Creating a Jeopardy Game on Google Slides is an Easy Guide to Interactive Quizzes ###ENDARTICLETo create an interactive Jeopardy game in Google Slides, start by adding a new slide for each category and point value. Include four buttons with rounded rectangles and fill colors to match your desired look. Adjust the font size as needed and add drop shadows to give it a button-like appearance. Each button should contain a point value, so type numbers like 10, 20, or 30, and adjust the font size if necessary. Create three answer choices by adding rounded rectangles with different colors and fill colors using Format Options → Drop Shadow. Add text boxes next to each button to display the answer choices A, B, and C. This step helps to make your slide look more polished and engaging. You can add images or illustrations from other slides in the template for an extra touch of creativity. To complete this section, include three icons: a Home icon that links back to the game board, a Right arrow icon that moves you to the next slide, and a Book icon that takes you back to your category slide. Once you've completed all these steps, connect everything using hyperlinks to make your game work seamlessly. Link the game board to each category slide by clicking on it and selecting Insert → Link → Slides in this presentation. Then, link the category slide to question slides by linking point value buttons. Finally, create hyperlinks for easy navigation between slides. Link the Home icon on the clue and question slides, the Right arrow icon to the next slide, and the Book icon back to your category slide.To design a Jeopardy game in Google Slides, you can start by creating a blank template and adding a professional touch with premade themes. Choose categories relevant to your theme and create questions at different difficulty levels, incorporating multiple question types and multimedia elements. Insert a table for the game board, add categories, points, and links to question slides. Create separate slides for each question, including the category, point value, and question itself, as well as corresponding answer slides with correct answers and additional information. To create engaging educational content and boost engagement, consider using interactive tools like jeopardy games for Google Slides. Here's how you can do it: 1. Go to your Google Slides account and select a blank presentation. 2. Click on the "Slide" tab, go to the "New slide" option, and create a game board slide with text boxes. 3. Duplicate the cells to create four columns for scoring and add more text boxes as required. Once you have created the main question-and-answer layout of your Jeopardy game, follow these steps: - Press Ctrl + M to create another layout and rename it accordingly. - Use callouts or shapes to create a visually appealing design. Next, add more content to make your game interesting. Start by creating separate slides for questions and answers. Add text boxes with question titles in the title slide placeholder, body placeholders with questions, and answer boxes for correct responses. Finally, go through each point on your Jeopardy board presentation slide and link them using the "Link" icon from the toolbar section to the specific question slide. To save time creating presentations, pay the low one-time Simple Slides fee and access our catalog of over 10,000 templates. Enjoy watching our YouTube tutorials on Simple Slides and Google Slides. Get started so that your audience can enjoy a fun Jeopardy game today! You can convert PowerPoint files and bring them into Google Slides without recreating your presentation. This is done during import. You can also add PowerPoint templates to Google Drive and edit them directly. To create a PowerPoint presentation with Google Slides, you need to export a PPTX file from Google Slides. Using Google Slides to Create Interactive Quizzes and Games: A Retro Twist on Classic Jeopardy Looking forward to tryin this out with my audience at the next meeting tomorrow and discussin our strategies for creatin interactive quizzes and games with Google Slides. Many years ago, we were creatin interactive Jeopardy games in PowerPoint. So, I decided to go a little retro and recreate the Jeopardy game in Google Slides. The key to making a Jeopardy game is to use the "Link" tool in Google Slides. Normally, a slideshow is designed to be viewed sequentially, one slide followed by the next in order. However, Google Slides allows you to put links in slides that can link to any other slide in the presentation, regardless of order. By using links to other slides, a presentation can be created that is non-linear, where the user can choose which slides to view. Using this technique, I created two Jeopardy Game Templates. One has five categories and the other has six categories. In each template, all the items are already hyperlinked, so all you have to do is make a copy of the slideshow and then add your questions, answers, and topic descriptions. The only drawback is that the category links do not change color after you click on them. Currently, Google Slides does not have an option to indicate a link has already been clicked on, but hopefully they will add that option in the future. You can open the jeopardy Game Templates with the links below. Note: The templates are view only, so you will have to make your own copy to be able to edit them. Simply click "File" then "Make a copy." Jeopardy Game - 5-topic Template - View Template - Copy Template Jeopardy Game - 6-topic Template - View Template - Copy Template As an example of a completed Jeopardy game created from these templates, below is a link to a Math Terms game. Sample Jeopardy Game - Math Terms - Google Slides link If you would like to create your own interactive slideshows, detailed directions can be found below in my recorded webinar training and in my help guide and slideshow linked below. Slideshow - "Google Slides for Stories, Quizzes, and Games" - Google Slides link Help guide - "Creating Interactive Google Presentations" - Google Document link Training video - "Google Slides for Stories, Quizzes, and Games" - YouTube link If you create your own Jeopardy games with these templates, feel free to share them with me at ericcurts@gmail.com or put links in the comments below, and I will be glad to add them to my list of examples. And finally, the obligatory disclaimer: "These slideshow templates are for educational use only and are not affiliated with Jeopardy! or Sony Pictures Digital Inc. Jeopardy! is a registered trademark of Jeopardy Productions, Inc. 2005 Jeopardy Productions, Inc. All rights reserved."
