If you have an Epson printer then you might have seen a red light blinking problem. This is the most common problem which occurs in most of the Epson printers including L380, L385, L385, L485, and many others. The main cause behind this red light means to perform a full checkup and restore it to its original condition. Sometimes the problem also occurs due to jamming of the paper or low ink. But the problem should not last long once the paper is removed from the tray or the ink bottle has been filled. But if still, you are getting the red light blinking error that means you need to reset the printer using the Epson L380 Resetter Tool also called as Epson l380 adjustment program. There are plenty of sites that are available on the internet claiming that they will provide the Epson l380 resetter tool for free. But believe me, most of the sites are scams, and downloading files from them can cause system damage. Officially the Epson l380 adjustment program is only provided to the Epson service center but luckily we have a link with the service center and here I am going to provide you the Epson l380 resetter tool absolutely for free Name of the ApplicationEpson L380 Resetter Tool / Epson L380 WIC Reset KeySize4.27 MBSupported OSWindows 7 and later. PriceFree So lets get started and fix the Epson l380 resetter tool. Always remember each Epson printer has its own resetter program. So always ensure you are downloading the right one. using the Epson 1380 adjustment program is very easy and simple just like other windows software. All you need is to download the resetter program from the below link and follow the steps. Step 1. Download the resetter program from the below link and follow the steps. Step 1. Download the resetter program from the below link and follow the steps. Step 1. Download the resetter program from the below link and follow the steps. Step 2. Disable your PC antivirus so that it will not delete program files. (Note if you have not disabled the antivirus the program files may get corrupted). Step 3. Extract the Epson Resetter Tool.zip file using WinRar. Step 4. Open the extracted folder and double-click on the Run-Me.exe file. Step 5. A new popup window will occur showing the Epson Resetter Tool License ID. Just click on the OK button. Step 6. Once you hit the OK button from the popup, the Epson resetter tool will launch automatically. Now click on the select button to select the Epson printer model as L380 and leave the port as it is. Once done hit the OK button. Step 8. Now click on the Particular adjustment program. Step 9. Select the Waste Ink Pad counterfrom the list and hit the OK button. Step 10. Check the main pad counter checkbox and click on the check button below to perform an ink level check. Step 11. Waitfor some time and you will see the ink pad counter checkbox and click the Initialize button. Step 13. Now click the OK button to start the printer is restart the printer just hit the Ok button to restart the printer is restart the printer just hit the Ok button to start the printer is restart the printer just hit the Ok button. Congrats, your Epson 1380 printer has been successfully reset using the Epson 1380 resetter tool and the red light blinking problem has been fixed. Also, check how to reset Epson l310. There are many types of errors you need to download the Epson l380 resetter tool. The Epson l380 resetter tool will help you to clear all the printer errors still receiving after fixing the problem such as refilling the ink bottle. All you need is to follow the steps carefully to clear the errors.
