How to use cheat engine on stardew valley

Has all the usual suspects for this game. Updated to 1.5.3 (works for 1.5.4 as well), added a Freeze Time script and made the pointers use the .Net structure names. If in a new update they stop pointing to the right spot you can just toggle the 'Refresh Structures' script at the top of their list. Changed a few things to use AOBs instead of symbols but I also made my Enable script periodically refresh the symbol list (every 5 seconds) so you don't have to. Install Cheat Engine Double-click the .CT file in order to open it. Click the PC icon in Cheat Engine in order to select the game process. Keep the list. Activate the trainer options by checking boxes or setting values from 0 to 1. Last edited by aSwedishMagyar on Tue Feb 23, 2021 10:30 pm, edited 4 times in total. Might have to open the process twice. As in: start Stardew Valley -> attach Cheat Engine and load the table -> if it does not work then reattach without closing Cheat Engine. Symbols are being stupid and don't always load the first time. Alternatively, add this to the table and enable it:Code: Select all 124279 "Reinitialize Symbols" Auto Assembler Script { \$lua if syntaxcheck then return end [ENABLE] reinitializeSymbolhandler(true) return 'nop' [DISABLE] Lord Blade Expert Cheater Posts: 912 Joined: Thu Mar 09, 2017 7:52 am Reputation: 63 Post by Lord Blade » Sun Jan 03, 2021 12:16 pm How do I add that exactly? I tried to load the table again, without closing CE, and it still didn't work. Lord Blade Expert Cheater Posts: 912 Joined: Thu Mar 09, 2017 7:52 am Reputation: 63 Post by Lord Blade » Sun Jan 03, 2021 1:18 pm Seem to be having trouble with the minigame cheats too. The Prairie King collision won't activate, but the rapid fire does. Junimo Cart let's me activate the pointer lists, but they all just show ?? Lord Blade Expert Cheater Posts: 912 Joined: Thu Mar 09, 2017 7:52 am Reputation: 63 Post by Lord Blade » Sun Jan 03, 2021 5:19 pm So I got the Prairie King cheats to work. The Junimo Cart still just shows ?? Yeah, the table does seem to have a lot of issues trying to get going. I've been able to activate the mouse over item cheat, but again just shows ?? for everything. You need to put your cursor over an item after activating it. For the cart game, you need to be in the junimo cart minigame in order for the pointers to populate. To add that script in the previous post click 'Select All', hit Ctrl+C, click in your table and hit Ctrl+V. All of the cheats work you just aren't familiar with how to use them. And stop making new posts when you can just update your last. Lord Blade Expert Cheater Posts: 912 Joined: Thu Mar 09, 2017 7:52 am Reputation: 63 Post by Lord Blade » Mon Jan 04, 2021 3:58 am Yeah, I moused over an item before and after trying to activate the cheat. When it did finally actually activate, even mousing over items the fields just stayed ?? With the Jumino Cart, I was in game, activated it, and all it showed was ?? Tried the different game modes, went in and out of the game, nothing made it update. Alright that was my bad, I had changed the base address for those pointers in my own table but the one I uploaded didn't have the change yet. Should work now. Lord Blade Expert Cheater Posts: 912 Joined: Thu Mar 09, 2017 7:52 am Reputation: 63 Post by Lord Blade » Mon Jan 04, 2021 5:45 pm No worries. I'm sure there's lots of people who are new to these tables. I cheat a lot. lol So I'm used to how to get things working (do a thing first, mouse over stuff, etc). I'm just terrible when it comes to trying to make tables myself or sort out scripting. lol Downloaded the updated table. See the Reinitialize option there. Clicking that doesn't seem to do anything. Tried activating the mouse over item script, didn't work. Box won't check. Mouse over tools is working (this time anyway). :p Okay... so managed to get the mouse over items working, but only AFTER I enable the mouse over tools. If I try mouse over items first, it simply won't activate for some reason. Note: I haven't touch Junimo Cart yet so, that script is an exception... Just started a new game today... Note: Script might crash the game or table might freeze CE...
