Daflon 500 is one of the most in-demand and most prescribed drugs for the treatment of hemorrhoids. It is a plebotropic drug that must be taken orally. It is prescribed for the cure of venous diseases. Aside from hemorrhoidal issues, Daflon 500 is also used for the treatment of chronic venous disease. In cases of chronic hemorrhoids, clinical tests show that daflon 500 proves to be significant in the reduction of severity, number, duration and recurrences of hemorrhoidal attacks.Origin and compositionDaflon 500 mg has 10% flavonoids (50 mg) and 90% diosmin (450 mg). The flavonoid portion undergoes micronization and purification, making the drug an exceptional MPFF or micronized purified flavonoid fraction. Micronization is the process of grinding the active ingredient using a sophisticated technology. As a result, the size will be reduced significantly.A lot of members of the flavonoid family are known to make blood vessels stronger and reduce as well as eradicate inflammation. Ideally, these attributes of flavonoids can be useful in the cure of hemorrhoids. As a matter of fact, some laboratories conducted trials on people who are taking supplements made from flavonoids. The results of the trials showed that most flavonoids have positive effects such as the reduction and elimination of the bleeding, itchiness and other signs of hemorrhoids.Diosmin is also a part of the flavonoid family. However, the 10% flavonoids are referring to the other flavonoid substances present in Daflon 500. These substances are diosmetin, linarin, isorhoifolin and hesperidin. Hesperidin is the raw material in the production of Diosmin. This raw material comes from a kind of undeveloped and small oranges, a Rutaceae aurantieae species. These oranges are reaped and dried in China, Northern Africa and Spain.Treatment of hemorrhoidsThe treatment done by daflon 500 happens by affecting the microcirculation and macrocirculation operations in the body. It affects microcirculation by protecting it against inflammation. What it does specifically are enlarging the resistance of the capillaries and lessening the absorption capacity of the capillaries. On the other hand, it protects the blood vessels against destruction and inflammation. Other flavonoids may appear significant in the cure of venous diseases. However, Daflon 500 is exceptional because of its efficiency and quick relief. This is because of the micronization process underwent. Those who take this drug experience a faster and better absorption of the body.DosageThe dosage of Daflon 500 differs from one condition to another. As mentioned earlier, it is used for the treatment of chronic venous disease. For such condition, the dosage is two tablets a day. For chronic hemorrhoids, the prescribed dosage is also two tablets a day. On the other hand, the advised dosage for hemorrhoidal attacks is six tablets a day for four consecutive days and four tablets a day to the succeeding three days. Just a reminder: daflon 500 does not come in a low price. The intake of Daflon 500 also causes side effects such as headache and nausea. Daflon 500 mg Tablet is used for the treatment of acute or chronic hemorrhoids, varicose veins, and lymphedema. It improves blood flow in the veins and restores their function. Daflon tablets are taken with or without food at the dose and duration recommended by the doctor. You should continue to take this medicine for as long as your doctor recommends. If you stop treatment too early, your symptoms may recur and your condition may worsen. Let your doctor know about all other medications you are taking, as some of them may affect, or be affected by, this medicine. Daflon Tablet Uses Varicose veins Varicose veins are caused by problems with blood flow from the veins of the legs to the heart, causing discomfort. Daflon 500 mg Tablet helps improve blood flow, reduces leakage and rupture of veins, prevents blood clotting and also acts as an antioxidant to promote healing. This relieves symptoms of varicose veins, such as inflammation and pain. Eventually, it can help you carry out your daily activities easily and improve the quality of life. In piles Daflon 500 mg tablet promotes fold healing (hemorrhoids). It improves blood flow and effectively relieves pain, swelling, irritation, or itching caused by piles. Always use the medicine as prescribed for maximum benefit. Make sure you avoid spicy, oil-rich foods and take plenty of fiber to aid digestion and ensure a speedy recovery. In lymphoedema Lymphoedema means swelling that occurs due to problems with the circulation of lymphatic system. Daflon 500mg Tablet improves the circulatory system and therefore treats and prevents swelling. It will also relieve any pain inflammation that may be present with swelling. Exercise and massages will also help you recover faster and more quickly. Get a second opinion from trusted experts and make confident, informed decisions. Get Second Opinion Standard Dose: 500 mg taken twice daily with meals. Maintenance Dose: Some regimen may adjust to 1000 mg once daily, but always follow your healthcare providers instructions. Initial Intensive Phase: 6 tablets per day (3 tablets in the morning and 3 in the evening) for the first 4 days. Following Phase: 4 tablets per day (2 tablets in the morning and 2 in the evening) for the next 3 days. Maintenance Dose: After the acute phase, the dosage may be adjusted to 1 tablet twice daily for ongoing management, as directed by a healthcare provider. Standard Dose: 500 mg taken twice daily with meals. With Food: Taking Daflon with meals can help minimize potential gastrointestinal side effects. Consistent Timing: Try to take the medication at the same time each day to maintain an even level of the drug in your bloodstream. Information on the effects of Daflon 500 mg tablet on human pregnancy is limited. You should consult your doctor before taking this medicine while you are breast-feeding. Driving Information on the effects of Daflon 500 mg tablets on driving is limited. If you are not feeling well or unable to be alert, avoid driving. Alcohol It is advisable not to consume alcohol while taking Daflon 500 mg tablets as alcohol itself may worsen the condition of hemorrhoids. Important information Do not take 500 mg of Daflon Tablet for more than three months without medical supervision. Daflon 500 mg Tablet is safe to use for a period of three months for most patients. Your symptoms of hemorrhoids will not improve after 15 days of use of this medicine, consult your doctor. If you have problems with your liver or kidneys. Avoid standing for a long time and try to reduce your weight and take other measures advised by your doctors, such as avoiding exposure to sunlight and heat. Avoid tight clothing and rinse your legs with cold water to improve blood circulation. Drink more water and have a high fibre diet to avoid constipation like fruits, green vegetables, and whole grains. Avoid fatty food, coffee, and spicy food. Do not carry too heavy objects and exercise regularly. Before consulting your doctor, do not share or use this medicine in patients with similar complaints. Daflon 500 tablets are for short term treatment. Citations New Preparations and Appliances. ID:10.10520/AJ20785135_11011 COMPOSITION: Micronized, purified flavonoid fraction 100 mg; 900 mg diosmin; 100 mg flavonoids expressed as hesperidin. INDICATIONS: Treatment of organic and idiopathic chronic venous insufficiency of the lower limbs with the following symptoms: heavy legs; pain; nocturnal cramps. Treatment of hemorrhoids and acute hemorrhoidal attacks. DOSAGE AND ADMINISTRATION: In venous disease: 1000 mg daily. In acute hemorrhoidal attacks: 3000 mg per day for the first 4 days, then 2000 mg per day for 3 days. Method of administration: Oral route.
