Credit: Mollie Johanson Before learning the chain stitch, learn the slip knot, which is what you need to do to secure the yarn on the hook to begin crochet projects begin with the chain stitch as a grouping, typically referred to as a starting chain, base chain, or
foundation chain. A turning chain often starts each new row in a crochet project. The height of the turning chain, which is the number of chains you create, depends on the stitches in a crochet pattern, particularly when working
in the round. For example, throughout the classic crochet granny square motif, a "ch 2" separates double crochet stitches to create a space in each corner of the square. The picot stitch is a common crochet edging that incorporates a crochet chain to create a texture. Openwork lace or mesh, long fringe, and big loops all use crochet chains as a core
feature of their design. Experiment with a simple project using a basic crochet chain. Crochet a set of long chains, knot them together at both ends, and make your first simple crochet stitches that new crocheters

crocheting for beginners is that you don't need a lot of supplies to get started. And as you practice the basic crochet stitches, the main things you need are yarn and a crochet hook. If you've been in a yarn store or craft store lately, you know that there are lots of options when it comes to yarn. The best yarn choices for beginning crochet are going to
be yarns that are smooth, something that isn't too fuzzy or otherwise textured which will make it hard to form the crochet stitches or see your stitches. You'll also want to pick something that's light in color, which also makes it easier to see your stitches.
There are also lots of options when it comes to crochet hooks. If you want to buy one or a couple to try out as you are learning to crochet, you'll want to choose hooks of the correct size for working with the yarn you chose. Hook sizes can be given in metric measurements or with a letter/number designation widely used in the United States. Crochet

hook. Before we get into how to crochet the basic stitches, let's dive into some general questions you might have about crochet, treble crochet, they are
produced in similar ways but make different sizes of stitches, with single crochet being the shortest and treble (also sometimes called triple crochet stitches and can be used to add space to a pattern. The slip stitch is a way to join stitches or move your
working yarn to another point in the project without adding height. There are hundreds of different crochet stitches out there, though the good news is they are mostly built on the same basic skills you will learn in these crochet stitches for beginners. If you're interested in going deeper into different crochet stitches, our Ultimate Crochet Stitch
Library includes 45 crochet stitches to learn, but there are many more out there! In general, the faster it is to make will be the ones you are the most comfortable with. The taller the stitch the faster it is to make will be the ones you are the most comfortable with.
one of the same size worked in single crochet, because each row is so much taller. Then again if you are more comfortable stitching single crochet you will still be able to crochet or just picking up a new-to-you stitch.
there are some things that will help you to be more successful. Now that we've covered the basics of what you need to know before you get started crocheting, here's a little more specific information that will make beginning crochet easier for you. In addition to the suggestions above that you choose a yarn that is light in color and smooth when you
are practicing crochet stitches, you'll also want to pay attention to the weight of the yarn and is usually denoted on the ball band (that piece of paper wrapped around the yarn) in words and with a number designation. Medium weight is a 4. It's not too thick and not too thin. You might also see the term
"worsted weight" on the ball band. This is an ideal choice when it comes to learning to crochet. If you are working with medium-weight yarn, the right hook size for you will be 5.5-6.5 mm, or a US size I/9 to K/10.5. If you want to try both inline and tapered crochet hooks, you can buy one of each in different sizes within this range. Otherwise, try an
inline hook that's a size J/10 or 6 mm. Crochet is usually worked with the crocheter holding the hook in their right hand you can find left. If you are strongly left thanded crochet tutorials, or watch right hand want to work with the crocheters hold their
crochet hook like they would hold a knife. If there's a flat place on the shaft, as if you were holding a knife. The other 3 fingers wrap around the back of the crochet hook and support it as you form the stitches. The other popular option is
the pencil hold. The thumb goes in the same place, but the index finger is more to the back of the shaft, resting on the other fingers don't do much of anything. To try this hold out just grab the crochet hook as if it were a pencil. You might want to try both
holds and see which is more comfortable for you. The yarn is held in the left hand and usually wrapped around or through the fingers to help keep the yarn under control. Every crocheter has their own way of holding the yarn. As you observe other people crocheting or watch crochet videos you can see how other people do it and refine your hold. At
the very least the working yarn should loop over your index finger and run down the palm side of your hand as you stitch. As you learn different crochet stitches are. Tension is a function of how you hold your yarn and how tightly you pull as
you form the stitches. Some people naturally crochet more tightly than others, but the key when learning to crochet is to try to make sure your stitches are even across the row and from row to row. too tightly as you work. If the bottom of your practice swatch (or projects) curls up, that's a good sign that your tension is too tight. An easy fix is to try working with a larger crochet stitches is to make a slip knot.
This is the foundation for the chain stitch that will be the beginning of your project. To make a slip knot, start with the tail end of the yarn over the tail end of the yarn and pull it through the loop.
Gently pull on the ball end of the yarn to close up the knot until there is a loop that can comfortably fit on your crochet hook. The yarn over is an essential skill in crochet, which you will use for everything from making your crochet hook. hook and pull it through the chain or stitch that you are working with. The yarn comes over the hook from back to front as opposed to the yarn coming under the hook from front to back. Doing your yarn overs this way makes your stitches a little looser and easier to work. These crochet stitch tutorials will walk you through all the basic crochet
stitches you need to get started. If you want more step-by-step crochet tutorials and a lot more stitches to try, check out our Ultimate Crochet projects is a chain stitch, often abbreviated ch in patterns. The pattern might say something like ch
12, which means you need to chain 12 stitches. To do that, take the yarn over the hook but not so much that it easily falls off the hook. The slip knot does not count as a stitch. As you practice making chains you will get a feel for
how loose to make the chains. A tight chain can also cause your work to curl, so if you have that problem you might want to try making chains? You can make a whole necklace using just chain stitch! Single crochet is one of the most basic crochet stitches out
there, and it's really easy to learn. One thing you need to know when you are starting to crochet is that different heights and you need to account for that as you begin each row, known as turning chains. You will need more chains at the end of the row the taller
your stitch is. For single crochet you need just one chain. When you start the single crochet stitch in a chain, you will begin working on the second chain from the hook. Yarn over and pull through both loops to complete the
stitch. Repeat this technique across the row. Chain 1 at the end to make your turning chain. Now that you will be working into stitches by slipping the hook under both loops of the top of the stitch, unless another method is specified in the pattern you are working. You already know everything you

something fast, easy, and pretty that doesn't use a huge amount of yarn. Waffle stitch crochet is perfect for a warm, chunky blanket with some texture to a blanket without being any more difficult than regular double crochet. Puff stitch
and bobbles might not be the best crochet stitches for blankets because they use a lot of yarn, but they are fun to add as an embellishment such as doing stripes of puff stitch or spelling out words in bobbles. Of course if your plan is to use a lot of yarn, star stitch is a fun choice! To design your own blanket, stitch a little square of the stitch you want
to use for your crocheted blanket. Measure out how many stitches you are getting per inch/2.5 centimeters. Decide how wide you want your blanket to be, then multiply by your stitch count per inch to determine how many stitches you want. For example if you're making a 36 inch baby blanket and you're getting 4
stitches per inch in the crochet stitch you want to use, you would need 144 stitches to get 36 inches. Of course you an idea of where to start. Speaking of baby blankets, our Log Cabin Baby Blanket workshop shows you a fun technique for

Double treble crochet is extremely loose and airy. The double treble crochet stitch also known as the triple treble crochet stitch also known as the triple treble and is frequently used in lace patterns or to create a more open and airy texture. The crochet slip stitch does not create a fabric on its own but is
used to move your yarn to another part of the project. For example, when making an armhole. Crochet slip stitches are also used for joining granny squares. Once you are confident with those basic stitches for beginners, you can start doing various thingsearch technique or joining granny squares.
with those different crochet stitches to create more advanced textures and patterns. These are more than a few complex crochet stitch patterns; the possibilities are virtually endless. You can improve your skills by learning and incorporating these into your projects. These are intermediate to advanced. The crochet stitch is a popular stitch that
produces a scalloped or shell-like pattern. It is made by working several (usually double or treble crochets) into the same place or space. The number of stitches in each shell can be changed to achieve different effects. The crochet V stitch is a popular and useful stitch that makes a pattern that is open and lacy. It is made up of several stitches that are
put into the same space to make a V-shaped pattern. This is often used to make shawls, scarves, blankets, and other things that should feel light and airy. Popcorn stitch is a fun and lively stitch that adds texture to your crochet items. It is made by making multiple incomplete crochet stitches in the same place and then connecting them to make a
"popcorn" or raised cluster. This is frequently used to produce 3D effects or as a pattern accent. The crochet fabric. These crochet stitches can be worked as a square mesh or a diamond mesh pattern. Use mesh for stretchy grocery bags and lightweight tops. The
cable crochet stitch is similar to classic knitting cables and may also be done in crochet. Crossing stitches over one other to produce a raised and interlocking design is the approach. To achieve a twisting look, crochet cables are worked by skipping and working into previous rows. The bobble crochet stitch is similar to the popcorn, but instead of
linking unfinished stitches, you work numerous together in the same place and then close them to create a rounded bobble look. It gives your crafts. It entails making a cluster of loops in the same stitch and then connecting them. This can be done at various
heights, such as a single crochet puff. Star stitch produces a distinct, star-shaped texture. It is also known as a spiked cluster or a daisy. It is made by inserting your hook multiple times into the previous row, which then pulls up into a star. The star is often used as a focal point in patterns. The spike stitch crochet can be used
to create lengthy spikes that give your fabric an individual look by inserting your hook into lower rounds or rows and making stitches that stand out from the surface. These types of crochet stitches work especially well with different colored yarns. Cluster stitch is a popular technique for creating a group that are worked together. This provides a
dense, textured fabric frequently used in crochet projects to create patterns and designs. This is the basis of granny stripes. Tapestry stitch is a way of adding color, designs, and crochet projects to create patterns and designs. This is the basis of granny stripes. Tapestry stitch is a way of adding color, designs, and crochet projects to create patterns to otherwise plain items. You will use a single crochet, with the yarn is carried underneath the row until it is needed to be used
again. Crochet wave stitch creates a pattern that looks like rolling waves. It is created by crocheting stitches of different heights right next to each other. It makes beautiful blankets as it is still quite dense and is a great use of color. Chevron stitch creates a zig-zag pattern. You can crochet this with any basic crochet stitches with increasing
and decreasing to get the pattern. This sample uses single crochet to form a dense fabric. variety of options for those looking to create distinctive textures and patterns. Many more textural types of crochet stitches involve working with front posts or back posts. These skills are slightly more advanced but are explained step by step in our tutorials. They involve inserting your crochet hook in different directions into different spaces of your
previous rows. The alpine stitch creates a three-dimensional design with alternating peaks and valleys, giving your crochet creations a lovely texture. A precise sequence of basic crochet stitches forms the pattern, including single, double, and front post double crochet. It's an easy and satisfying one to work. Crochet ribbing creates a rib-like
appearance which is similar to a knitted rib. To make it, you need to work front post double crochets (FPDC) or front post treble crochets (FPTRC) across the stitches of the preceding row to make a raised rib. This provides a raised rib. This provides a
raised, square design that resembles the texture of a waffle. It is made by working a specific pattern of front post double crochets (FPDC) and double croch
than the squares of waffle. It also involves post-stitches. This one is best for intermediate or advanced crochet seed stitch gives the fabric a pebbled feel. It is a little easier than the others in this category, as it does not need any post-stitches! It is accomplished by alternating single and double
crochet across the row. This pattern is used for adding subtle texture to blankets, scarves, and accessories. The crochet herringbone stitch does not require post stitches either, but rather inserting your hook into different places in the previous row. It is best made with thicker yarns for the herringbone pattern to show up nicely. Crochet moss stitch
(also known as linen or granite) is a basic stitch pattern that produces a textured fabric. Moss and seed are often mixed up. The seed stitch looks like single knits layered on top of single purls, while the moss resembles two rows of ribbing shifted across by one. The picot crochet stitch is most often used on edgings and borders and is very simple to
work. The stitch can be varied to produce peaks of different lengths. This can also be used in crocodile or an alligator. It is sometimes known as scale or dragon. These crochet stitches are best for intermediate or advanced crocheters. Crochet
berry stitch is a highly textured stitch that produces a warm, dense fabric suitable for dishcloths, blankets, and other crochet projects where you will
see both sides. Block stitch is an easy 2 repeat pattern using single crochet and double crochet and double crochet stitch is a beautiful textured stitch for beginners and the version pictured just uses single crochet stitches
and a spike stitch. Millstone stitch creates a brick-and-mortar-like crochet stitch pattern. It uses several stitches, including single crochets and the spike. This is an attractive blanket stitch that you can make in 2 colors or more. The Larksfoot stitch is a crochet technique known for its textured, striped pattern that resembles the tracks of a bird's foot.
Because this stitch creates a distinctive design that stands out in crochet projects, it's often used in blankets, scarves, and other items where a visually interesting and textured pattern is desired. Sedge Stitch is an attractive repeat pattern that uses single, half-double, and double crochet. It is really easy for crocheters of all levels and makes textured
baby blankets and scarves due to its reversible nature. Grit stitch is an extremely easy one-row repeat pattern that you crochet using just single and double crochet pattern ideal for washcloths and baby blankets. Granny ripple stitch is a 3dc cluster that forms a chevron pattern. This large-scale crochet pattern
is perfect for blankets and larger projects. Moreover, it is an attractive alternative to the regular granny stripe. The Suzette stitch is a wonderful and easy textured stitch that is suitable for dishcloths, washcloths, washcloths, and scarves. It uses single crochets and double crochets in an interlocking design. Use the crochet peacock stitch to create attractive fan
shapes separated by vertical columns of treble crochet stitches. As a result, this crochet stitch type is often used for lacy items such as wraps. Crochet braided stitch uses the extended half double crochet stitches to produce look similar to that achieved with knitting. Therefore it is popular for blankets and scarves. The feather and fan stitch
makes beautiful lacy scarves and blankets. It is usually crocheted in lighter yarns such as DK or sport weight. This is an intermediate stitch, ideal for using several colors of yarn. It is best to crochet it in thinner yarns such as fingering, DK or worsted. The
