Overall Length: 37.5" Weight: 5.5 lbs. The serial numbers are now sequential.There are other ways to identify the year a model 60 was made based on the features.If you have the older style scooped charging handle, your gun was made before 2005Conversely if you have the newer style "spindle" charging handle, your rifle was made in 2005 or laterIf your rifle has a factory 19" long barrel, it was made after 1999If your magazine holds 15 rounds and is shorter than the barrel (see picture below) your rifle was made between 1989 and 1999If your barrel is 22" long and the magazine is full length, your gun was made before 1989.If your gun has the Glenfield name, your gun was made before 1983If your gun has the last shot hold open/bolt release lever (just ahead of the trigger guard in the picture below), it was made in 1984 or afterIf your gun has a checkered stock, is not a deluxe model, and it came from the factory that way, it was probably made before 1983If your gun has two rear trigger guard screws your gun was made in 1981 or earlierIf your gun has an aluminum trigger guard it was made before 1977 (see picture above)If your gun has the front sight and magazine band combined in one unit, your gun was made before 1975If your rifle has no serial numbers, it was made before 1968If your model 60 has no serial numbers and no barrel date code it was made in 1960 or 1961.That should narrow it down for you. Turns out, locating this information is a bit of a scavenger hunt, but the clues are out there. Key Elements of Serial Number Decoding For many Model 60 rifles, the first two digits of the serial number often correspond to the year of manufacture. Serial numbers are generated sequentially, but the range of serial numbers associated with a specific year can overlap with other years. Barrel: 19" with Micro-Groove® rifling (16 grooves), C = Mar. A: If you cannot find any information through the serial number, other details can aid you. While the process might require patience and research, the results are worth the effort. Sights: Different sight types were used during different periods - for example, the transition from fixed sights to adjustable sights. The first letter of the date code is as follows: A = Jan. Serial number 980122 was made in 2002 (2100 - 98 = 2002)Then in 2010 they began using the MM prefix for standard models and the DLX/DL prefix for the deluxe models. This date code was usually stamped on the left side of the barrel just in front of the receiver. It was mostly the inexpensive guns like 22s and shotguns that didn't get the serial number. The date code is located just ahead of the receiver on the left side of the rifle. Look for any markings mentioned above - barrel date codes, stock stampings, or receiver markings. The Model 60 is well-suited for small-game hunting and vermin control, as well as for serious and low-cost target practice while preparing for hunting with larger rifles. A: The value of your vintage Model 60 is largely determined by its condition, rarity, and any unique features. When the Marlin model 60 was introduced in 1960, there was no law requiring manufacturers to put serial numbers on their guns. FAQ Q: If I don't know the year, does that affect my vintage Model 60's value? It has a 19" Micro-Groove® rifled barrel, cross-bolt safety, manual bolt hold-open and a patented automatic "last-shot" bolt hold-open. Understanding Serial Number Systems Marlin Firearms has employed various serial number systems throughout its history. J = Oct. It's typically a mix of letters and numbers. So a gun with serial number 210566 was made in 1979 (100 - 21 = 79).When they got to the year 2000, they used two zeros eg: 0056772.Beginning in 2001 the first two digits were now subtracted from 2100. Leveraging Online Resources While no definitive database exists, you can use various online resources to help you in your quest. Twist Rate: 1:16" r.l.h. Sights: Adjustable open rear, ramp front sight. Remember, patience is key. L = Dec. Image: downfil723.weebly.com Other Identifying Features Beyond the serial number, other subtle clues can help date your Model 60. History of the Marlin Model 60 An economically priced rifle that earned the title of "most popular 22 in the world." Since it was introduced in 1960, it has continuously represented one of America's finest rimfire values. Unfortunately, for earlier models like the Marlin Model 60, a comprehensive and publicly available database of serial numbers and production years does not exist. These can include: Barrel stampings: The barrel might contain a date code or markings that indicate the manufacturing year. While knowing the exact year is helpful for historical context, it might not dramatically impact the value unless a year has a significant historical event tied to it. Of course some of the changes mentioned above may have happened mid-year or there may be some rifles made after a certain change that left the factory with the older parts as they used them up. The serial number is usually located on the right side of the receiver, just below the chamber. Expert Tips for Dating Your Marlin Model 60 Here are some tips to get you started, from my experience. The Quest for Year of Manufacture: Unraveling the Mystery One of the primary resources for determining your Model 60's year of manufacture is the serial number itself. Document Everything: Carefully note down all markings, including serial numbers, barrel stampings, stock markings, and receiver details. Are you interested in learning more about dating your Marlin Model 60? Consult with a Specialist: If you're still unsure about the age of your rifle, consider consulting a qualified gunsmith or an expert in Marlin firearms. You'll gain a deeper understanding of your rifle, appreciating the craftsmanship and the legacy that it carries. That all changed in 1968 with the passage of the '68 Gun Control Act.Marlin did not serialize the model 60 until 1968, so if yours is older than that, you can check the date code on the barrel. Understand the subtle differences in features and markings that can pinpoint the production period of your rifle. The relatively large ammunition capacity is adequate for casual recreational target shooting ("plinking"), plus the low price and ease of handling makes it well-suited as a first rifle by young hunters just learning to use a semi-automatic rifle. Receiver markings: The receiver might be marked with information like the model, caliber, or patent numbers that can provide clues about its production year. However, this is not always accurate, and you should use it as a starting point and corroborate with additional information. This period is often considered a time when materials and craftsmanship were of higher quality, and that tends to translate into a higher value for those older rifles. The tubular magazine holds up to 14 Long Rifle rounds since the late-1980s, the capacity of the rifle was reduced to a 15 round maximum limit, to meet NJ's firearms law for semi-automatic assault weapons. Number built: over 11 million, 1960 - present Variants: 60, 60C, 60DL, 60S-CF, 60SB, 60SS, 60SSK, 60SSBL, 600 Marlin Model 60 Serial Numbers Marlin year of manufacture maybe determined from the following list of letter/numeral prefixes to the serial number; this coding only applies to serialized rifles: 1946-C 1947-D 1948-E 1949-F 1950-G 1951-H 1952-J 1953-K 1954-L 1955-M 1956-N 1957-P 1958-R 1959-S 1960 (August)-1961-U 1961 (August)-1962-V 1963-W 1964-Y, -Z 1965-AA 1966-AB 1967-AC 1968-AD, -68 1969-69 1970-70 1971-71 1972-72 Starting in 1973, the year of manufacture maybe determined by subtracting the first two digits of the serial number from 100: For Marlin Rimfire Rifles [non-serialized, Pre 1968]: From 1962 thru 1968 most Marlins rimfire rifles used a two letter date code that was stamped on the barrel. Pinpointing the exact year of manufacture for a Marlin Model 60 can be a complex process. Use at own risk.) This might require reading articles, watching videos, and comparing your rifle to others. I = Sep. It explains that Marlin did not add serial numbers until 1968 and provid...Al-enhanced title and descriptionDownload as docx, pdf, or txt Read: Sleep Pattern Disturbed - A Nursing Care Plan for Restful NightsQ: My serial number doesn't fit any known pattern. The first letter of the date code represented the month of manufacture while the second letter indicated the year. Remember, these are not foolproof databases, but they can provide valuable insights that help you narrow down your rifle's age. So a gun with serial number 703778 was made in 1970.Then in 1973 they changed the first two digits to be subtracted from 100 indicated the year of manufacture. There is a common misconception that the serial number directly corresponds to the year of manufacture, but this is not always accurate. Q: I'm not sure if my Model 60 is actually "vintage." How can I tell? For a few years in the mid-1980s the Model 60 rifles had both the "last shot hold open" feature and also held 18 rounds in the tube magazine. This forum is often the best place to reach out for help in pinpointing your rifle's year of manufacture." Additionally, websites like the Blue Book of Gun Values and Gun Digest often contain information on specific model variations and production periods, sometimes even including serial number ranges. While a thorough database is not available, some valuable information can still be gleaned from these serial numbers. Stock markings: The stock might have markings or a date code that reveals its age. However, a combination of resources and a bit of detective work can help us get closer to the truth. Image: truerup722.weebly.com This journey sparked a desire to share my findings with other owners who might be curious about the age of their own Marlin Model 60 rifles. While these systems have evolved over the years, the general principle remains consistent: the serial number is a unique identifier that can help you pinpoint the rifle's year of manufacture. A: The term "vintage" applies generally to Model 60s produced before 1980, but it's not an exact science. B = Feb. For instance, a serial number starting with "64" might indicate a 1964 production year. This only applies to guns made between 1962 and 1968, if you have no serial number and no date code, you gun was made in 1960 or 61.Of course all of these methods assume the parts on the gun are original.The first letter of the barrel date code indicates the month, see the chart below: A = JanB = FebC = MarchD = AprilE = Mayetc..The second letter indicates the year, again they didn't use this system until 1962 F = 1962G = 1963H = 1964I = 1965J = 1966K = 1967So if your barrel code is HH your gun was made in August of 1964Starting in 1968 Marlin used the first two digits of the serial number to indicate the year the gun was made. Many did anyway, for record keeping and warranty repairs. E = May F = June G = July H = Aug.
