Manual material lift rental

Material lifts are known for their sturdy construction and dependable performance, making them suitable for various industries, including warehouses and manufacturing plants where heavy cargo needs to be handled efficiently. To enhance load handling capabilities, users can add a variety of attachments such as load baskets, booms, and forks. We offer Genie brand SLA line material lifts with lifting capacities of up to 8 metres, featuring rugged yet lightweight designs that allow for quick adjustments without the need for tools. Material lift rentals are available in various configurations, with maximum load capacities ranging from 363 kg. If unsure about selecting a suitable machine, our team is happy to assist in choosing the right material lift for your needs.
