AppLock: Fingerprint Mod Apk. You know that you can share many things with your friends, like music, photos and videos. But what if you can't find them when you want to show them to your friends? What if they accidentally end up on your phone? What if they delete something you wanted to keep? As technology advances, it becomes more and more risky. Super S9 Launcher Mod Apk X-Plore File Manager Mod Apk Bitdefender Mobile Security Mod Apk So how can we protect our privacy? How can we protect our important files and documents? The solution is AppLock: Fingerprint Mod Apk. The interface of AppLock: Fingerprint Mod Apk looks simple at first glance, but it is useful to protect your privacy. It has two modes: pattern lock mode and fingerprint lock mode. You can choose any of them according to your preference. After selecting the lock mode, add a new lock item. To add a new item, swipe from left to right. The first thing you need to make sure is that your fingerprint is set up correctly. One mistake can frustrate you and make you stop using your fingerprint altogether. To make sure you're getting it right, here's how: First, swipe from the bottom of the screen to the center where the home button is located. The strokes should be done in one smooth motion with no pauses between strokes. AppLock: Fingerprint Mod Apk is one of the best app locker for Android devices. It is used to protect your confidential and personal information from others. With this app locker you can hide your gallery, videos, photos, documents, contacts or any app of your choice. AppLock: Fingerprint Mod also lets you block incoming calls and messages, so you can rest assured that your privacy is always protected. Nobody can see your gallery without entering your password every time they want to see it. AppLock: Fingerprint Apk is a perfect solution for those who want to protect their private data and still use their phoneIt works like clockwork. The only downside is that many people may not understand how it works and may give up without even trying. Features Fingerprint unlock Floating widget showing recent apps Hide apps or lock system settings, dialer, contacts or any app of your choice. Simple lock screen with password, pattern, PIN, fingerprint unlock (on supported devices) or gestures. Custom themes. Ability to hide the notification icon in the status bar. Hide images, videos, and audio files in the Photos & Videos app. MOD features Fingerprint to unlock screen Password/PIN to lock apps Lock apps with password, pattern or gesture Autostart manager (prevent apps from auto-launching) Manage notifications for apps (allow or block notifications for apps) Monitor status panel (hide icons in status bar) Hide apps (Hide apps from launcher) Remove protection (Prevent others from uninstalling apps) Backup/Restore settings. Download the AppLock: Fingerprint Mod Apk file to your computer by clicking the green button above! Confirm installation from "Unknown Sources". Install the APK file on your Android device. Open the app and enjoy it! I've been using this app for a while and I love it. It has protected my phone from various threats. Thanks to the fingerprint lock function, I can easily access the apps I need without worrying about others doing it. This is one of the best apps you can have on your device if you are looking for a great app blocking system. The only problem with this app is that it is paid. However, you can get it for free by using AppLock: Fingerprint App Hack which is freely available online. FAQ Q. Q: Fingerprint not working? A: Please make sure you enable fingerprint in settings first, then try again! (Some devices may require you to tap the fingerprint reader several times before it activates.) Q: I want to block other users' apps on my phone, but I don't want them to use other applications? Oh, ok! You can lock any app (including system settings) but they will still have access to your apps! Q. Q. Can't find the AppLock icon on the home screen after installation? A. Try searching for "AppLock" in the app drawer or go to app settings and make sure App Lock is turned on! If it still doesn't appear, try restarting your device or uninstalling/reinstalling the app.Q.
