Happy October! Our team has been hard at work making updates that we believe you and your class will love! Lets explore the new Breakout EDU features and functionality that have been released this month.New Search CapabilitiesFirst, the Breakout EDU search is better than ever. Just type in your keyword to browse our ever-growing collection of games. OR click on EXPLORE ALL to see all the available categories. Need to narrow it down even further? Use one of the three filters beside the search bar to dive deeper into grade levels, subject areas, or game type. The magnifying glass will focus your sights on games that are perfectly-suited to you and your classes.The bigger and better search results are packed with information so you can quickly evaluate which game is right for you. AND were especially excited about the updates to our game details screens! Here youll find everything you need to set up and facilitate a Breakout EDU game. With game resources and answer keys that you can access with a quick click, and clearer, more concise set-up instructions for kit games, your students will be playing in no time. Best of all, each lock now has its own information section with explanations to help you know how players will solve it. The combination is hidden until its clicked so you dont accidentally give it away. And coming soon, your favorite games will even include an image of the puzzles your players will use to crack the codes and conquer those combinations. The new digital game player is now better than ever with some great upgrades to the user experience. With a sleeker layout, not only do the games look amazing, but they now have some fantastic tools that will provide some accessibility features to make games easier to play for all learners. First, players now have access to Immersive Reader that allows them to see AND hear clues in an empowering way. With just a click they can hear text clues read aloud to them - they can even customize the timbre and speed of the readers voice. They can adjust the readability, too, with controls for text size, spacing, typeface, and background color. If they want to dig even deeper, they can highlight syllables and parts of speech - GREAT for early or second-language readers. If they need to narrow their focus, they can eliminate distractions or even SEE the meanings of words - in their own language with the inclusion on Immersive Reader. These features are available in any text field within the game player.Another great feature, particularly for those who struggle to distinguish colors, is the hover text. Players will now see the color word when then bring their cursor over an input option for the digital color lock. Lock of the Day Calendar Breakout EDU has added some great new functionality to one of our most exciting features! First, by popular request, LOCK OF THE DAY is now automatically enabled for all students by default. Each days puzzle will now be available in the student dashboard unless you choose to toggle it off. Change your mind? Turn it on again with just a click.From your teacher dashboard in My Classes, clicking on Lock of the Day now allows you to track progress by day. See whos completed the puzzles, the amount of time it took them, and even the number of tries. Plus, youll now be able to see students Lock of the Day weekly streaks!Youll also be able to view the puzzle image, download the results, or even get a quick glimpse of the solution right there from your teacher's view. Want to try the Lock of the Day yourself? Go ahead and give the game a try (BEFORE checking the combination!)And heres a little spoiler alert: coming very soon, students will have access to their very own calendar view, where theyll be able to build their streaks - and even unlock with some fun rewards, right in their Breakout EDU account! We hope that you enjoy these updates as much as we do. Stay tuned for more exciting updates coming every month! Page 2 Viewing entries byBreakout EDU Breakout EDU Teach positive digital citizenship with Sonia and the Power of Positive), a brand-new game to pair with Sonia Speaks Up, the upcoming book by Shannon McClintock Miller. School may be out, but that doesnt mean the learning has to stop! Whether youre teaching summer school, running a camp, or just hoping to keep your students sharp over the break, Breakout EDU has you covered with fun, teacher and student-approved ideas to keep brains engaged and boredom at bay. We asked educators from the Breakout EDU community to reflect on their proudest moments from the year. Their answers are inspiring and a true reflection of the incredible educators we get to work with. After weeks of intense focus and silent work, students need a reset. A chance to reconnect, recharge, and rediscover the joy of learning. Thats where Breakout EDU becomes your secret weapon.Breakout EDU is a versatile tool that can be used for reviewing academic content in preparation for testing or for those post-test moments. It offers meaningful, collaborative experiences that engage students and strengthen classroom community. Creating a thriving school culture isnt a one-time initiativeits an ongoing effort built on trust, connection, and shared experiences. That message came through loud and clear during our recent webinar, Building a Thriving School Culture, the first in Breakout EDUs 2025 leadership webinar series. Every teacher has those moments. The ones that stick with you, that remind you why you chose this path. During Teacher Appreciation Month, were spotlighting a few of those feel-good moments that remind us what makes educators truly extraordinary. These stories arent about awards or accolades. Theyre about heart, connection, and the kind of magic only teachers can create. Looking for a creative and meaningful alternative to traditional book reports? Try having students design their very own games in the Breakout EDU Game Design Studio! The school years winding down, and summer break is on the horizon! Weve teamed up with educators to bring you real, classroom-tested ideas to keep students engaged in those final weeks. From creative book report alternatives to unforgettable family share night activities, these Breakout EDU projects will spark critical thinking, collaboration, and lasting memories. No matter your grade level or subject, youll find inspiration to end the year on a high note. Traditional test preparation methods, such as rote memorization and repetitive practice tests, often fail to engage students meaningfully or develop the skills they need to succeed in assessments. To truly prepare students, schools can focus on building critical thinking, problem-solving, collaboration, and confidenceskills that not only improve test performance but also set students up for long-term success.One powerful tool that helps cultivate these essential skills is Breakout EDU. This innovative, game-based learning platform transforms classrooms into engaging educational challenges, requiring students to work collaboratively to solve puzzles, analyze clues, and apply content knowledge in a fun and engaging way. By integrating Breakout EDU into classroom lesson plans, schools can enhance student engagement while reinforcing the skills and content necessary to become strong, strategic test-takers. Join us in celebrating Computer Science Education Week, taking place from December 9-15, 2024. This annual event is all about inspiring K-12 students to explore computer science, advocating for equity in computer science education, and celebrating the remarkable contributions of students, teachers, and partners shaping the future of technology. What if learning could be as exciting as a space adventure? The teachers at New Yorks Yorktown Central School District are blending traditional science lessons with Breakout EDU games, creating an out-of-this-world engaging and memorable learning journey for their students. In a world where engaging students and meeting curriculum standards are often at odds, Breakout EDUs Lesson Content Games bring fresh possibilities to classrooms. Lesson Content Games are designed to deliver standards-aligned learning experiences that captivate students and provide teachers with powerful tools for reinforcement and assessment. These interactive games add excitement to lessons, turning key concepts into hands-on learning. Breakout EDUs wildly popular Breakout+ games recently surpassed 1 million plays, just a month before the games first anniversary. The Breakout+ games have sparked the imaginations of teachers and students around the world and many have wondered if they might be able to create their own Breakout+ game on our platform someday.I sat down with Ann Brucker to answer this question and to get the inside scoop behind the making of these captivating games. Halloween is in the air - and on every kids mind! Rather than fight the excitement, embrace spooky season and treat your students to Halloween-themed learning opportunities with Breakout EDUs Puzzle-tober activities and resources. Were excited to introduce a brand-new game type on the Breakout EDU Digital Platform. Each standards-aligned Lesson Content Game begins with a short video lesson followed by a series of puzzles designed to reinforce key concepts. This format gives students the chance to immediately apply what theyve learned by solving puzzles, while providing teachers with a powerful tool to assess understanding and reinforce learning. Imagine a typical day in your classroom. You are working hard to keep your students engaged and focused on the lesson, but you cant help but notice their participation is lukewarm. Your teacher super senses tell you that something is not quite hitting the mark in your lesson plan. Its time to shake things up. Fall is a whirlwind of preparation and excitement! Its that time of year when students and teachers alike get the back-to-school butterflies. Theres no better feeling than meeting your new students for the first time - but the realities of starting again with establishing classroom management procedures and adjusting lesson plans can feel overwhelming. I remember well the summer months that took place between each of my 13 years teaching high school social studies. In many ways it seemed the countdown to fall began as soon as the final bell rang to dismiss us all home on break! At Breakout EDU, we believe that professional development should be enriching, actionable, and FUN! Our second annual Camp Breakout EDU webinar series is designed to equip educators with the tools and strategies they need to supercharge student engagement and turn classrooms into dynamic learning environments. Level up your teaching game with Breakout EDU at ISTE Live 24 in Denver, Colorado, from June 23rd to 26th! Our team will transform Booth #2057 into an action-packed arcade filled with educational gaming experiences designed to supercharge teaching and learning. Lock of the DayDesigned to be completed in 5 minutes or less, Lock of the Day is a daily, singular, digital puzzle that can be used to start class as a bellringer, offer a mid-lesson brain break, end class as an exit ticket, or even serve as an activity for students who finish sooner than others.Each puzzle ignites curiosity by allowing students to explore different subjects in a dynamic and immersive way. Our student performance reports allow teachers to quickly view which students complete the puzzle and which ones may need additional support. 412 728 kmarks kmarks2025-01-28 18:56:202025-02-03 14:13:58Lock of the Day
