Here are some notes on the music: The repeated pattern in the right hand should be softer than whatever the left and is doing. This isn't necessarily the melody. When you start a section with intervals in the left hand, you can get slightly louder when the intervals go up, and then softer when they go back down. Measure 21 is a climax, so don't hesitate to get bold and loud in the right hand there. As you approach the end, make sure to get softer and slow down, just like bells fading out into the distance.
