Master of Science in Supply Chain Management at WU Vienna offers a diverse and challenging learning experience that combines theory with real-world applications. The program's interdisciplinary approach, global reputation, and international character make it an attractive option for those looking to analyze and tackle complex supply chain problems. Students learn the fundamental principles and methods of supply chain management, including operations and transport management, logistics, business information systems, geo-informatics, mathematics, and statistics. In their second year, they can select two in-depth electives that align with their interests, such as business analytics, location analytics, or sustainable supply chains. Through seminars and industry partnerships, students apply theoretical concepts to real-world environments, preparing them for successful careers in supply chain management. This field requires analytical thinking, teamwork, and adaptability. WU Vienna's campus provides state-of-the-art technology and a unique urban setting, making it an excellent place to study. Upon graduation, MSc SCM graduates are in high demand on the job market, qualified for top positions in related fields. Academic careers in research offer another attractive option, allowing graduates to contribute to solving global economic challenges. 120 ECTS-Credits: Four-Semester Full-Time Study Program in German and English. Hier finden Sie alle relevanten Informationen rund um Ihr Masterstudium an der WU Masterguide Informationen zu allen deutschsprachigen Masterprogrammen an der WU kompakt zusammengefasst Broschüre Nothing springboards undergraduates into a lucrative, rewarding career like a master's degree, but choosing the right program is essential. Few universities dedicate the time to providing their prospective students with the information needed to make an informed decision on their future field of study. However, the Vienna University of Economics and Business (WU Vienna) is dedicating an entire day to helping students make the best choice. On Nov. 24, 2021, WU Vienna will be virtually showcasing everything there is to know about its nine English-taught master's programs. At the WU Master's Day online event, sessions will be conducted by faculty experts who will provide critical insights on each program's structure, core contents, and specialization options. They will also cover specific job profiles, promising professional fields, and answer live chat queries. Representatives will attend a briefing on admission requirements and processes at the prestigious WU Vienna University. The event features expert talks from professors about studying abroad, navigating the application process, and what it's like living in cosmopolitan Vienna. Prospective students will get an exclusive look at Campus WU through a virtual tour led by energetic university students. This behind-the-scenes insight allows viewers to envision their potential future as one of Europe's largest universities and Austria's only business school offers. Vienna, with its world-class architecture and green spaces, provides the perfect blend of city life and tranquility for international students. The city boasts affordable housing, excellent public transportation, and a rich cultural scene. A thriving start-up ecosystem solidifies Vienna's reputation as one of the most livable cities globally. During WU Master's Day, attendees will gain a deeper understanding of Campus WU through the virtual tour. This event aims to empower students by providing them with the right education to achieve success in an opportunity-rich city. By participating, students can comprehend the interdisciplinary nature of WU Vienna's academic programs, which address social, legal, and environmental aspects of modern economic challenges. The university's Master's Program in Business Communication (BizComm) offers a unique qualification that teaches students how global corporations leverage communication to drive business success and increase corporate social responsibility. This program equips students with the skills to navigate multiple channels, including social media, press releases, and more, giving them an edge in a competitive job market across various industries. Academic directors Jens Seiffert-Brockmann and Axel Beer emphasize the demand for professionals with these skills, stating that companies need communication managers who can effectively guide their strategies. The program is highly interactive, allowing students to apply knowledge through simulations and research projects in partnership with WU Vienna's corporate partners. Additionally, the university's extensive network of over 240 partner universities worldwide offers unparalleled opportunities for global exchange. The Vienna University of Economics and Business (WU) is hosting an online Master's Day on November 24, 2021, from 9:00am to 6:30pm. The event will showcase various programs, including Digital Economy, Economics, International Management/CEMS, Marketing, Quantitative Finance, Socio-Ecological Economics and Policy, Strategy, Innovation, and Management Control, as well as Supply Chain Management. The Institute for International Business at WU is currently seeking two 6-year research associate positions and doctoral fellowships. The successful candidates will support faculty in teaching, administration, and research while pursuing their own academic projects. Key requirements include a university degree in business administration or related fields, fluency in English, basic quantitative skills, and an interest in international business. The IIB group has a strong track record of publishing in leading journals and regularly hosts academic visitors from top universities worldwide. WU is renowned for its collaborative atmosphere, partnerships with 200 universities globally, and strong ties to the business community. Vienna University of Economics and Business offers a range of programs, including joint Masters in International Management (CEMS), which is ranked first in Europe by the Financial Times. The city itself is a major hub for business in Central and Eastern Europe, hosting the European Regional Headquarters of over 200 multinational firms. For those interested, informal inquiries can be directed to Professor Günter K. Stahl at WU. To apply, visit the university's job listing page and register online with vacancy classification number 1735. Applications for Research Associate position (pre-doc) must be submitted by March 23rd, 2011, along with a curriculum vitae. Our website utilizes cookies, both essential and optional.
