This book comprises a series of activities designed to facilitate learning about the mathematics of the Mathematical Methods Units 3&4 course through the use of CAS technology as implemented on the fx-CP400 ClassPad II. Download a pdf for all 40 activities and solutions. Activity 1 A function equal to its gradient Activity 2 Differentiating exponential functions Activity 3 Route 2.7e Activity 4 Growth and decay Activity 5 Differentiating trigonometric functions Activity 9 Gradient of composite functions Activity 10 Pendulum motion Activity 11 Comfy chairs Activity 12 Silosrus Activity 13 What might the function be? Activity 14 Are we there yet? Activity 15 The fundamental theorem of calculus Activity 16 Integrate Activity 17 Distance from acceleration Activity 21 Bernoulli trials Activity 22 What is log? Activity 23 Log laws Activity 24 Growth of the WWW Activity 25 Key features of logarithmic functions Activity 26 Applications of logs Activity 27 Derivative of ln(x) Activity 28 Slope fields Activity 32 Non-uniform continuous random variables Activity 33 Normal CD Activity 34 Continuous distributions Activity 35 Simulating random samples Activity 36 Sample proportions Activity 37 Confidence intervals for proportions Activity 38 Looking at limits Activity 39 Sine of x on x Activity 39 Sine of x on x Activity 39 Sine of x on x Activity 30 Modelling motion Skip to main content Reddit and its partners use cookies and similar technologies to provide you with a better experience.
