The indicators represent the minimum expected standard in a year.Exemplar: Support and guidance, which clearly explains the expected outcomes of an indicator and suggests what teaching and learning activities could take, to support the facilitators/teachers in the delivery of the NaCCA curriculum. Understanding The Common Core Programme (CCP)The Common Core Programme (CCP) is a 4-yr programme comprising of 9 subjects which are; Maths, languages, Science (embodying both the Natural and Applied Sciences), RME, Physical and Health Education, Career technology, Social studies, computing, creative arts and design.The CCP is a standard-based curriculum that seeks to develop the 6 key competencies of leaning such as critical thinking and problem solving in learners.The CCP took off in September, 2020.NSAT will be conducted in JHS 2 to generate data for improvement at all levels of management and implementation. (NB: NSAT is an assessment, NOT an examination).Placement exams into SHS will be conducted at the end of JHS 3; however, the mode and format is likely to change to reflect the CCP demands.Before SHS 2, students take Common Core Exams to guide them in choosing a combination of courses for High School Diploma Programmes (HSDP) or Career-related programmes (CRP).From SHS 2 -3, students decide either to pursue career-related programme or an academic one, or both.Project work, community service and engagements will be integrated as part of a comprehensive learner assessment that emphasizes DOING.ConclusionFor a Complete Overview Of The New GES Educational Reforms And The New NaCCA Curriculum check this article: Note: ISO 639-2 is the alpha-3 code. You can save this page and keep visiting for all the GES 2023 Scheme of Learning for Junior High Schools (JHS) for the rest of the subjects. What is the scheme of learning? A scheme of learning, also known as a scheme of work, is a long-term plan for what teachers will teach and how they will teach it over a period of time, such as a term or a year. It is a high-level overview of the learning objectives, topics, and activities that will be covered. READ ALSO Some Frequently asked questions about the E-Payslip For 2021What is a scheme in teaching? A scheme in teaching is a document that outlines the learning objectives, topics, and activities that will be covered in a particular subject area over a period of time. It is a roadmap for teachers to follow to ensure that their students are progressing and meeting the learning objectives. How do you prepare a scheme of learning? To prepare a scheme of learning, teachers should first consider the following: The national curriculum or other relevant curriculum documents The needs and interests of their students The resources available to them Once teachers have considered these factors, they can begin to plan the scheme of learning. This should include the following: Identifying the learning objectives for the period of time being covered Choosing the topics that will be covered Selecting the activities that will be used to help students achieve the learning objectives The scheme of learning should be flexible so that teachers can adjust it as needed. It is also important to involve students in the planning process so that they have a better understanding of what they are learning and why. What is the difference between a scheme of work and a lesson plan? A scheme of work is a long-term plan for what teachers will teach and how they will teach it over a period of time, such as a term or a year. A lesson plan is a short-term plan for what teachers will teach and how they will teach it in a single lesson. A scheme of work provides a framework for lesson planning. It helps teachers to ensure that their lessons are aligned with the learning objectives and that they are covering all of the necessary topics. Lesson plans are more detailed than schemes of work. They typically include the following: The learning objectives for the lesson The activities that will be used to help students achieve the learning objectives The resources that will be used The assessment methods that will be used Lesson plans help teachers to stay organized and on track during their lessons. They also help to ensure that all students are learning the same material. Here is a table that summarizes the key differences between a scheme of work and a lesson plan.
