In parallel to my Topic for Your Current TOP 10 Aircraft (if you have not voted there yet, please do!): Your Current TOP 10 Aircraft ONLY. You can pick FIVE IN TOTAL to vote for, shared between these THREE CATEGORIES: 1: GA Aircraft > Mod or Enhancement to
a default product 2: Airliner > Mod or Enhancement to a default Asobo aircraft View the Current LIVE Charts here: docs.google.com This Sheet is private Historical Archive This post
was originally started in late 2023 to find a winner for the Freeware category of my main Aircraft Charts topic but has since evolved into an ongoing Table of the best Freeware in various categories. Below is the original results from votes received up to the end of 2023, just leaving here for archival purposes. In parallel to my Poll & Vote Topic for
Best Aircraft Product of 2023 (if you have not voted there yet, please do!): POLL & VOTE: Your Single TOP AIRCRAFT of 2023! Aircraft Developer / Mod VOTES Cessna 152 JPL / WB Sim 18 Airbus A320 FlyByWire 16 Hawker Hunter Dave Garwood 6 Douglas DC-3 Improvement Duckworks 3 Scrapyard Monster Flying Fries 3 Vertigo Got Friends 3
Diamond DA62X MrTommyMXR 2 Boeing 787-8 Kuro 1 Beechcraft Bonanza G36 Capt Matto mod 1 Cessna T37-B Tweet VrilleAPlat 1 Diamond DA40 NG MrTommyMXR 1 North American Rockwell OV-10 Bronco Ariebaba 1 DG Flugzeugbau DG-808S glider Touching Cloud 1 Van's RV-7
Deejing 1 Discus 2c Got Friends 1 Rolladen-Schneider LS4 MADoloSimulations 1 FR172 Reims Rocket Bagolou 1 NOTES: Includes any fully standalone freeware product Or Improvement Mods to other default Asobo aircraft I will edit this table and put the top votes at the top from now until the 31st December. The winner will take the Best Freeware
award in my 2023 Chart Awards show in my Top 10 Aircraft thread This is not done as a Poll, as there are already more than 20 (limit for a poll) and I would not be able to edit the answers. My ONE vote is for the Scrapyard Monster by @LordFrites - an absolutely amazing work of love and really it should be payware, but I am glad it's not otherwise
we wouldn't have all those cool branded stickers all over it! 7 Likes There's also been the 787 freeware. Kuro 787-8, Horizonsim 787-9 2 Likes I vote for Duckworks DC-3. No contest for me (respectfully to others). 4 Likes Is that 2 things? Are you voting for one? Yes two different mods for base working title 787. Both have unique models. I honestly
struggle to choose between one of them or say the cessna t-7 and cessna a-37 which are just so well done for freeware that they make you want to go try them out again. I don't fly them much, but certainly both 5* for freeware and both now with a fun and unique EFB/tablet. Again too many hard choices for 1 vote! 1 Like lol sorry about that. But 1 or
none it is here 1 Like I'll go for the Kuro 787-8 as I have flown it the most then. 1 Like Mine is the FBW A320. Most flown plane beside the stock aircraft. 4 Likes JPL/WBS mod for Cessna 152 4 Likes Capt Matto's G36 Improvement Project Bonanza
for me, a huge improvement over the stock. 3 Likes I vote for FBW A320 neo - the most freeware used airplane for me. 2 Likes 3 Likes I vote for the Horizonsim 787-9. Nice addition to the amazing work done on the 787 in AAU2 1 Like I know I've already voted but just want to shout out Working Title too, every single thing they do is absolutely
outstanding and their work made me fall in love with the CJ4. 9 Likes Thanks for this very good idea! My vote for the Denarq enhancement for Beech 18. Difficult to choose because there are so much talented developers. 3 Likes 5 Likes A320 by Flybywire gets my vote. 2 Likes Page 2 I think the Cessna T37-B Tweet was one of the bests mods this
year. So, here's my vote. 3 Likes FBW A320 gets my vote, for both the scale of the efforts they have put in, through many Sim Updates moving the goalposts, and the results which they've achieved. 2 Likes 4 Likes You need to include the DA62X performance mod by MRTommyMXR! I keep coming back to this plane time after time because it's super
easy to fly and the performance mod makes it so much better. 1 Like Agreed! Without WT's involvement, some of the aircraft named in this thread would not have been improved to be worthy of consideration. 2 Likes Dave Garwood's Hunters please. 5 Likes My vote is for the Denarq mod for the Beech Model 18 2 Likes Denarq Beech 18 mod for me
please. 2 Likes @kaha300d / @Kayembee370 / @Elandon78 Thinking about it, not sure the Beech Model 18 can be allowed. It's not free as it's based on a Local Legend (or was it a Famous Flyer)... either way it's not free as it's based on a Local Legend (or was it a Famous Flyer)... either way it's not free as it's based on a Local Legend (or was it a Famous Flyer)...
JPL/WB Sim mod for the Cessna 152. Also very good and arguably of payware quality 4 Likes FBW A320 - simply amazing effort given the complexity of the aircraft 1 Like N6722C: WB-SIm C172 Mod It's not free though is it? And even if it was, it's only for the premium version of the game so not what I would consider a free base aircraft. 1 Like Make
that the WB-SIM C152 mod then ... 2 Likes Hi, For me the best freeware mod is the FBW A320. 1 Like I have to go with the one I've spent the most time flying, and that's the Duckworks DC-3 mod. 3 Likes Like others above, the FBW A320 must be #1 on my list. It is amazing it is freeware. It is truly a much-appreciated donation of time and talent to
the MSFS community, especially given the complexity of the add-on. The C152 and G-36 Bonanza are runner's-up and I fly those more, but they are much less complex (and "only" mods) than the complete FBW A320 and other airliners. 1 Like For me it's
the DC3 Duckworks mod. 1 Like Page 3 But it says "Your top freeware or mod". The Denarq is my top mod. Did you mean it to say "Your top freeware or mod for freeware"? 1 Like Baracus250: Diamond DA62X MrTommyMXR This free mod makes the default DA62 work like a dream. The corrected taxi turning radius, taxi and landing lights, view of
the runway when landing, and much more make this my go-to GA aircraft. 1 Like kaha300d: Did you mean it to say "Your top freeware or mod for freeware aircraft or freeware aircraft or freeware aircraft. 1 Like Not sure how relevant this vote
is from an xbox player - as the only mods in this category which we can vote for, are the Just Friends legacy collection mods - which... technically are not freeware on Xbox due to MS Marketplace policy on not allowing freeware (well apart from when they do such as from their own first party studios!) Out of that limited selection, I would vote for the
Vertigo. (I almost certainly would be voting for a different mod, if I had access to the full selection) 1 Like My top mod is the campout utility from //42. I really can enjoy a good pour of scotch sitting in a camping chair while listening to the crickets and crackling fireplace. Another vote for Dave Garwood's Hunter please. Quite apart from anything else
at low level I think it has a great sense of speed. (Now all I need is his Auster Autocrat...) 2 Likes kaha300d: I assume you even meant "Your top freeware aircraft". Yes, yes... all of that haha. But come on don't split hairs You know full well I mean free. Free to make use of the thing after you bought the base
game. 2 Likes Boobbuster007: My top mod is the campout utility from //42. Firstly it's not freeware. And I really did mean aircraft improvement modifications here 3 Likes Oh sorry for misunderstanding. 1 Like I've never been that happy with or spent that long in the default 152, but with all the votes on here I'm giving the JPL / WB Sim C152 mod a
tryout. It is very good. Brings the 152 up to a much higher standard / usability level, more like a JF level of payware aircraft. Loving it so far. Thanks for highlighting it. I'll have another analog GA to jump into other than the Warrior now. 1 Like 1 Like It's got to be the FBW A320. They've shown tremendous commitment with regular updates since its
release (a long time ago), and associated documentation. Can't wait for the A380. 4 Likes HPGs free bird is the EC135/H135, you have H125 & it caused no little confusion for a while. 1 Like The Cessna Dragonfly for me I think 2 Likes BragRaindrop933: with all the votes on here I'm giving the JPL / WB Sim C152 mod a tryout. It is very good. Yea it is
amazing. So many cool little features, and one of the handful of aircraft with nice Sky4Sim integration. Somehow though I managed to turn one of the few free planes I fly regularly into a Payware by adding the Boris Audio Works sound pack. If you really want to treat yourself, get that! VanDisaster: HPGs free bird is the EC135/H135 Typo - fixed,
thanks! 1 Like There are many free worling people and developer groups without whom this sim would have been doomed. Working Title started as a freeware group giving some quality to the nonesense we'd got an a huge thanks to them foenthe commitment that eventually led to real 1st party development. Then groups like FBW spent their free
time showing a certain finger to all the budget calculators and created an absolutely great A320 from a real mess. They eventually led to MS reconsider and release good default aircraft for a change and rework the avionics (A300 etc) I'm sure without devs like FBW who decided to leave XBox out due to many problems the XBox users would have left
with real low quality. It's thanks to developers who showed that the limits some payware devs constantly talk about are no real limits. Aircraft like the C152 look beautifully but they also hd the fate of quick and dirty development by 1st party devs. And for me the JP, now WB C152 is the best freeware airplane. I fly in VR and it feels just natural. The
features that went into it and the "immersion" aren't matched. A huge thank you to the developer(s). Thanks to people like you there is healthy competition and pressure on payware developers. Incredible service to the community, guys! 1 Like Discus C2 was a free good looking, well flying plane long ago fs2020 was compatible for gliding. The DG
800 has also my full respect because of the efforts the developers did in sence of perfect VR flying, having the pilot visible and no Head, which gives the best immersion in VR. The K7 glider not to forget, of its good looking modeling and the minimum in techniques to stay in the air. Of course there are wonderfully motor planes for free, but because
my favorite flying is on gliding, I would miss them most if they would not be there. Thank alot, to the developers to make me happy with these wonderfull planes. 1 Like Page 4 1 Like North American Rockwell OV-10 Bronco by ariebaba 1 Like Baracus250: Beech Model 18 Denarq Mod What Alex has been able to do with an encrypted Marketplace
aircraft, and one that I absolutely love, is inspiring. His work is pressuring me to create mods for other encrypted aircraft that could use some improvements. He gets my vote, for sure. 2 Likes JPL C152 for me. Edit: the reason I didn't vote for FBW A32X is that it dates from before 2023 but they did and still are doingsuch an impressive work. 1 Like
me too but unfortunately it's not a freeware plane. It's a freeware plane. It's a freeware plane. Too bad I cannot vote for this mod because for me it doubles the interest for this plane. 3 Likes Oh, you're right. I saw the mod in the list in the OP. @Baracus250 why is the Denarq Mod listed if it isn't eligible? You'll need to withdraw my vote. 1 Like So,
umm, are you placing a vote for one of those gliders? NixonRedgrave: why is the Denarq Mod listed if it isn't eligible? Because I realised after taking some votes (3) that it should not really be allowed as it's not free to access. That's the whole point of this vote. See my post here. You'll see it says DELETE on that row. I'm just waiting for @Elandon78
to come back and re-vote (the other 2 already have) and it will be removed. Sorry for confusion. Your Top FREEWARE AIRCRAFT / MODS [Charts] Aircraft @kaha300d / @Kayembee370 / @Elandon78 Thinking about it, not sure the Beech Model 18 can be allowed. It's not free as it's based on a Local Legend (or was it a Famous Flyer)... either way it's
not freely accessible like the others. Do you want to place vote for something else instead? I'm too sleepy for an early Sunday AM in California to have taken all this data in and processed it correctly! Here's a question, now that I can smell this coffee I'm brewing: The FBW isn't something from 2023, is it? So what are your rules? Does the mod have to
be from 2023 or can it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it just be any mod that I feel is the best and it ju
any more confusion lol I'm going to have to vote for KTRM - Jacqueline Cochran Regional Airport (KTRM) - Discussion Hub / World Discovery - Microsoft Flight Simulator Forums The first time I flew into the auto-gen KTRM it was depressing. It's this massive airfield and it was
completely devoid of any kind of life. Vincent has transformed the place and it's bustling with character now. Vincent's work has inspired me to tackle two airports in California that are a part of my real-world life. I'm doubly thankful for his generosity in providing many fantastic freeware airports here in CA (the kind I fly in/out of nearly every time I
font in post 1 lol no worries - I think you need another coffee or three 1 Like I vote for the mod for the Twin Beech ). 2 Likes 2 Likes maddormo: although IMHO the best mod of the year has been Denarq mod for the Twin Beech
It's getting a lot of respect here. I'll take that into account for sure and it could sneak its way into a special category - where it will win by default as there isn't any other mod for a paid mod for a premium aircraft being mentioned at all. There has been a paid mod for a premium aircraft being mentioned at all. There has been a paid mod for a premium aircraft being mentioned at all.
deserves a place in the awards! 5 Likes I understand what you mean, so my vote is for JPL Cessna 152 mod. What have you started @Baracus250 2 Likes My vote: Scrapyard Monster 1 Like Yay another vote for the scrappy! Surprised it's been only you and me so far!! 1 Like Well, it's hard for to favorite
the discus C2 or the DG 800. They are all flying well and looking good. But the special thing what the DG 800 brings like no other plane is the immersion in VR because of the seen pilot. This should be a additional selection, which all planes should have. So I choose DG800. Thanks for asking. Ralf 2 Likes JPL C152 would be my favourite by quite a
wide margin 1 Like Surprised that the Deejing RV-7 isn't on the list yet. It has been my high parformance single and "gentleman" aerobatic ever since it was introduced. And is one of the minor issues addressed to make it perfect. 1 Like It doesn't seem fair to compare mods (which tweak a finished
product) against a built-from-scratch freeware add-on which flirts with, or even matches Payware quality! To that end, I'll vote for the Discus 2c. If it was just mods, it would be the Duckworks DC-3 for me. 1 Like Yet another great thread here Baracus and very worthy too It's great to see these freeware devs getting some recognition 1 Like My vote
 Vertigo by Got Friends 2 Likes If there is one thing I've learnt from being a part of this community it's that whatever I do (or anyone / any developer does) it won't please everyone. A general motto for life on the whole, I suppose. It gets too tricky if I break everything down too granularly. For example is the Discus 2c you voted for really a freeware
when the development of it was supported by a premium version being available too? And is the JPL "just" a mod of an Asobo aircraft when even the 3D model has been substantially changed? In the end, this vote is SIMPLY the most fun you can have for FREE in the game, whatever shape that takes. Everyone can understand that. But I do take your
point of course. And I can pull more data and categories from these results if I want. It seems pretty clear what the other winners are but we have a few more weeks to let it take shape. Thank for participating (everyone!)! 4 Likes FBW for me. The aircraft is great, and you also get the installer for ease of access to FSLTL. 1 Like Coming from the XSX
I've only been on PC for less than a month so still lot's I haven't tried, but the JPL C152 has made a big impression. How can it be freeware?! So, the JPL C152 gets my vote 2 Likes Rolladen-Schneider LS4 by
MADoloSimulations is my favorite. Everything I want in a glider. Of course all my high hour planes are my own projects. If you haven't tried to fly the Wedell-Williams Model 44 from L.A. to New York with only the compass and landmarks for guidance, you're missing out. Hand on the stick the whole time. 1 Like Sal1800: If you haven't tried to fly the
Wedell-Williams Model 44 from L.A. to New York Haha. That is a long long way!! How many times have you done that, and how long does it take? Just one time from Burbank to New York Haha. That is a long long way!! How many times have you done that, and how long does it take? Just one time from Burbank to New York and another one from Burbank to New York and Another
the challenge is to come up with a flight plan that takes you over enough recognizable terrain and cities. In one case, I missed my planned field and landed at a different one about 10 miles away. I had to "ask for directions" (aka peek at the map) to know where I was. 1 Like Absolutely true. I recently discovered what a beautiful plane the citation
longitude is since the WT update. 1 Like I think this poll would have been better with a 3-2-1 ranking. Presently a two horse race. Masking some gems out there are others but this is my solid go to in the addon/mod category. 2 Likes Dave Garwood's Hawker Hunter gets not be the since the WT update. 1 Like I think this poll would have been better with a 3-2-1 ranking. Presently a two horse race. Masking some gems out there are others but this is my solid go to in the addon/mod category. 2 Likes Dave Garwood's Hawker Hunter gets not be the since the WT update. 1 Like I think this poll would have been better with a 3-2-1 ranking. Presently a two horse race. Masking some gems out there are others but this is my solid go to in the addon/mod category. 2 Likes Dave Garwood's Hawker Hunter gets not be the since the WT update. 1 Like I think this poll would have been better with a 3-2-1 ranking. my vote. 3 Likes My vote goes to the FR172 REIMS ROCKET / CESSNA R172 HAWK XP II by bagolu. I also have to comment on how the WT work is underrepresented as probably taken for granted or seen as part of the default MSFS package. Their new Cirrus SR22T G6 is outstanding. 3 Likes Douglas DC-3 Improvement - Duckworks Mod rocks! 2
Likes My vote goes to the JPL / WB Sim Cessna 152 1 Like My vote goes to the Scrapyard Monster, please A labor of love from a true genius! 1 Like Wy vote is for the LVFR Airbuses. 1 Like 2 Likes Got to be the Cessna 152 from JPL/WB. 1 Like I fly
the JPL Cessna 152 a lot. But my vote would have to go to the FBW A320 for the sheer amount of work that's gone into it .... can't imagine why they don't charge £40 for that 2 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the sheer amount of work that's gone into it .... can't imagine why they don't charge £40 for that .2 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for FBW A320. 1 Like Thanks for the party but my vote is for the party but my vote is for FBW A320. 1 Like Thanks f
what to do with them yet, but keep going and I will figure something out soon! I think you have to make categories. Airliners, Ga, mods to existing and full up free airplane from scratch. You really can't compare the FBW to the 152 more, I'd say the Cessna A37-B Dragonfly
It and the Tweet are the most payware-level freeware I've seen in MSFS yet, especially given that they aren't built on top of default assets. 2 Likes Page 7 I have heard similar things about the freeware Bronco, but have not tried it out. The Bronco is probably the one I've flown the most - I've got at it "a bit" but it's a fun thing. The Hunters definitely
deserve a mention. Technically the DC-3 counts, I guess? I've forgotten when that appeared. 1 Like Hey guys... and @TBizzleII: I think you have to make categories. Airliners, Ga, mods to existing and full up free airplane from scratch. You really can't compare the FBW to the 152 mod. They are both
awesome in their own way. I took your advice here, and counted up the new votes, and all added to this Spreadsheet now in 2 SHEETS. Do you think this format makes sense? docs.google.com This Sheet is private I am not 100% sure that some of the ones I have classified as MODS are not actually Stand Alone (the JPL 152)? And there are no Scratch-
Built Airliners so that seems a bit redundant unless I am missing something. Is this division what you had in mind @TBizzleII ? 1 Like Gap in the market for a freeware scratch built airliner, don't think it's too much to ask 1 Like Please read back to Post 1. I have adjusted the title and idea of the topic so I invite anyone that has already voted to add 4
more votes according to the new INFO in post 1 if they wish. Thanks! GA aircraft: Weptburrito with its C152 JPlogistic airliner: FBW A32NX Scratch build Scrapyard Monster by Lordfrites Rafale - M convert by alpha60 (even if it still require some tweak & improvement / finition, for a free aircraft it s very decent). I will look my hangar if I couldn't add
another last mention that deserve my points 1 Like So, for the GA aircraft category: 1 - BE18 Denarq mod 2 - Cessna 152 WBSim JPL mod 3 - DC3 Duckworks mod 4 - DHC2 Beaver GotFriends Monster 3 - Lagaffe PBY Catalina Thanks again @Baracus250 for your
work. 1 Like Eyz1978: Thanks again @Baracus250 for your work. No worries, thanks! Maybe my text was not clear or understandable enough (?) but I mean FIVE in total please? GA Mod: Cessna 152 JPL Duckworks DC3 Airliner Mod: FBW A32NX Scratch built: Dave Garwoods
Hawker Hunter Got Friends Vertigo 1 Like Sorry... Updated list: So, for the GA aircraft category: 1 - BE18 Denarq mod 2 - Cessna 152 WBSim JPL mod 3 - DC3 Duckworks mod For the Scratch build category 4 - GotFriends Vertigo 5 - FlyingFries Scrapyard Monster 2 Likes GA Aircraft: Diamond DA62X by MrTommyMXR 1 Like Denarq Mod C172
Glass Bagolu DC3 Duckworks C152 JPL Deejing Vans RV-7 2 Likes In no particular order... Beech 18 Denarq Mod Bonanza G36 Improvement Mod GotFriends F4F Wildcat Weapons Pack. 2 Likes This is a great mod. You have to take care about your engines or they will die. Even detonation is
simulated so you need to treat them correctly in regard to RPM / MP, leaning, Carb heat and CHT temps. C172 WBSim G36 Improvement This is the only glass cockpit I fly. DC3 Duckworks great mod, would love to see an engine simulation like in Denarqs Beech 18. C152 JPL very nice, the only drawback for me is that it does not work with the //42s
Flow. 2 Likes Hey Kaha, You have already voted for the 152 so I will add the others EXCEPT the WB 172 is not free, so do you want to pick 1 more to add instead? 1 Like Ah, I see. I just leave it at four then. 1 Like So five votes here we go: FBW A320NX that I think should be out of the voting but well... Horizon Simulations B787-900. Duckworks DC-3
it just enables the DC3 for MSFS. Gotfriends Vertigo. JPL C152. 1 Like @Baracus250 I see you have the R-FAL Weapons Mod listed in both the GA and Scratch Built sections. Oh is that the same thing? Where does it belong? Quick clarification: does this category include/exclude planes that are only in FS2020 Deluxe/Premium? i.e. the Longitude?
Page 8 It can include them if there is a FREE Enhancement Mod or Conversion type of thing that uses them as a base. 1 Like The CJS R-FAL (the fighter jet formerly known as the Rafale before Dassault raised a stink about it) is only available on the marketplace. CJS has included the weapons pack in the documentation folder as a separate .rar file
that can be unzipped to Community (or Addons Linker.) Now that I think about it, maybe the Weapons Pack without purchasing the plane. Correct then. It shouldn't. I'll remove it The M stays as it's a totally free thing. 1 Like I edited my list to
include the F4F Wildcat Weapons Pack instead. But... but... the Wildcat is also a payware Yes, but I don't have to download the free Weapons Pack install. Maybe a subtle difference. I will defer to you. I'm sure I can find some
other freeware if you decide it's not apropos. BegottenPoet228: F4F Wildcat Weapons Pack Yeah I guess it fits looking at it again then. The Model 18 Denarq mod is still based on a payware so, yep. Who is this pack created by? GF? Per the developer at GotFriends: "Default installation on the marketplace will not have weapons, there will be an
optional "free-to-download" replacement on the website though for owners." I was also confusing the GotFriends F4F Wildcat (which isn't available for MSFS. I'm old. I get confused. I updated my post. I already voted WB-Sim / JPL C152 mod. Couple other votes goes to: Bagolu's Reims FR172 Reims Rocket / Cessna
R172 Hawk XP II Got Friends Monster NXCub Go
missing and this topic never really got traction! I will keep it going but this is hardly a fair summary of the FREEWARE scene!! @Zwoop68 (sorry I missed that update from February, added now!) @cdsolo (thanks for reminding me to update it!) 3 Likes Baracus250: ^^^ Surely the A380 should be here!!! Yes, @cdsolo just mentioned it lol I'm sure it
you remind everyone to vote again it will be right up there but there have been concerns over performance (myself included) 1 Like I'm blind!!! Fixed it lol Hmm... I miss the Boeing 307 mod. Maybe I have to vote for December: mods: Beech 18 Boeing 307 cessna 182RG (Alex Chesters improvement mod) Bonanza G36 1 Like Hi, all ! You
missed: Fieseler 156 Storch Fokker F27 Hawker Sea Fury Three are excellent! 2 Likes Well this thread got necro-revived. Being I'm back in 2020 I'll have to add some. One though of note (before this was revived) is Deejing's RV-4, which is the ONLY truly aerobatics-capable aircraft in the sim. First pass of top 10 off my head(from a mostly GA pilot):
-JPL/WB 152 -Denerq D18 -Monster NX -GF Savage Carbon (think the monster makes the better crazy plane than the Grravel) The carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster better crazy plane than the Grravel) The carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster better crazy plane than the Grravel) The carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster better crazy plane than the Grravel) The carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster better crazy plane than the Grravel) The carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster better crazy plane than the Grravel better crazy plane than the Grravel between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster Butter between the carbon sits in a nice unique envelope -DeeJings RV4 -Bagolu Reims/Hawk -Scrapyard Monster Butter Butter
features. Really completes it. Might be more than one? -G36 improvement project Can't also quantify how great Archer's interior improvements are and SO many others that put efforts into the smallest things, like KT conversion IAS's and such and tiny tweaks that make things like the humble Robin DR400 into a great aircraft. Too much to list!
STARK awakening seeing 'un-skinned' versions of native 2024 aircraft in their original state again... You forget how much freeware can do. 1 Like I only have 3 at the moment, admittedly quite quirky which suits me perfectly! These are each quite unique in their own right, but they share the common quality of flying great in the VFR world!
Restauravia's Nord 3402 Flyindive's Auster Autocrat Aerosolutionkorea's Buhwal 1 Like A few I'm missing so far: Grumman Duck Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH104 Dove De Havilland DH104 Dove De Havilland DH104 Dove De Havilland DH104 Dove De Havilland DH106 Vampire Grumman F9F Cougar Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH107 Dove De Havilland DH108 Dragon Rapide De Havilland DH109 Vampire Grumman F9F Cougar Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH109 Dragon Rapide De Havilland DH109 Vampire Grumman F9F Cougar Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH109 Dragon Rapide De Havilland DH109 Vampire Grumman F9F Cougar Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH109 Dragon Rapide De Havilland DH109 Vampire Grumman Duck Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH109 Dragon Rapide De Havilland DH109 Vampire Grumman Duck Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH109 Dragon Rapide DH109 Vampire Grumman Duck Hawker Sea Fury Fairey Swordfish Fokker F27 De Havilland DH109 Dragon Rapide DH109 Vampire Grumman Duck Hawker Sea Fury Fairey Swordfish F0 Vampire Grumman Duck Hawker Sea Fury F10 Vampire Grumman Duck Hawker
XIX Seafire mk 47 1 Like Hey James, Your query about enriching your Microsoft Flight Simulator 2020 experience without stretching your budget takes me back to the days of FS2004. The excitement of adding new aircraft and scenery to the sim without a cost is still very much alive in the MSFS community. Firstly, you're in luck! The MSFS 2020
platform, much like its predecessors, supports a vibrant freeware scene. There are numerous websites where you can find high-quality free aircraft, ranging from general aviation to complex airliners, and even historic or military planes. Let me guide you through some top resources: Each of these categories offers a rich variety of aircraft, catering to
all sorts of flying preferences. What's great about these resources is that they also provide installation guides and support, making the process seamless even for beginners. Before you dive in, here are a few tips: Check Compatibility: Ensure the add-ons are compatible with MSFS 2020. Most listings specify this. Read the Instructions: Installation can
vary between aircraft, so it's crucial to follow the provided guidelines. Community Feedback: Look at comments or ratings for insights into the quality and performance of the add-on. Experiment: Don't hesitate to try different types of aircraft. It's part of the fun and entirely cost-free! Remember, the flight sim community is incredibly supportive. If you
run into any issues or need further advice, forums and community pages are great places to seek help. Happy flying and enjoy the endless skies without burning a hole in your wallet! Thanks to Bing for not blocking iframes like Google does! :) You can also check out this video listing all the aircraft and hand-crafted airports: Note that this only lists the
original included aircraft in MSFS. Additional free aircraft are now available within the title, eg. from the 40th Anniversary Edition. Without a doubt, Microsoft
definition - cost nothing to download and use, but users should not be fooled into thinking there is a dramatic drop-off in quality, or what they have to offer. Here we cover some of the best releases in our complete guide below which have been thoroughly tested and hand-picked. This article is updated often as updates and new mods are released so
be sure to bookmark this page. In this guide, we use the terms "MSFS" and "Microsoft Flight Simulator" interchangeably but they mean the same thing - the new flight simulator released by Microsoft Flight Simulator Fly Away
Simulation preview videos included with them so you can see them in action within the simulator. If you like the videos, please subscribe to us on YouTube. December, 2023 Update We've updated this article with many new aircraft, scenery packs, and utilities (and even helicopters!) for December 2023. We'd love your comments in the comments
section below. As this is a lengthy guide, you can jump to the individual categories using the jump links below; Note on Sim Updates: All of the mods featured here are working in the latest Sim Update (SU) at the time of publication. Microsoft regularly releases Sim Update packages and more often than not these seem to break the add-ons in one
way or another. As soon as the developers release updates to their freeware we roll that update into the file listed in our library. Some developers are slower than others so there may be a short delay in updating the mod after a Sim Update has been released. Global Enhancements Some of the best add-ons enhance your flight simulation experience
worldwide. One download and the entire world changes in the flight simulator. No need to download hundreds of individual add-ons to achieve a complete change, with global enhancements such as global scenery and mods, a simple, single download could change your entire Microsoft Flight Simulator experience. This is what's covered below -
mods that change the entire globe. These are also the most requested type of mods so we have listed them at the start of this article. 600+ AI Ships, Boats & Global Traffic Originally released by Henrik Nielsen for FSX and P3D and now remastered for the latest Microsoft Flight Simulator (MSFS) 2020 release is the legendary Complete Global Boats
& Ships AI Traffic Freeware Add-on. This mod brings over 600 AI boats, ships, yachts, cruiseliners, and more to your copy of MSFS. While this is still currently in beta, the developer has assured some great things are to come in terms of the expansion of vessels, boats, and routes (globally). While Henrik Nielsen is the lead dev, many more are
working behind the scenes to make this mod possible. The mod adds global traffic for boats, ships, yachts, and much more watercraft. All are based on real-world routes and operations. Some of the vessels included in this mod are; Fishing boats, Cruise Ships, Tugs, Tankers, Container Ships, Bulk Carriers, Patrol Boats, Submarines, Destroyers,
Aircraft Carriers, Smaller boats, and seacraft Ferry/car transporters. This is a truly stunning global scenery enhancement and was one of the most popular add-ons in the legacy days of FSX/P3D. The developer has announced they will continue to develop this mod and additional routes, ships, boats and more as the months and years go on. We
will always feature the latest release of this mod on Fly Away Simulation so be sure to bookmark this page (or the direct add-on page) to stay up to date with it. Scenery Country: Global/World Coverage. View/Download the file over here. Aircraft It perhaps goes without saying that of all of the things necessary for flight simulation, the aircraft
is arguably the most important. And there was plenty of freeware add-on aircraft available for the new simulator. All of the aircraft listed below have been thoroughly vetted for compatibility with the latest sim version at the time of the article update. Here are some of the best. Native Airbus A330-900neo Mega Pack Another great freeware add-on is
the Airbus A330-900 neo, a wide-body jet designed and manufactured by Airbus in the real world and now available to virtual pilots in the simulated one. Able to carry almost 300 passengers, and with a range of just over 8000 miles, this is one of the most fuel-efficient and modern aircraft currently in the air. The attention to detail here and the
commendable attempts to recreate this aircraft accurately for users of Microsoft Flight Simulator are perhaps the reasons that many who have used it feel it is bordering on "payware quality". Needless to say, any who choose this add-on will not come away disappointed with their experience. The add-on, designed and developed by Project Headwind
is fully compatible with the latest version of MSFS and includes many features that truly bring this aircraft to life. The external 3D model is realistic and accurate flight dynamics of the aircraft. Also featured is a 3D virtual cockpit that has been discovered in the latest version of MSFS and includes many features that truly bring this aircraft to life. The external 3D model is realistic and accurate flight dynamics of the aircraft.
based as close as possible to the real-life A330. Adding more realism are such features as 3D contrails, rain effects, and dynamic and realistic lights and lighting, while such details as dust on the aircraft and engine heating take it up a notch further. Although there will almost certainly be further repaints released by the flight simulation community,
the add-on features eight basic paint schemes. These include the Airbus House "Foundation 10 years", Air Belgium (Belgium), Delta (USA), and Corsair International (France), to name just some of them, as well as three Portuguese airlines, Hifly, Star Alliance TAP Portugal, and TAP Portugal. The user should note there are several known issues with
some of them, this is something that the developer is aware of and is working on fixes for future releases. View/Download the file over here. Airbus A320 Neo (A32NX) by FlyByWire is one of the most well-known and popular third-party developments since the initial Microsoft Flight Simulator release and arguably
has the best development team and resources of any freeware project released for this new sim. As you know, the A320 Neo up to even further detail based on community and third-party contributions to the code
base. Many areas of the default aircraft have been expanded upon both in terms of flight model and in the cockpit. A new tablet/iPad-type device has been included to make setting up flights easier than ever. Essentially, this release enables
the default A320 Neo to work with many third-party expansions and options right out of the box. The entire project is open-source so any developers (or trainee developers) may contribute changes, adjustments, or even new features to the codebase via GitHub. It's truly an expansive project and we can expect great things from it going forward and
into the future. There are already hundreds of liveries and repaints released for this mod and we can expect many more to surface in the coming months. We aim to release as many as we can on Fly Away Simulation and we may even create a "mega-pack" of repaints available for this package. If you are a third-party freeware repaint developer and
have already created a repaint/livery for it - please submit them to our file library here. View/Download the file over here. Sukhoi SuperJet 100-95 is a pinnacle of freeware and open-source innovation, delivering an unparalleled flight simulation experience. This add-on, a detailed recreation of the
real-world aircraft, is a collaboration between AEROPROYECTO and the FlyByWire A32NX team, showcasing Russian aviation's post-Soviet advancement. It features 4K PBR textures for exceptional visual fidelity and a cockpit heavily influenced by the A32NX, including an advanced Electronic Flight Bag (EFB) and SimBridge for MCDU and chart
support. The add-on not only replicates the A32NX's systems but adapts them to the Superjet 100's unique attributes. The result is a flight experience that authentically mirrors the aircraft's real-world dynamics, enhanced by expert input for accuracy. The mod sidesteps MSFS's in-game autopilot for a more realistic flight control mechanism and is
open-source under the GPLv3 license, inviting community improvements. This Sukhoi SuperJet 100-95 mod is not just another aircraft; it's a tribute to aviation marvels, providing a deeply immersive and true-to-life experience for simulator enthusiasts. View/Download the file over here. Beast Horus (Microjet) New for December 2023 Embark on an
innovative flight experience with the Beast Horus Microjet for MSFS 2020. This freeware mod, mirroring a real aircraft under development, blends simulation with reality. Featuring advanced aerodynamics inspired by Formula One technology and a lightweight carbon monocoque structure, it promises agility and performance. Its notable specs
include a 380kg MTOW, 230 knots cruising, and 52 knots stall speed. The mod integrates with the Working Title G3X for enhanced avionics realism. Despite some limitations like the inactive engine switch, the Beast Horus is constantly evolving, with recent updates like an improved canopy mechanism and light intensity switch. Dive into this high-
performance microjet, a testament to aviation innovation. Acknowledgments to CZR Design, Jonx (GOTfriends), and Hans for their contributions. View/Download the file over here. Boeing E-3 Sentry (AWACS) mod for Microsoft Flight Simulation with its high-fidelity for December 2023.
exterior, remodeled in Blender from its FS9 origins. The interior, leveraging ASOBO's B747 cockpit, suits the E-3 Sentry's Boeing 707 roots. Functional doors and recommended toolbar pushback enhance ground realism. Texture work by Pascal FAF430, Ben Hartmann, and Eric Ingram, coupled with authentic sound packs, augment visual and
auditory realism. Unique features like dynamic load-outs in the French model and smoke effects for the USAF and NATO models add depth. This mod captures the essence of the E-3 Sentry, an Airborne Warning and Control System aircraft, translating its surveillance and command capabilities into the virtual skies. View/Download the file over here.
Boeing KC-135R Stratotanker New for December 2023 The Boeing KC-135R Stratotanker add-on for Microsoft Flight Simulator 2020 is a meticulously crafted mod, offering a unique blend of historical aviation and modern simulation. Adapted from the Flight Simulator 2020 is a meticulously crafted mod, offering a unique blend of historical aviation and modern simulation.
the ASOBO B747. This add-on features two models for different refueling techniques: the BOOM system, essential for USAF, and the DROGUE system, used by naval air forces and NATO members. Key updates include multiplayer-compatible animations, functional doors, texture enhancements, improved animations, switchable landing lights, and
authentic CFM56 engine sounds. This add-on not only replicates the KC-135R's design but also immerses users in its operational role, offering a sophisticated and historically rich experience for flight simulation enthusiasts. View/Download the file over here. Van's RV-7/RV-7A Complete Pack A super-fun and completely freeware (free to download and
use) creation of Van's RV-7/RV-7A for the latest Microsoft Flight Simulator (MSFS) 2020 release version. This mod brings the iconic Van's RV-7/RV-7A to your copy of MSFS and includes an incredible amount of detail you would expect from a payware release. The pack we feature here on Fly Away Simulation also includes some extra liveries and
repaints in the add-on so there is no need to go searching for these - they are already included in the downloaded file. This model for MSFS. Several repaints/liveries are included and the mod even included and the models, Van's RV-7 and the RV-7A into your copy of MSFS. Several repaints/liveries are included and the mod even included and the mod even included and the models, Van's RV-7 and the RV-7A into your copy of MSFS.
gauges. The entire interior (3D VC - virtual cockpit) is included and would also suit VR (virtual reality) headset flights should you have the equipment. At almost 1GB, this is a large mod and would be best downloaded with a downloaded with a downloaded with a downloaded with a download manager should you have the equipment. At almost 1GB, this is a large mod and would be best downloaded with a downloaded
own custom liveries and repaints for this model and aircraft. With a paint kit, you can create anything you wish and it's a fun challenge for sure. View/Download the file over here. Tecnam P92 Echo New for December 2023 The Tecnam P92 Echo is a highly accurate recreation of the popular Italian light aircraft. It features a detailed ROTAX 912UL
80Hp engine and a 3D interactive cockpit with advanced avionics, including GPS Aera 510 and GTN750 options for Premium users. The mod offers realistic flight dynamics, interactive elements like a Breakers panel, and customizable cockpit configurations. Developed with community collaboration, this freeware mod enhances MSFS 2020 with an
authentic, versatile flying experience suitable for both training and leisure flights. View/Download the file over here. North American B-25 Mitchell Mew for December 2023 The North American B-25 Mitchell mod adds a historically accurate World War II medium bomber to Microsoft Flight Simulator 2020. Key features include authentic flight
dynamics, a realistic bomb release mechanism, animated pilots, and a detailed cockpit view. Despite using a default sound pack, it offers an immersive auditory experience. The mod, still a work in progress, benefits from community feedback and support, with recent updates enhancing compatibility and functionality. This add-on not only provides a
historical flight experience but also reflects the B-25's versatility and significant role during the war. View/Download the file over here. Sikorsky S-16 A fun little aircraft to add to MSFS that's both basic and super-fun to fly at the same time. The early design (based on a 1915 Fokker) is very simplistic with minimal cockpit gauges and features - which
makes it a very easy plane to pilot and navigate around the vast world in Microsoft Flight Simulator. The original aircraft (and the sim-version alike) seat a single passenger (the pilot) of one. There is no seating or accommodation for any passenger (the pilot) of one.
and turbulence. This sim version has many features and designs all based on the real-world Sikorsky S-16 aircraft and users are rating it as the most accurate S-16 available for MSFS. The 3D model of the aircraft boasts a full selection of animations and 3D modeling including; animated wheels, gun turrets, a highly detailed (and accurate) 3D cockpit,
a detailed exterior 3D model with several liveries/repaints included in the freeware pack and it's also worth noting the entire mod is easy on frame rates and can be run on even a low-end system without any performance issues. View/Download the file over here. Antonov An-225 "Mriya" Perhaps a good place to start is with a port-over from a previous
FSX release to Microsoft Flight Simulator and the Antonov An-225 "Mriya", which is as unique in the virtual world as it is in the real one (there was only one ever made) and features no less than six
engines ensuring that virtual pilots of all levels will need all of their wits and skill to take this monstrous vehicle to the skies. It is worth noting that, much in FSX, the limitations within the sim mean that only four of the engines are controllable. Also featured is a cockpit that is currently based on the 747-8. However, over time with updates this cockpit
with becoming a fully functional An-225 cockpit. Sounds use the default A320 Neo sounds due to their compatibility with the sim. We should further note that, according to the developer, the current model is a "beta" version, with the hope of future updates and upgrades being made available. View/Download the file over here. Hawker Hurricane MK
I New for December 2023 The Hawker Hurricane MK I mod offers an authentic WWII fighter experience. It features realistic flight dynamics, a detailed and interactive cockpit, high-quality textures, and customizable settings. Technical enhancements include improved fuel mixture and throttle systems, one-click push start, refined landing gear
mechanics, and synchronized tail wheel and rudder for better ground handling. This mod captures the historical essence of the Hawker Dr.I Triplane This classic German fighter plane from the First World War era - the Fokker Dr.I
Triplane - is a great freeware add-on, a plane that is almost universally associated with the World War One pilot Manfred Albrecht Freiherr von Richthofen, also known as The Red Baron. At the time the plane first took to the skies in 1917, it was drastically ahead of its time, and gave Germany an almost instant aerial advantage. This iconic aircraft reiherr von Richthofen, also known as The Red Baron. At the time the plane first took to the skies in 1917, it was drastically ahead of its time, and gave Germany an almost instant aerial advantage.
from the early years of aviation has been stunningly recreated by mykrode and will be appealing to both newcomers to flight simulation and grizzled veterans. The add-on features wooden propellers, radial engines, and gun turrets and guns. Various animations in the plane also add further realism and truly bring this exciting, basic, vehicle to life. The
cockpit is 3D virtual and fully animated and the base model itself is also 3D. There are also six different liveries featured, including Red Baron (of the Red Baron himself), Dazzle, White Raven, America 1930s, and BF109. View/Download the file over here. Aurore MB 02 Souricette A super-fun and exciting ultralight, the Aurore MB 02 Souricette has
been brought into a digital version for Microsoft Flight Simulator (MSFS) 2020 release by developer oldpat. The aircraft is another single-seater that is perfect for low-and-slow VFR flights over any region in MSFS and is a blast to fly. The developer
has tried their best to create this as accurately as possible based on the real-world Aurore MB 02 Souricette is a kit plane and can only be purchaser would be required to build the plane themselves in order to fly it (in the real world). This version of the Souricette for flight simulator has all of
the features of the real-world Souricette including; A complete model of the Aurore MB 02 Souricette Custom textures/paints/liveries on the exterior views Accurate flight dynamics to match the real-world aircraft. View/Download the file over here.
Sopwith Triplane New for December 2023 The Sopwith Triplane add-on brings the historical British fighter to Microsoft Flight Simulation enthusiasts to
explore the early aviation era and the distinctive flying characteristics of the Triplane, distinguished from its contemporaries like the SE 5. View/Download the file over here. Bombardier CRI-700, which comes with a working cockpit that
```

utilizes the default Citation CJ4 3D VC. As well as an original livery from the developer, the three default liveries from the FSX version (Orbit Airlines, Pacifica Airlines, and White Paint) have also been included. The user should note, however, that while the add-on is very much worth grabbing, it is a port-over from the default FSX model -

```
consequently, there will be certain issues and bugs that will need to be tolerated while the developer manages to address them. View/Download the file over here. Mykrodian MX1 (Experimental) Ultralight Aircraft Another freeware add-on from developer mykrode for Microsoft Flight Simulator is the Mykrodian MX1 Ultralight aircraft that has been
developed completely from the ground up exclusively for the simulator. Although there is no real-world version of this plane, the Quicksilver MX-1 is perhaps the best real-world comparison, and the Mykrodian MX1 is an aircraft that should be appealing to both veteran virtual pilots and newcomers to flight simulation. The aircraft is completely VR
compatible, and the large, open canopy ensures that the pilot can take in the scenery of their virtual flight with comfort and ease. To say this aircraft is unique would be an understatement. The Mykrodian MX1 is a mod that is simply too good and exclusive to pass up. View/Download the file over here. Air Creation 582SL Ultralight Developed by Alex
Marko is this recreation of the default FSX Air Creation 582SL Ultralight, a unique aircraft that offers something to virtual pilots of all levels and capabilities. Perhaps one of the things the virtual pilot might wish to do is exactly what Marko himself suggests - "fly around your house", adding that to do so, " a trike is what you need", before proudly
presenting what is the "first ultralight aircraft in MSFS". The aircraft is based on the original low polygon model from FSX and uses the original WAV sound pack. It is fully VR compatible and features a dummy pilot/passenger. The Air
Creation 582SL Ultralight is another unique freeware release that all virtual pilots should take full advantage of. View/Download the file over here. Lockheed Harpoon PV-2 to your copy of the Microsoft Flight Simulator. Although technically a port-over, this aircraft pack has
had much attention on its flight model and modifications to ensure full compatibility with the new simulator. Developed by albie (with permission) for MSFS 2020 based on the original FSX package by Milton Shupe and the team, this pack brings the Lockheed Harpoon PV-2 to the new simulator in stunning detail. Most (if not all) of the original
animations, perks, and 3D effects have been included and converted to ensure functionality and compatibility in MSFS even though this is still a port-over and not a ground-up MSFS (2020) model. The pack features 8 different models of aircraft based on real-world op[erations along with over 10 repaints/liveries bringing much choice to your virtual
flights. Because the original FSX 3D VC (virtual cockpit) could not be used in the new MSFS platform, the developer has used the included King Air VC in the simulator as this is the closest available cockpit to the specifications of the PV-2. View/Download the file over here. De Havilland Canada Dash 8 Q400 Package This De Havilland Canada Dash 8
O400 is a port-over conversion from FSX (although many modifications have been made in the process). The virtual cockpit is the default CI4 (by ASOBO) while the engine sounds are the default KingAir350 (also by ASOBO). There are also no less than 11 liveries included - Base/White C-GKUK, ASky Airlines ET-AOD, Air Baltic YL-BBV, Flybe G-JEDI,
Croatia Airlines 9A-CQB, Westjet Encore C-GENU, Qantas Link VH-QOU, Eurowings D-ABQT, Alaska Airlines LN-RDI. Although there are several known issues (such as inaccurate VC, engine sounds, and a missing taxi light on the front center gear strut) this MSFS freeware release is very much
taking time to explore. View/Download the file over here. Helicopters Currently, only a few completely freeware helicopter mods have been developed but we are constantly looking for more as they are created and made available by developers. They are released from time to time and we aim to provide them as soon as we can get our hands on
them. Helicopters were never released in the default MSFS installation so these are particularly sought after. Subscribe and bookmark this article - we will add them as soon as they come in. Aérospatiale SA 342 Gazelle New for December 2023 Experience the Aérospatiale SA 342 Gazelle in MSFS 2020 with this detailed freeware mod. It features a
high-fidelity 3D model based on Cyril Pioffet's design, an authentic flight model. The mod includes an interactive cockpit (in progress),
night texture fixes, new liveries, and a comprehensive manual. This mod encapsulates the Gazelle's agility and versatility, adhering to freeware use only. View/Download the file over here. Scenery After the aircraft themselves, the scenery is arguably the next most important aspect of virtual flight - after all, you need somewhere to take off from, land
and fly over. Whether it is a group of small airports in the green landscapes of northern Europe or one of the many metropolis locations around the world, the scenery is something that can make the difference between an average flight to a breathtaking one. Here, then, are some of the best freeware scenery add-ons for Microsoft Flight Simulator.
Paris Scenery Pack One of the most impressive cities in the world, and one that all virtual pilots will surely wish to explore from the air is Paris in France. And now, thanks to developer Thalixte, users of Microsoft Flight Simulator will be able to do just that. The entire city and surrounding area have been recreated using 3d building data, photoreal
imagery, and real-world data. The developer stated that "the scenery has been extracted from Google Maps" and generated with the "Google Earth Decoder tool". Needless to say, it is highly accurate and authentic. As well as the entire city of Paris, the Paris La Defense and Paris St. Denis are also included. This add-on is essentially all of the Paris
pack files in one easy-to-use package. It is recommended that the user lets the scenery load fully before attempting to use it, as well as lowering the "Terrain" level of detail, ideally to 120. It is also recommended that flights over 1000 feet will result in the best performance for the user. View/Download the file over here. Honolulu, Hawaii &
Surrounding Area Scenery A super-pack of scenery covering the entire area of Honolulu, Hawaii, and the surrounding areas exclusively for the latest SDK offerings. This pack brings photorealistic scenery, replacing the default
Microsoft offerings with much higher definition imagery and photoreal data (and mesh) to the entire Honolulu are truly realistic after installing this mod. This scenery mod has been created using external sources separate from the default MSFS (Bing Maps) internal
imagery and has a LOD (level of detail) of between 19 and 20. The entire city of Honolulu and Pearl Harbour has been created at LOD while the downtown regions have LOD20 detail of imagery) and mesh (terrain) are. For example, a lower number is always a
higher level of detail - LOD10 is much higher detail than LOD20 - example. The pack comes in 6 parts; Honolulu downtown, and PHNL surrounding area, Waikiki and downtown, East area, Kaneohe Bay Marin Corp air station, Pearl Harbour, and Pearl City and PHNL and Kalaloa Area - all are included in
the mod available to download from Fly Away Simulation. This scenery is a stunning pack covering Hawaii (and users think so too with a 5/5 star rating in the Fly Away Simulation mods library) so be sure to grab it. It's a very large download (over 15 GB) so if you have an unstable connection it may be worth investing in a download manager to run
the download of the mod for you. Scenery Country: United States. View/Download the file over here. Bryce Canyon National Park, Utah (V2) Brice Canyon in Utah is a remote scenic location that thousands visit in the real world each year. With beautiful terrain and rugged landscape, it's a popular tourist attraction. The default scenery offerings in
Microsoft Flight Simulator are not perfect, and many users were left without much detail in this region - developer Jeppeson 2001 decided to change that and essentially replace what Microsoft had included in the default MSFS package. The scenery replaces the entire area in and around Bryce Canyon National Park and overwrites the default MSFS
scenery. The developer has used an external source for the photoreal landscape and mesh scenery (terrain data). The scenery is of much higher detail. All of the landmarks in Bryce Point, Sunrise and Sunset Points, and more. It's a fairly large
download and install (~2GB) so be sure to use a download manager if you have an unstable connection - having said that, the entire scenery Pack (and all of the mods in this article) are completely free to download and use (freeware). Scenery Pack This collection of
small GA airfields and airstrips in Switzerland replaces, adds to, and in some cases, builds upon what is already available in the default scenery. Each of the airfields and airstrips has been meticulously and accurately recreated, with "function and accurate function and accurate 
interest to all virtual pilots, particularly anyone with an interest in this particular part of the world. At the time of writing, there were 13 airfields included in the package - Sitterdorf, Winterthur, Kagiswil, Lommis, Speck, Fricktal-Schupfart, Les Eplatures, Bressaucourt, Ecuvillens, Bad Ragaz, Yverdon-les-Bains, Gruyere (LSGT), and an improved
version of Birrfeld. Users should note that each of the airfields and airstrips is included in a singular package for easy download and installation. View/Download the file over here. UK Missing Piers Scenery New for 2023 The UK Missing Piers New f
various UK piers. These include Boscombe, Bournemouth, and many others, each featuring night lighting and detailed designs. This pack aims to fill gaps in the default MSFS scenery with handcrafted, realistic representations of famous UK piers, enhancing the flight sim experience. Further updates are planned to cover more piers along the UK
coastline. View/Download the file over here. Edinburgh, Scotland New for 2023 The Edinburgh, Scotland New for enhancing default simulator sceneries, Thalixte's work includes the city's iconic landmarks. The complete
pack is available as a single download on Fly Away Simulation, including all parts for an all-encompassing experience. Recommended airport (EGPH) and Glasgow International Airport (EGPH), among others. View/Download the file over here. Oostwold Airport (EHOW)
Although the release is still a work-in-process of sorts (in that there will be further updates and upgrades expected in the near future) this recreation of Ootswold Airport in the Netherlands is still worth examining by users of MSFS. Located near the town of Windschoten in the real world, the airport features a grass runway and two taxiways, each of
which has been accurately recreated here. The virtual version features accurate lines and signage on the runway, realistic airport barriers, and real-to-life fuel parking. The streetlights, airport lights, airport lights, airport lights, airport lights, airport lights, and other general lighting add further realism, as does the airport apron and new hangar. The release also features accurate reproductions of the roads
and roundabouts around the airport itself. View/Download the file over here. Italy 20 M Terrain Mesh (DEM) Covering all of Italy and the surrounding areas, including such picturesque locations as Lombardia, Tuscany, Sicily, and Veneto, this scenery release brings a 20-meter resolution date which increases the resolution of the default MSFS DEM
scenery and is a must for any virtual pilot. This increase in resolution means that such features as mountains, valleys, and shorelines appear much more realistic and lifelike than before. Because of the extensive use of the extensive use of the extensive use of the DEM data (or mesh) the heights, depths, and general dimensional details of the terrain are highly accurate and authentic. This increase in resolution means that such features as mountains, valleys, and shorelines appear much more realistic and lifelike than before.
add-on - which is fully compatible with MSFS - brings the country of Italy and the surrounding areas much more to life. View/Download the file over here. Finland 20 M Terrain Mesh for Finland, which covers almost
the entire country, adding essential depth and detail. Developed by Morko, mountains, cliffs, valleys, and hills come to life even more enticing for those who wish to fully explore this part of northern Europe. Real-world data has been taken from several
different free-to-use sources, including the National Land Survey of Finland and Copernicus data, as well as EU-DEM layers, and Earth Observation Research Center. View/Download the file over here. Gatwick Airport (EGKK) New for 2023 The Gatwick A
authentic representation of the UK's second-busiest airport. It includes highly detailed terminal models, dynamic lighting effects, and meticulously updated ground details such as taxiways, markings, and a modernized visual docking guidance system. The mod significantly enhances local traffic movement for a more dynamic simulation experience
Mkvy's personal experience at Gatwick infuses the mod with exceptional realism, making it stand out for its accuracy and depth. This mod is an essential addition for MSFS enthusiasts seeking an immersive and true-to-life Gatwick Airport experience. View/Download the file over here. Ameland Airport (EHAL) Developed by Sinus JayCee, Ameland
Airport, a small GA airport located on the Frisian island Ameland in the Netherlands is available as an add-on and is a significant improvement on the default version (which lacks detail, to say the least). Custom textures and 3D modeling have been employed on all of the buildings in and around the airport, including the Tower Building, the Hangai
Building, and the Solar Park Ameland. The runway and taxiway layout are highly accurate and realistic and marked with white and blue pylons. The dynamic night lighting further brings this airport to life and adds yet another layer of realism. The airport also features a helipad and multiple parking locations, as well as custom fences with special
signs. View/Download the file over here. Geneva, Switzerland Scenery Complete A super-pack for Geneva, Switzerland, and at over 10GB, this is a huge mod. This pack completely overhauls Geneva and the surrounding areas by replacing the default Microsoft scenery with much higher detail imagery and terrain data. The imagery is in super-HD
resolution (38cm per tile) - some of the highest imagery we have released for MSFS on Fly Away Simulation, and because of this, of course, the mod is of huge size (10+ GB). There are several parts included in the pack (and if you were to download this mod elsewhere it would be in separate files) however we have included all in one easy-to-download
pack for ease of use and installation. The scenery covers; Geneva, Switzerland based at 38 cm per tile, Geneva Airport, and Annemasse Airport at an increased resolution of 19cm per tile, hospital Area (HUG) is based on UHD textures using a stunning 9cm per tile. View/Download the file over here. Monument Valley, Arizona
(Utah Border) Covering the entire Monument Valley region of Arizona in the United States, this freeware add-on package is easily one of the best such packages currently available and will be of interest to virtual pilots across the board. Developed by Jeppeson2001, this add-on will overwrite the default scenery resulting in a much more vibrant,
realistic, and lifelike recreation of the Monument Valley region, one of the most iconic and picturesque in all of America. There are also numerous landmarks and iconic areas to locate and view. If you wish to find and view these
locations, it is recommended that you set off from Monument Valley Airport and head east. Users should note that version 3.0 of this add-on is compatible with MSDS USA World Update meaning that this pack blends seamlessly into MS's updates. There are two options available to people who wish to install version 3.0. The first - the scenery blended
into the World Update (All Butte's) which features all three files (monumentvalleytiles), and the second - the New USA World scenery butte's along with my extended scenery butte's along with my extended scenery, which installs only the monumentvalleytiles), and the second - the New USA World scenery butte's along with my extended scenery butte's along with my extended scenery.
here. Dubai, UAE City Building & Scenery Pack Bringing a substantial upgrade and reworking/replacing of the default version of the city, including The
Gervora and the JW Marriot Marquis, the world's tallest and second tallest buildings respectively, and the Dubai Frame, the Burj Al Arab, and the Jumeirah Beach Hotel, to name just some. In fact, so many buildings respectively, and the Jumeirah Beach Hotel, to name just some. In fact, so many buildings respectively, and the Jumeirah Beach Hotel, to name just some. In fact, so many buildings have been recreated and enhanced, that night lighting and reflective glass textures were only completed for around 30 to 40 of them. It
is the hope of the developer that these night lighting features will be extended and upgraded in future updates of the release. For now, though, Dubai is perhaps best fully appreciated during daylight hours. Like in the real world, the virtual city of Dubai is now a must-see for all virtual pilots, something this add-on allows them to do. View/Download
the file over here. Nice, France Developed by Thalizite for Microsoft Flight Simulator is this accurate, detailed, and authentic replication of Nice in France. After using real-world data from Google Maps, the finer detail has been hand-finished for a truly precise and realistic completion. Should you wish to take off from Nice Cote d'Azur Airport, you
can then fly over the Promenade des Anglais, during which you can see the array of accurately reproduced buildings and landmarks below. And while it is not included in this package (it is available in the default sim), you can either choose to fly east down the coast or visit Monaco. View/Download the file over here. Zion Canyon National Park, Utah
Without a doubt, one of the best and detail-heavy add-ons is an overhaul of Zion Canyon National Park in Utah in the United States. The package combines externally sourced photorealistic textures as well as many manual tweaks to vastly improve on the default scenery and buildings. The user can also look forward to enjoying the following improved
landmarks, including the Zion Canyon Overlook, Angels Landing, Zion National Park Lodge, The East and West Temples, the Mountain Of The Sun, and Canyon Junction Bridge. One thing that users should note is that due to the scenery package being "heavy", users of low-end machines may notice a slight reduction in frame rate. Scenery
Country: United States. View/Download the file over here. Switzerland Scenery Packs Several Swiss cities have been reworked and improved in this mod bringing some much-needed life and authenticity to the regions. The areas of Switzerland that have been reworked and sufficiently improved are Bern, Geneva, Lausanne, Lucerne, Sion, and
Zermatt. These improvements feature improved textures and details, improved ground textures, and new 3D building shapes. Particularly impressive is the Matterhorn Mountain in Zermatt, which is also included in photorealistic detail and is a sight to behold for virtual pilots. Although, as per the developer's own admission, the package will "never
be anywhere near as good as a photogrammetry cityscape or a 3rd party payware scenery", it does appear to be a drastic improvement on the default scenery at the moment. View/Download the file over here. Yosemite Valley, California is one of the most scenery at the moment.
release brings the virtual world version more to life than ever before. The ground textures, rock textures, and general terrain and layout of the area have all undergone drastic improvements making this part of the west coast United States all the more appealing to virtual pilots whether they be regular flyers or just take to the virtual skies
occasionally. All of the major landmarks and recognizable features have also been improved, including El Capitan, Half Dome, Glacier Point, Bridalveil Falls, Yosemite Falls, and Vernal and Nevada Falls. Several other waterfalls have also been included, with some hand-mastered so they appear in the highest possible detail. There are also planned
upgrades and updates set for future releases. Scenery Country: United States. View/Download the file over here. Washington D.C., and is without a doubt one of the most
impressive freeware mods available. This package also features the use of the brand-new Blender2MSFS toolkit to create the 3D models, while it also benefits from the use of physically-based rendering (PBR) and has an overall authentic and lifelike feel throughout. As we might imagine, there is an abundance of landmarks that have been recreated in
stunning detail. These include such iconic buildings as the KDCX National Mall "airport", the Capitol Building, the Smithsonian Museum of the American Indian, the Smithsonian Air, and Space Museum, the Smithsonian Arts and Sciences
Building, the Smithsonian American History Museum, the Smithsonian African American History Museum, and the Smithsonian African American History Museum, and the Smithsonian African American History Museum, and the Smithsonian Natural History Museum, and the Smithsonian African American History Museum, and the Smithsonian Natural History Museum, and the Smithsonian Natural History Museum, and the Smithsonian African American History Museum, and the Smithsonian Natural History Museum, and the Smithsonia
Aires in Buenos Aires, Argentina is also included in this ample package. Basically, this mod is simply too good an option to pass by and would be of great interest to all virtual pilots. Scenery Country: United States. View/Download the file over here. Meteora Valley, Greece This full replacement and fix for the Meteora region in Greece is the result of
multiple hours of work in order to ensure the differing terrain matches the default landscape without issue - something that it manages excellently. While there may be a few issues that still need to be ironed out, this free scenery add-on is very much worth the time of virtual pilots who wish to view these most scenic and historic parts of southern
Europe, perhaps not least the Meteora Valley. In order to find Meteora Valley, teleport there using the coordinates (39.694091, 21.629288) into the "Search Airport" box on the map. Then, take off from LGMA (Myrini - Karditsa) and head north-northwest. View/Download the file over here. Tetiaroa (NTTE) French Polynesia The famous atoll and island
region which has been made popular by Marlon Brando (as he has a lease on the area) now available for Microsft Flight Simulation in stunning detail by freeware developer captainfrag. This scenery has been in the works since 2019 and the developer captainfrag.
with brand new textures, new areas, features, new areas, features, and additional landmarks have been included. If you're looking for some low and slow flight along with water landings in amphibious aircraft or floatplanes then this is the scenery pack for you. Also, as mentioned in our download listing for this file - the Icon A5 would be a fantastic aircraft to fly in and
around these atolls with. The real-world island is technically a "private island" (atoll) based in French Polynesia with the lease owned by Marlon Brando. It's a tropical paradise and looks fabulous within the sim. The scenery features completely custom terrain textures, a complete airport (NTTS) for those hard asphalt landings along with custom
vegetation such as plants and trees, and finally a complete inclusion of the resort on the island which even has swimming pools and deckchairs. View/Download the file over here. Lisbon, Portugal Scenery Mega Pack, created by Camiba, significantly enhances the Lisbon area's default scenery.
This freeware pack includes detailed representations of landmarks, buildings, bridges, and public transport, along with custom lighting and terraforming. Key landmarks such as Ponte 25 de Abril, Cristo Rei, and Torre de Belém are meticulously upgraded. This v1.0 pack aims to provide a more realistic depiction of Lisbon, addressing the limitations of
the default MSFS auto-generation. Further updates are anticipated from the developer. View/Download the file over here. Utilities & Tools As well as the aircraft and the scenery, being able to actually navigate around the world of flight simulation in the first place. Whether it is accessing the menu or controlling the aircraft itself, know what keys and
commands do what is of great importance. And so, our last add-on section is perhaps underestimated in how it will make your flight simulation experience that little bit easier. Weather Presets Pack (Expansion) New for December 2023 The Weather Presets Pack by DNBOF significantly enriches Microsoft Flight Simulator 2020 with an array of
weather scenarios. It includes atmospheric conditions for stunning visuals, breezy settings for wind challenges, de-icing for ice management, fog and mist for navigation skills, and snow and thunderstorms for varied weather experiences. Additionally, the pack features unique, location-specific experimental weather presets near major airports,
offering simmers a realistic and challenging flying environment. This pack is invaluable for both sim enthusiasts and real-world pilots, enhancing the simulation's realism and providing a practical tool for experiencing diverse meteorological conditions. View/Download the file over here. Controls/Keyboard Commands Guide Whether you refer to it as
Microsoft Flight Simulator, MSFS, or even FS2020 (by long-time users of the Microsoft Flight Simulator team), this offering contains the full and complete final keyboard commands. Using these commands, you can navigate your way through almost all aspects of flight simulation while drastically reducing the need to click the mouse. Users should
 note that these command keys are set at default mode and, wherever possible, are as close to the keyboard commands of previous releases (such as FSX or FS2004) and should be beneficial to both newcomers and long-time users. If users wish they can customize these commands to their own liking. These commands refer to all aspects of fligh
simulation, covering everything from the main menu to the flight instruments, the cameras, autopilot, landing gear, lights, radio, and much more. An invaluable source of quickly accessed information for all virtual pilots so as to enhance the virtual flight experience and make it an altogether smoother ride. View the guide (or download it) over here.
More Mods & Expansions The selection above is just a snapshot of what we have in the official Fly Away Simulation file library regularly and are always in contact with new freeware developers who wish to list their add-ons and mods in our file library. All of the mods and add-ons featured above
are our current selection of the "best of" what we have so far. This article will be updated mods in order to give room for newer more advanced and better releases. To view the entire range of MSFS mods we cover, visit the official Fly Away
Simulation Microsoft Flight Simulator freeware mod section here. Browse our Individual Categories If you know what mod/add-on category you're already looking for with the new Microsoft Flight Simulator release, then jump to our individual categories using the list below. Each of the topics is covered from scenery to utilities and aircraft - we have
tried our best to arrange from most to least popular; Payware? If you're looking to take your simulator to the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mods for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for the next level and have money to spend - we've got a whole article dedicated to payware mode for
releases have more bank for the buck - they are highly detailed and usually have thousands of development hours spent creating them - and by experts too. Payware generally means much better quality (albeit you have to pay for the add-on/mod). Are you a freeware developer that wants to list your works in our file library? We'd love it for you to list
your freeware MSFS creation/mod in our file library. We add new developers all of the time and are always looking for new mods to release to our users. Fly Away Simulation has become a home for hundreds of thousands of flight simulation
fans and enthusiasts worldwide. Your file will gain excellent coverage and interest. You can submit your add-on, read about our freeware system, copyright details, what we offer for freeware developers, and our "PRO" tier along with a general overview of our website here. Your Thoughts (Please!) We'd love (and really appreciate) your feedback on
all of the mods featured here. Have you used any of the above? What are your thoughts on them? Do you think we've missed anything - if so - what else would you like listed in this article? I've been searching for a concise list, a single page that showcases all the aircraft available in MSFS 2020. I wanted to see images, especially of the cockpit and
the exterior of the planes, and find essential information before taking flight with a particular aircraft. Additionally, it was crucial for me to be able to filter this list to view only the planes from specific categories or editions of the simulator. The bad news is I couldn't find anything satisfying on the internet. The good news is I've taken it upon myself to
work on this project, and now I'm presenting the first version (with some pride, considering I'm not a programmer and only have basic web programming knowledge). Please note that the data in the table is not all official, so it may be the subject of debate. Here's what the first version of this project includes: A list of the 62 aircraft models available in
Microsoft Flight Simulator 2020, with the following information: MSFS 2020 order number Aircraft name Year of manufacture Availability of Auto-Pilot functions Images of the cockpit and the aircraft's exterior Optimal takeoff and landing speeds, as well as the critical stall speed Cruise speed Edition Sorting functions in ascending or descending
order on specific columns Filtering functions for the list based on specific criteria The Lightbox feature for viewing and Esc to close) Zoom function with a simple click on the image in the Lightbox You can visit the project at Kapnoflyer.eu. It works properly on desktops, but
please note that a mobile-optimized version is not available yet. I look forward to feedback and suggestions for improvement, but please be gentle with me because my web programming knowledge is very limited. Feel free to post this on the forum, and I hope it will help MSFS 2020 enthusiasts, especially beginners, but maybe also those with some
experience. 5 Likes Nice work! Max altitude and range would be good additions I think. A fine list, I'm on phone at the moment (out and about) so will take a proper look later (does work OK on phone too really at a glance)... but yeah good job @hiTMan4Dirt!!
Next step... add the 800+ Payware and Freeware options lol. What is Kapnoflyer? Your own domain name? 2 Likes Thanks a lot, I appreciate it! Yes, Kapnoflyer is the name of my project and the domain I chose to host the page. The prefix 'Kapnof comes from my pseudonym Kapnobatai - those who walk on clouds :)) Very nice. Wish this was the
default way to pick aircraft in the sim. The panel preview would be especially handy for the Reno aircraft as each aircraft in the same class or type can vary substantially on the panel. 1 Like You might be interested in this. Done by @Stardrifter2232 Notion A tool that connects everyday work into one space. It gives you and your teams AI tools—
search, writing, note-taking—inside an all-in-one, flexible workspace. Feels like between this, yours and the database for our Hobbs Hours app, there is a lot of duplication and crossover going on. We should probably join forces somehow Nothing has everything combined though so it's a conundrum for sure! 3 Likes Nice job! I have had a long-term
vision of making something similar with the data I've been collecting in my Notion project, which was meant to be the start of it. But between work and having a 1 year old, I just haven't had the time or patience to build a custom project. Great little tool you've created! 2 Likes Stardrifter2232: having a 1 year old, I just haven't had the time or patience to build a custom project.
joking. Mine is 5 now, it doesn't get any easier mate!!! Plus 10 years still not easier!! 1 Like I tried something with this tool. It's interesting, but there are limitations related to the height of the row in the table. Which makes the list view inappropriate. Image management also seems cumbersome to me. I could not create a navigable gallery with the
images at a reasonable resolution. Otherwise, tons of flexibility... I have to analyze a little more. Thanks! KapnoFlyer Aircraft Database Hi, nice table. One thing that caught my eye is that the pictures for the 747 and the 787 might be mixed up. Nevertheless, nice work! 1 Like Sooo, it appears to me that there is a lack of freeware base kits and
repaints for FS2020 is there not? I've been looking online, everywhere I know of and no luck. Not as easy as it used to be with FS2004. I apparently bought what I thought I could install on FS2020 through the Market Place, Boeing 737-700 from PMDG, but I guess it looks like I'm needing the base kit first. Oops, Anyone know of any places where it is
an easy find for freeware? Preferably 737's if possible Don't know were you've been looking, but there's more freeware stuff for MSFS after only three years, than there's ever been for FSX or P3D. Very concentrated as well. I would guess about 90% can be be found on one site: Try www.flightsim.to 2 Likes Here's a list you can use to start: Top
freeware aircraft But if you do a simple search of this forum. 1 Like I would not say there is more freeware aircraft" you will find many more. I see a couple 737 projects when I search this forum. 1 Like I would not say there is more freeware between the two of them, than there is at .to But
there is certainly by now a reasonable selection of freeware, some of it conversions of FSX aircraft. MSFS can do a lot more than 9 and X in many aspects. And while that allows some really cool features in a simulated aircraft, I feel it has also made it much more difficult for a single person to create a freeware aircraft. And quite frankly I think folks
have become much more demanding and ungrateful than in earlier times. We noticed that with the Connie series even in the FSX days. From rivet counters, to folks who did not read the supplied documentation and then complained about engine failures.... That has caused quite a few of the developers of the old days to simply walk away. 9 Likes
Talking about aircraft you might be right. There are some other sites with freeware aircraft like Restauravia.fr and Gotfriends.com but none of them offer airliners. In essence I think that especially with complex aircraft like airliners, we won't see many freeware versions any more. The increased capabilities of the sim itself as well as the
improvements done by Asobo to the default airliners as well as the free Ini A310 set the bar so high that the amount of time required to develop something like that just for fun is too much for many. The demanding nature of the people often isn't helping. On the other hand even with simple freeware aircraft without working cockpit knobs and levers
there's a lot of positive feedback as long as the plane looks nice (i.e. the F-86 Sabre) and of course there are the payware Franken-Boeings by CaptainSim who are quite popular with a lot of people. So if people are ready to PAY for that, there should be a freeware market as well. Incidentally: yesterday a freeware Boeing 707 was released at
flightsim.to There are tons of free Aircraft and Mods available and there is something for everyone (Airliners, Business Jets, GA Airplanes, Helicopters). And some of them are really very well implemented. Personally, I spend most of my MSFS time in a freeware airplane (DA40 NG with Improvement mod or Asobo Cirrus SR22T) although I have
hundreds of Euros worth of payware in the hangar. A freeware aircraft for FS2020 should be: Can be started from gate/ramp and most of the panel/lights works Can be taxied to runway for take off Actually climbs/descends/turns/engine keeps working Flaps work as intended Airframe can be seen from camera view, model not invisible! I hope my
heroes from FSX days like, Manfred Jahn, Milton Shupe, Tom Gibson to name a few would start creating/converting some aircraft. 1 Like Hi If you bought the plane from Market Place then I suppose you install it through Content Manager or PMDG operations center. PMDG forums might be a place to start. Otherwise there is not other good 737. For
what I understand, topic author prefers to profit from professional developers without spending a dime on their hard work. That is a free choice but my support stops here. Waiting for the PMDG 777 and I will pay for it blindly. Happy 1 Like The author specifically said freeware, so one persons comment has completely misunderstood the original post.
Like MrWoof9575 said, go to flightsim.to The site has everything. It is huge. It is not an illegal operation and there is no free stuff from professionals. It is full of freeware from independent developers which allow free downloads, or if you wish to you can give them a donation. There is also a section for others that wish to sell their work. Home of
Microsoft Flight Simulator Mods & Add-Ons: A reputable community, trusted by half a million creators and virtual pilots all over the world. TrimericOdin622: I apparently bought what I thought I could install on FS2020 through the Market Place, Boeing 737-700 from PMDG, but I guess it looks like I'm needing the base kit first. Oops. This is
incorrect. All PMDG products for MSFS 2020 are stand-alone and will work with all editions. There is no base kit required. I can't tell you how to get it installed because you bought it from the Marketplace for reasons that are well enumerated in various threads.
For PMDG products, you are much better off purchasing from them going forward. Meanwhile, search how to install the PMDG forum. If you can't find an answer, then post for help. 1 Like Very well, thank you sir. I appreciate the information. So an update here, I have tried multiple ways to try
and import new aircraft into FS2020. Here is what I have in my Community folder right now. None of these except for the FedEx Grand Caravan. Inside the Content Manager, some of the aircraft I put into the Community folder show up but am unable to install them. I get no
"INSTALL" button when I click on these. So all this being said, where am I going wrong? All I see in that community folder are liveries. That means not a full airplane, but only paint for exterior or interior possibly. The files that are simply copied into the community folder, after downloading and unzipping a file from FS.to or some other site, will never
have a "install" button within the simulator. This is simply a notification of what has been loaded. But without the actual aircraft these repaints are useless. 1 Like See? That's what I thought...therefore, I've got to purchase a base kit somewhere. (No, I'm not complaining..just making sure I wasn't missing anything.) ...and/or I have to find ones that
are compatible with existing Asobo aircraft that are already apart of the Flight Simulator. I was going simply by your screenshot...and the only reference to PMDG I see there is a repaint for the 737 in the colors of Southwest. How much did you pay for that ?? The 737 aircraft directly from PMDG is somewhere between $40 and $70, depending on the
model. Personally I do not buy anything on the Sim Marketplace, if the same product is available direct from the creator or a reputable retailer. The marketplace quite frankly is an invention for the Xbox crowd as far as I am concerned $4.99...I should've known. Probably a little too good to be true. Not just a little The PMDG aircraft are incredibly
detailed simulations of the real aircraft. They have been for previous simulator versions as well. And all that time and effort to push an addon to the level where it is almost a simulation in itself you simply do not get for 5$. The only exceptions to that are the freeware aircraft by some of this hobbies most talented creators. Manfreds Connie and DC3 or
Milton Shupes aircraft were at least on par with the best payware for the old simulators. And having been part of Team Connie I can tell you first hand just how much effort went into making these machines fly. Page 2 You are correct! With FSX you could find any aircraft for free, example LET 410, Dash 8 (there is a free one, but is garbage, I do not
understand how they offer that aircraft at all) Also the British Aerospace planes, just to name a few. With MSFS2020 they ever took down the Twin Otter, can not be found even with pay ware. Only worth while free aircraft is the FBW and Headwind aircraft, they even downgraded the CJ4 which was better with the Working Title version. I am not for
the scenery, but for the aircraft, which I dont believer Asobo is supporting very well. So I do not think I will be purchasing the 2024, I understand that Xpane is much better with aircraft.
