Thanks to OTT platforms, we can enjoy the top films from across the globe inside the comforts of our warm homes. Many of the best movies on Disney+ Hotstar are extremely entertaining and transport the viewers to a land far, far away...
Here are the Top 30 movies on Disney+ Hotstar, of all time: 1. A Death in Texas: CandyOne of the most compelling and disturbing stories in a long time, this follows the life of Texas homemaker Candy Montgomery, played by Jessica Biel of The Sinner fame, who struck her friend and neighbour Betty Gore played by Melanie Lynskey 41 times with an

Raimi takes things to another level as multiple versions of Doctor Strange threaten to wipe the universe out.3. Shang-Chi has no option but to grapple with his past when his father pulls him and his sister into a mindboggling hunt to find a mythical village
 with many powers.4. Vikram VedhaThe dance between good and evil never gets old. There are so many shades and different ways of looking at the same story. In this hit film, Vikram is a good cop with a moral sense of approaching life and Vedha is a dreaded gangster who will go to any extent to get what he wants. The film won multiple awards and
grossed over six times the budget at the box office. 5. TanhajiIn the 2022 National Awards, the film won the Best Feature and Best Costume Awards for the story of a Maratha warrior who has been assigned by Chhatrapati Shivaji Maharaj to defend their fort and their honour from an invading Mughal army. Becoming one of the highest-grossing films
 in Bollywood in 2020, the film was also screened in the Best Foreign Films to be screened at the 78th Golden Globe Award.6. EternalsDirected by Chloé Zhao of Nomadland fame - the movie that won the Best Foreign Films to be screened at the 2021 Oscars, one of Marvel's most creative and original films takes us inside the world of The Eternals, a tribe that has
 been existing on our planet for thousands of years, rising now to fight the scourge of another evil tribe, the Deviants.7. Avengers: Infinity WarWhile Avengers: Infinity WarWhile Avengers: Infinity War. With Thanos on the
loose, Earth's mightiest heroes have to band together to prevent a global catastrophe. It's especially the heartbreaking conclusion that left an indelible mark in the hearts of MCU fans because of how powerful an impact it had.8. Avengers: EndgameSUBSCRIBE TO YouTube After being gutted by Avengers: Infinity War, I'd recommend swiftly
switching gears to Avengers: Endgame. The culmination of the decade-long journey with the OG 6 Avengers — Iron Man aka Bruce Banner (Mark Ruffalo), Black Widow aka Natasha Romanoff (Scarlett Johansson) and Hawkeye aka
Clint Barton (Jeremy Renner) — as they take on their biggest enemy yet, Thanos, is a satiating experience for MCU fans. You can also catch up on the Marvel Cinematic Universe, as the films' collection is available on Disney+ Hotstar.9. Murder on the Orient ExpressA light-content murder mystery that you can easily get hooked on. The movie follows
renowned detective Hercule Poirot in his quest to find the culprit behind, well, a murder on the Orient Express. Everyone is a suspect and everyone 
supporting cast which includes the likes of Judi Dench, Johnny Depp, Penelope Cruz, Daisy Ridley, Olivia Colman and Michelle Pfifer does a great job in keeping the audience hooked to the story.10.  Sound Editing in 2019.11. Toy Story 4Disney + Hotstar has such an impressive collection of animated movies that it is cruel to shortlist a few of them. But if I have to do the impossible task of picking some of them, Toy Storyis one series that definitely makes the cut. A trilogy that was such a big part of every millennial's childhood, Toy Story 4was a
successful reboot that was released in 2019. The end of the trilogy was an almost perfect closure in terms of storyline and its characters and many wondered what more could the makers add. But Toy Story 4provided us a continuation of the story with our favourite Woody and gang helping a new friend Forky feel included. It's also voiced by some of
the biggest names in Hollywood including Tom Hanks as Woody, Tim Allen as Buzz Lightyear and Keanu Reeves as Duke Kaboom.12. UpSUBSCRIBE TO YouTube Another animated film that has fans at the palm of their hands is Up. Probably one of the greatest depictions of a love story. The comedy-drama adventure film follows an elderly widower
and former balloon salesman and a young Wilderness Explorer, who embark on an unforgettable journey inside a floating how many milestones this James Cameron project achieved when it was released almost a
decade ago. Avatarwas something that we had never seen before and I still remember getting mesmerised watching it on IMAX. There's never a dull moment in terms of the visuals and the movie keeps the audience well inside Pandora throughout.14. Poor ThingsSUBSCRIBE TO YouTube Poor Thingsdeservedly won four Oscars thanks to a fabulous
leading performance by Emma Stone alongside exceptional supporting stints by Mark Ruffalo and Willem Dafoe. The steampunk black comedy film follows a young Victorian woman, who embarks on a quirky path of self-discovery after being resurrected through a brain transplant. 15. Jojo RabbitVas farcical and heartfelt at the same time. A
story about love and innocence through the eyes of a 10-year-old boy, Jojo. Director Taika Waititi takes us to Germany during World War two and how Jojo was brainwashed by Nazi propaganda even before he could understand what was the
 world around him gets more and more complex, Jojo discovers love and kindness and understands life in the most challenging situations. Taika Waititi shows us a fascist society as laughable and absurd which makes this movie also stars Scarlett
Johannson, Taika Waititi himself and Sam Rockwell in important roles and is one of my favourite movies on the MCU if you haven't already, Black Pantheris one you shouldn't miss whether you're a fan or not. There was a lot of hype when it came out in 2018 and it was all so
 deserving. Black Panthergave the world its first mainstream black superhero. But while the impact this movie had is so often talked about, Black Pantherwhich stars talented actors like Chadwick Boseman, Michael B Jordan, and Lupita Nyong'o was genuinely an enjoyable watch in terms of storytelling and the central theme of oppression and

Service delivering television, film, and video over the Internet An over-the-top media service (also known as over-the-top television, or simply OTT) is a digital
distribution service of video and audio delivered directly to viewers via the public Internet, rather than through an over-the-air, cable, satellite, or IPTV provider.[1][2] The term is synonymous with "streaming platform". OTT services may be subscription-based or free,[3] and are typically accessed via television sets with integrated Smart TV platforms,
[4] streaming devices such as Amazon Fire TV and Roku, video game consoles, websites on personal computers, and apps on smartphones and tablets.[3][1] OTT bypasses broadcast, cable, and satellite transmissions—the system through which companies have traditionally acted as controllers or distributors of television content. This content may
include shows and movies for which the OTT acquired licensed rights from the content owner. [5][6][7] Programming may also include original content produced by the services such as Netflix or Amazon Prime Video[3][11][12] which provide access to subscription-based film and
television content (SVOD),[2][13] or free ad-supported streaming television (FAST) services also include a range of "skinny" television offerings by streaming platforms, such as Sling TV and Hulu with Live TV, that provide live streams of specialty channels.[15][16][17] OTT television, commonly called
streaming television,[18][19] has become the most popular OTT content.[a] In 2011, the Canadian Radio-television and Telecommunications commission (CRTC), Canada's telecommunications regulator, stated that it "considers that Internet access to programming independent of a facility or network dedicated to its delivery (via, for example, cable or
satellite) is the defining feature of what has been termed 'over-the-top' services ".[20] In contrast to video on demand systems offered by cable and IPTV, which operate over managed networks where channels can be changed instantly and thus content available instantly a
first and then played.[21] Relatedly, some OTT services require movie download but can start playing the content before the download completes (streaming).[22] The United States Federal Communications Commission (FCC) categorizes OTT services into two groups: multichannel video programming distributors (MVPDs) and online video
distributors (OVDs).[23][24] Virtual MVPDs include such as DirecTV Stream, FuboTV, Sling TV, Hulu + Live TV and YouTube TV. The FCC defined an OVD as:[23]any entity that provides video programming by means of the Internet or other Internet Protocol (IP)-based transmission path where the transmission path is provided by a
person other than the OVD. An OVD does not include an MVPD inside its MVPD footprint or an MVPD to the extent it is offering online video programming as a component of an MVPD subscription to customers whose homes are inside its MVPD footprint. In broadcasting, over-the-top (OTT) content is the audio, video, and other media content
delivered over the Internet, without the involvement of a multiple-system operator (MSO) in the contents of the Internet provider may be aware of the contents of the Internet provider operates within a jurisdiction that
requires "net neutrality"). However, the ISP is not responsible for the viewing abilities, copyrights, and/or other redistribution of the content from an Internet service provider, such as pay television, video on demand and internet protocol television
(IPTV).[b] OTT refers to content from a third party that is delivered to an end-user, with the ISP simply transporting IP packets.[25][26][27][28] OTT content is delivered via the public Internet instead of a closed, private network system that uses exclusive equipment like set-top boxes,[29] or through IPTV services (such as U-verse TV).[citation]
needed] OTT television signals are received over the Internet or through a cell phone network, as opposed to receiving television signals from terrestrial broadcasters, cable networks, or via satellite transmission. The video distributor controls access through an app, a separate OTT dongle, or a box connected to a phone, PC, or smart television set.
[30] By mid-2017, 58 percent of US households accessed one OTT service in a given month through a streaming device, game console, or Smart TV; with 84 per cent of advertising revenues originating from OTT channels, exceeding revenues from videos playing in web browsers on desktops and laptops. [30] In 2019, the record of simultaneous users
watching an OTT event was set at 18.6 million in India by Disney Entertainment's video streaming platform Hotstar.[31] This was surpassed in 2023 with 59 million viewers on JioHotstar.[33][c] In 2023, the viewing of TV content on streaming
platforms represented 38% of global television consumption with 1.8 billion subscriptions to OTT platforms.[35] Consumers can access OTT content through Internet-connected devices such as smart TVs,[36] digital media players, gaming consoles, set-top boxes, desktop and laptop computers, tablets, and smartphones.[37] The results of a 2018 in-
 house data analysis of their subscribers by Uscreen (a membership platform for video creators and entrepreneurs) reported that 45% used iOS and Android mobile devices to access their OTT content, while 39% used web browsers for streaming. software.[41][42][10][43] OTT messaging services or online chat provided by a mobile network operator.[44][45] An example is the Meta Platforms-owned mobile application WhatsApp, that serves to replace text messaging on Internet connected smartphones.[46][47] Other providers of OTT messaging include Viber, WeChat, iMessage, Skype, Telegram and the now defunct Google Allo.[48] OTT voice calling, usually called VoIP, capabilities, for instance, a softphone or as provided by FaceTime, Skype, Viber, WhatsApp, WeChat, and Zoom use open internet communication protocols to replace and sometimes enhance existing operator controlled services offered by mobile phone operators.
