

I'm not a bot

I recently subscribed to DirecTV and was trying to create my user ID, but I'm getting an error message saying "Something went wrong. Please try again." (MSIDENTITY_009). Despite trying everything, I couldn't resolve the issue. Can you please help me access my account? On my TV, a notification appeared stating that there was an upgrade and it started downloading. However, since I didn't see the words "DirecTV" on the screen, I'm concerned that I might have been hacked. I also need to return some equipment, but I'm not sure what to do. My modem is linked to three rooms with different devices, including Genie Mini C41-700 and wireless video bridges. I'm using CenturyLink DSL service to a separate wireless router. Is there any way to combine the two? Additionally, I've been experiencing issues with connecting my MAX App to my DirecTV Stream account. The error message says "max Can't Verify Subscription" and "AT&T Something's gone wrong." I verified that HBO and Max App access is still on my plan in the DirecTV app, but nothing seems to be working. I need help resolving these issues and returning the equipment.
