly made up of French students, though it also accepted witches from the neighboring countries. Students wore blue silk robes that gave them a graceful look as they walked. Beauxbatons was one-third of the competing schools in the Triwizard Tournament, competing against Hogwarts and Durmstrang since the thirteenth century. Notable alumni include Triwizard Tournament contestant, Fleur Delacour; the creator of the Philosopher's stone, Nicholas Flamel; and half-giant headmistress, Olympe Maxime. Durmstrang had a fairly complicated past that involved several forceful takeovers and questionable ex-students and staff. Aside from housing Grindelwald until his expulsion, Durmstrang was known for its affinity for the Dark arts, which was a standard in its curriculum. Durmstrang was also the only school in Europe that didn't welcome Muggle-born students. Given its location somewhere in Northern Europe, pupils wore fur cloaks on top of their blood-red uniforms. Despite its dark reputation, Durmstrang has produced incredibly powerful witches and wizards such as Nerida Vulchanova, who also served as headmistress, and Viktor Krum, a prominent Quidditch player. Ilvermorny was founded by Isolt Sayre and her Muggle husband after they left Ireland and established themselves in Massachusetts. The school admitted magical children from North America and, like Hogwarts, sorted them into four houses: Horned Serpent, Wampus, Thunderbird, and Pukwudgie. Known as a more egalitarian school, Ilvermorny taught both Native American and European magic. Students wore cranberry and blue robes and learned most of the subjects that were offered at Hogwarts. Tina and Queenie Goldstein and MACUSA president Seraphina Picquery attended Ilvermorny at the beginning of the twentieth century. Hogwarts was located somewhere in the Scottish highlands, concealed from Muggles by a powerful charm that made the castle look like abandoned ruins. For over a thousand years, Hogwarts School of Witchcraft and Wizardry produced some of the most powerful and famous magical folk in Europe, including Merlin himself. Hogwarts students were sorted into four houses upon arrival - Gryffindor, Ravenclaw, Hufflepuff, and Slytherin -and remained at the school for most of the year. The students wore black robes, a pointy hat, and ties and lapels in their house's colors. The students' most important exams, OWLs and NEWTs, were taken during their fifth and seventh years respectively. Hogwarts is the best wizarding school, proven by its great reputation and successful students. Whoops! We're sorry but Epic doesn't work properly without JavaScript enabled. The lightning bolt scar on his forehead is all what remains from the attack. Harry is a very talented duelist, that's why Ron and Hermione convinced him to create Dumbledore's Army. He is able to cast powerful spells, such as a Patronus far above the level of those of his age. Charms are actually one of the few disciplines where Harry can be better than Hermione. Harry led a difficult life as a kid. He lost his family, friends, and many people he was close to during the war against Lord Voldemort. For a lot of adults, the Harry Potter books are a comforting reminder of their childhood, and as ready as you may be to share the stories with your kids, it's a lot to ask a child to sit through a 300+ page novel (without pictures). Not all hope is lost though, because you can still introduce your kids to the wizarding world with some age-appropriate Harry Potter children's books, instead. Plus, this way, your kids' love for all things Hogwarts will already be well established by the time they're able to read the actual novels. Any fan of the Harry Potter books already knows it's not hard to fall in love with the series, and chances are high younger kids would love all of the wizardries just as much, they just need it in smaller doses. Thankfully, there are plenty of Harry Potter children's books offering just that. These books are filled with pictures of Harry, Hermoine, and Ron (and other major characters) to help younger kids get to know the characters, and a lot of them even offer illustrated guides to the wizarding world so kids can imagine what it would be like to actually be there. For kids who already know all about the characters, there are also some really fantastic Harry Potter children's books that are for pure entertainment and are filled with jokes, activities, and even toys. So, if you're eager to get your younger kids excited (or more excited) about one of your all-time favorite book series, here are some excellent age-appropriate books to help you get started. Combine their love of pop-ups with your love of Harry Potter and you have this book that features several pages of gorgeous artwork practically coming to life (some might say it's magical). What makes this book all the cooler is that the pop-up pages are filled with illustrations by Andrew Williamson who was a concept artist for all eight Harry Potter movies. In addition to the amazing 3D artwork, this book also includes fun facts about the movies, insights into the creative process from people who worked on the films, trivia, and more. Sure, Hogwarts sounds cool, but what would it be like to actually take a look around and weave your way through the halls of the mysterious academy? Well, with this illustrated book you can find out. It's a large-scale interactive book, which means that kids can look at the gorgeous illustrations and actually engage with them through little activities throughout the book. Beyond the pictures and activities, the book also includes fun facts about the movies and the movie-making process as well as "access" to some of the most mysterious locations from the books/movies like the Forbidden Forest, the Great Hall, and Quidditch Pitch. A fun mash-up of Harry Potter and Mad-Libs, this fill-in book offers kids (and you!) all kinds of opportunities to get creative and have fun. Throughout the book, you'll find different prompts to fill in to create one-of-a-kind stories and other fun activities. There's a page that teaches you how to draw Godric Gryffindor, a fill-in story about bravery, and an activity that will tell you what you'd pull out of the Sorting Hat in a crisis. Honestly, this book is fun for kids as it is, but as an added bonus, there's also a cute squishy Harry Potter on the front of the book that they can play with. Kids who enjoy getting crafty and could use a new challenge might really like this Harry Potter book that teaches origami. The 112-page book includes step-by-step guides for 15 Harry Potter-inspired origami crafts as well as photographs for each step for anyone who learns better with visuals. Additionally, the book includes sheets of origami paper that are printed specifically for these crafts to create realistic finished products (like buildings, animals, and other famous Harry Potter objects). Admittedly, this book is probably going to be better for older kids (or for parents who don't mind doing the craft for younger kids), but it's definitely a fun way to get them excited about the world of wizards. This book combines two wonderful things: Harry Potter and stickers. Inside, there are 10 different pictures that are jumbled up like puzzles for readers to fix with sticker magic. Images include Hermione brewing potion, Harry and the Golden Snitch, Ron playing chess, and other scenes featuring different characters and Hogwarts. To solve the puzzles, readers have to find stickers that correspond with each image and put them in their appropriate spots to reveal what the scene actually is. The illustrations throughout the book are fun and whimsical (so they're great for younger kids) and the puzzles can be enjoyed by kids and adults alike. For kids (or adults) who really appreciate gorgeous pictures, this book is filled with illustrations by Jim Kay. It's broken into 366 pages, one for each day of the year, and includes pictures of what Hogwarts looks like throughout the changing seasons, beautiful renditions of favorite characters, and incredible images of prominent locations featured in the books and movies. In addition to all of the pictures, the book also includes memorable quotes from the novels as well as memorable moments and dates that Harry Potter fans will instantly recognize. You and your kid can choose to savor the book, looking at one picture a day as intended, or flip through the pages in a single sitting. If your kid likes to color, then this color by number book is an excellent way to get them some more Harry Potter engagement. Each page is a different picture that features characters and other Harry Potter imagery that's filled with numbers indicating which colors to use to bring the page to life. Plus, since each page is printed single-sided and made from high-quality, thick paper, kids don't have to be nervous about using markers on the pages because there won't be any bleed through from one page to the next. By the time they've made it through the book, they'll have a stack of gorgeous Harry Potter pages ready to put on display throughout the house. Have you ever been so angry you just want to destroy something? Well, this book is designed for kids to do just that. Its "magic" comes out through destruction like dripping orange juice on the pages, coloring all over it, or even ripping a page or two to shreds. Throughout the activity book, kids get to destroy the pages in different ways as they work to take down Lord Voldemort using a little dark (destructive) magic. The book has more than just opportunities to trash it, though, it also includes fun facts about the wizarding world and some of the dark, cursed objects within it. This (adorable) book combines two wonderful things: art and silly jokes. It comes with a paintbrush which kids dip into water and then paint over the pages to reveal hidden messages, images, and jokes. The illustrations are cartoonish and full of whimsy and the jokes are totally kid-appropriate (and rival dad-jokes, to be honest). Each joke has a Harry Potter theme to it and will only make little fans love the characters all the more. And, since the magic pages/paintbrush are activated with water, you don't have to worry about stains. However, there is no saving you from your kid reciting the same cheesy Harry Potter jokes to you over and over. Kids get to dive deeper into the world of Harry Potter and play with paper dolls thanks to this fun book. It comes with 10 paper characters including Harry, Ron, Hermione, Draco, Luna, Cho, Ginny, and more, as well as a variety of clothes, accessories, and props that can be mixed and matched amongst the dolls (and what kid doesn't love to change their dolls' clothing constantly?). The book isn't all play, though, it also contains some actual reading material with fun facts and information about the different Harry Potter characters. It answers important questions like: how long is each wizard's wand?
