The Malaysian coffee market is poised for steady expansion, with projections indicating growth from USD 753.8 million by 2030, representing a 6.1% compound annual growth rate. This upward trajectory is being driven by a maturing coffee culture and growing consumer sophistication, with rising disposable incomes
and rapid urbanization fueling demand for both traditional and innovative coffee formats. The market is experiencing a dual consumption pattern, where the pandemic return to workplaces is revitalizing foodservice channel
growth. Premiumization trends are evident across the market, with fresh ground coffee and pod varieties gaining traction among quality-conscious consumers who initially invested in home brewing equipment during lockdowns. These consumers continue to favor the cost-effectiveness of home preparation compared to café purchases, creating
sustained demand in the retail segment. However, the gradual normalization of work routines is driving a rebalancing of consumption patterns, as increased mobility leads consumers back to coffee shops and specialist outlets that offer greater variety, novelty, and convenience. The foodservice sector is capitalizing on this shift by enhancing its value
proposition through menu innovation and experiential offerings. Coffee specialists are particularly well-positioned to benefit from consumers' renewed appetite for out-of-home consumption, leveraging their ability to provide sophisticated beverage options that align with Malaysia's evolving coffee culture. This bifurcation of the market - between
enduring home consumption and resurgent foodservice demand - presents opportunities for operators across both channels to cater to distinct consumer needs and occasions. The market's growth will be further supported by continuous product innovation, particularly in ready-to-drink formats and specialty blends that appeal to Malaysia's
increasingly discerning coffee drinkers. Focused on delivering actionable insights, this report explores the Malaysia coffee market, analyzing historical performance from 2020 to 2024 and providing forecasts up to 2030. It assesses market size, growth dynamics, and segment-specific trends, highlighting the factors driving change in the industry. By
breaking down the market into product type, packaging type and distribution channel, the report equips decision-makers with a clear understanding of the competitive landscape and growth potential. Market Segmentation The following outlines the segmentation of the Malaysia coffee market: Product type: RTD coffee, whole beans, ground coffee
(coffee capsules and pods, standard ground coffee), instant coffee (standard instant coffee mixes) Packaging type: flexible packaging, folding cartons, glass, others Distribution channel: bars and HoReCa, convenience stores, e-commerce, small grocery stores, supermarkets and hypermarkets, others The segmentation of the Malaysia coffee
market product type, packaging type and distribution channel. By product type, it includes RTD coffee, whole beans, ground coffee (standard instant coffee (standard instant coffee mixes). Packaging type segments encompass flexible packaging, folding cartons, glass, and others. Distribution
channel segmentation comprises bars and HoReCa, convenience stores, e-commerce, small grocery stores, supermarkets and hypermarkets and hyperm

Report UsersThis industry research report is ideal for people who want to gain a comprehensive
understanding of the coffee industry in Malaysia. It is also tailored to help people who need a clear and fact-based analysis of the market size and dynamics, import, export, foreign trade, and pricing of the main product groups within the industry. Most often, these people are professionals actively working in the industry as:C-suite
executives; Directors; Industry strategists; Product managers; Pro
managers; Financial professionals; Bank managers; Auditors. Report Data - Unlock Strategic Decisions The industry research report to make important strategic decisions regarding: Strategic planning; Marketing and sales; Market and industry evaluation; Evaluation
of market opportunities, risks, and challenges; Regional evaluation; Market entry; Market growth; Pricing and promotion; New product development; Distribution; Sourcing and supply chain management; Company evaluation so the
delivery timeline is 5 days upon order confirmation* PETALING JAYA: Malaysia has long been celebrated for its rich coffee culture, evolving from traditional Kopi O to contemporary favourites like the Americano. Over the years, the country has witnessed a surge in coffee consumption, fuelling the growth of local coffee shops and roasters. Data from
World Coffee Portal shows Malaysia's branded coffee shop market grew by 28% in the past year, with more than 3,330 outlets. The rapid expansion has been driven by an economy that is projected to grow by 4% to 5% in 2024. While trendy coffee chains and imported beans dominate the market, there remains a strong demand for traditional coffee.
making methods that preserve Malaysia's heritage and unique flavours. Sai Kee Kopi, better known as Kopi 434, has been a key player in Malaysia's coffee industry since the 1950s. Staying true to its roots, the company grows its coffee beans and preserves traditional coffee-making methods. Its senior sales executive Darren Lee told the Sun its
roasting tradition dates back to the British colonial era. "The British introduced coffee to Malaysia, but many consumed opium, which dulled their taste buds. To enhance the flavour for locals, the Hainanese added caramel during the roasting process." Sai Kee Kopi has a long history that dates back to 1953 when it was founded by Kiar Han Sai in
Muar, Johor. It continues to thrive today by offering diverse products to remain relevant in a fast-changing market. Lee said coffee beans are the seeds of a cherry-like fruit. Coffee trees produce berries, called coffee beans are the seeds of a cherry-like fruit.
Skilled labour is also essential to minimise waste and maintain quality." Despite these challenges, Sai Kee Kopi actively promotes it as a cultural icon and maintains its plantation in Muar, Johor to ensure the best quality. While heritage coffee thrives, newer players like The Bloc. bring modern twists to the table. Founder Muhammad Azfar Roslan, 25,
said his business focuses on mocktails with coffee, matcha, chocolate bases and butter coffee beans are of Brazilian origin and are medium roast also makes it easier for us to develop new recipes. "We grind the beans ourselves and use the AeroPress method as this
approach brings out the best in our coffee's aroma and taste." Muhammad Azfar said although the beans are sourced from Brazil, he buys them from a local supplier that roasts them, ensuring quality and affordability. He said Malaysia has a strong community of coffee lovers, with demand consistently high. "In just two-and-a-half months since
  opening my stall in Bangi, Selangor, I'm already considering expanding my business as it has proven very popular and profitable." For coffee enthusiast and barista at The Bloc. Hazim Imran, 25, Malaysia's coffee scene offers the best of both worlds. "I enjoy my Americano, but I still crave a cup of Kopi O now and then. Both traditional and modern
coffee styles can co-exist as Malaysians appreciate them for different reasons." Hazim views the influx of international chains are entering the market. It's great to see our coffee culture growing and making its mark on the world stage too. "However,
kopitiam and traditional coffee shops will always have a place as locally sourced coffee industry Report DescriptionThis report presents an overview of the Malaysian Coffee Industry development in the

The Malaysian coffee market is poised for steady expansion, with projections indicating growth from USD 753.8 million in 2024 to USD 1,075.3 million by 2030, representing a 6.1% and acquisitions. The Malaysian coffee market is poised for steady expansion, with projections indicating growth from USD 753.8 million in 2024 to USD 1,075.3 million by 2030, representing a 6.1% and acquisitions.
compound annual growth rate. This upward trajectory is being driven by a maturing coffee culture and growing consumer sophistication, with rising disposable incomes and rapid urbanization fueling demand for both traditional and innovative coffee formats. The market is experiencing a dual consumption pattern, where the pandemic-induced home
coffee brewing trend continues to sustain retail sales of fresh ground coffee and pods, while the post-pandemic return to workplaces is revitalizing foodservice channel growth. Premiumization trends are evident across the market, with fresh ground coffee and pod varieties gaining traction among quality-conscious consumers who initially invested in
home brewing equipment during lockdowns. These consumers continue to favor the cost-effectiveness of home preparation compared to café purchases, creating sustained demand in the retail segment. However, the gradual normalization of work routines is driving a rebalancing of consumption patterns, as increased mobility leads consumers back
to coffee shops and specialist outlets that offer greater variety, novelty, and convenience. The foodservice sector is capitalizing on this shift by enhancing its value proposition through menu innovation and experiential offerings. Coffee specialists are particularly well-positioned to benefit from consumers' renewed appetite for out-of-home
consumption, leveraging their ability to provide sophisticated beverage options that align with Malaysia's evolving coffee culture. This bifurcation of the market - between enduring home consumption and resurgent foodservice demand - presents opportunities for operators across both channels to cater to distinct consumer needs and occasions. The
market's growth will be further supported by continuous product innovation, particularly in ready-to-drink formats and specialty blends that appeal to Malaysia coffee market, the report details historical performance over the past six years and projects
future trends through 2030. It delves into market segmentation, analyzing developments across product type, packaging type and distribution channel. Market Segmentation The segmentation of the Malaysia coffee market is outlined below: Product type: RTD coffee, whole beans, ground coffee (coffee capsules and pods, standard ground coffee),
instant coffee (standard instant coffee, coffee mixes) Packaging type: flexible packaging, folding cartons, glass, others Distribution channel: bars and HoReCa, convenience stores, e-commerce, small grocery stores, supermarkets and hypermarkets and hypermarkets
distribution channel. In terms of product type, the market is segmented into RTD coffee, whole beans, ground coffee (standard instant coffee (standard instant coffee mixes). Packaging type categories include flexible packaging, folding cartons, glass, and others. Distribution channel segmentation channel segmentation channel segmentation confee (standard instant coffee), and instant coffee mixes).

Nestle S.A. Power Root (M) Sdn. Bhd. PT. Mayora Indah, Tbk PT. SARI INCOFOOD CORPORATION Syarikat Hang Tuah Sdn. Bhd. UCC Ueshima Coffee Co., Ltd. White Cafe Sdn. Bhd. Data coverage: The data encompasses B2C enterprises. Figures are based on private Household spendings on Hot Drinks. At-home market data covers retail sales via
super- and hypermarkets, eCommerce, convenience stores, and similar sales channels. Out-of-home market data includes all sales in hotels and restaurants, sales by catering companies, as well as sales in cafés, bars, and similar hospitality service establishments. In the out-of-home market, the price always refers to the price per kilogram of the
beverage consumed, regardless of other components in the finished beverage. Modeling approach, building on specific predefined factors for each market segment. As a basis for evaluating markets, we use resources from the Statista platform as well as in-house market research, national
statistical offices, international institutions, trade associations, companies, the trade press, and the experience of our analysts. In addition, we use relevant key market indicators and data from country-specific associations, such as production data, region, and price level index. This data helps us estimate the market size for each country individually
Forecasts: In our forecasts, we apply diverse forecasting techniques. The selection of forecasting techniques is based on the behavior of the relevant market. For example, the exponential trend smoothing is well suited for forecasting techniques.
rates. The impact of the COVID-19 pandemic and the Russia-Ukraine war are considered at a country-specific level. Middle East OLED Market (2025-2031) | Outlook, Forecast, Revenue, Growth, Companies, Analysis, Industry, Share, Trends, Size,
