In the US, Castrol is a top choice for motorists who change their own oil. Our metal working and machining fluids are critical to the production of components for the automotive and aerospace industries. Our production fluids are at the forefront of oil exploration and production in the waters of the Gulf of America, and our specialist greases and lubricants have played key roles in space exploration for decades. Lower-carbon footprint lubricantsCastrol MoreCircular for Business, launched in May 2024, is a program designed to reduce the carbon footprint of lubricants. Used oil is collected from business-to-business customers like fleet maintenance shops, automotive workshops or industrial manufacturing sites by our partner Safety-Kleen, then re-refined and integrated into premium lubricants for supply to businesses. The Castrol MoreCircular offer combines Castrols cutting-edge lubricant technology with Safety-Kleens wide geographic reach and expertise in collecting and re-refining used oil. \*These lubricants achieve a lower carbon footprint by using re-refined base oils in place of some or all of the virgin base oils traditionally present in Castrol lubricants, resulting in lower cradle to gate production emissions. On the court and on the trackIn October 2024, Castrol was named the Official Motor Oil Partner of both the NBA and WNBA. The multiyear agreement makes Castrol the official entitlement partner of NBA Rising Stars, which takes place annually at NBA All-Star Weekend.Your vehicle needs a reliable engine oil to effectively lubricate the parts and prevent wear and tear. Castrol oil protects your vehicle against wear and ensures that you're able to have a smooth driving experience. If you're noticing a change in your engine performance or sound, you need to change your engine oil. For a quick way to get the right oil, simply visit AutoZone. Transmission fluid, and other fluids are also available at reasonable prices.When vehicles move at high speeds, it's natural for parts to get worn down due to friction. Castrol Engine Oil protects your parts by creating a smooth lubricating layer between the parts to decrease friction. Castrol also includes a self-healing layer that automatically readjusts to heal the damage caused by metal-to-metal contact. The unique fluid composition physically changes the way oil interacts and significantly improves vehicle performance.What Does Castrol Do to Your Engine?Castrol motor oils are designed to fulfill the demands of modern engines. The improved formula prevents friction from damaging parts and improves the performance of the vehicle by creating a high-strength film over the internal parts. The result is in the form of minimal friction and high performance for months.When you're looking for reliable engine oils and other items like layout fluid, AutoZone is the perfect destination to find your required products. You can find parts for your vehicle using the year, make, model, and engine size filters and get the parts conveniently with fast Same-Day In-Store Pickup options.
