Rhcsa test questions

This repository contains separate practice questions/scenarios designed to help you prepare for the RHCSA exam (version 7) by gathering them from various online sources. Each question is in its own file, allowing for easy daily studying and flexibility in learning pace. Having a Virtual Private Server (VPS) set up on the internet allows you to experiment with Linux without risking damage to your main operating system, making it perfect for new users who want to try things out. This flexibility is especially useful since your VPS can be accessed from any device connected to the web, letting you practice Linux commands anywhere and at any time. When picking a Linux distro, consider popular options like AlmaLinux or Ubuntu as they're widely used, come with detailed guides, and have user-friendly tools that make them great for beginners. Even the minimum specs will do for learning purposes. You can also get free training to help you master the command line here: Mastering the Linux Command Line: Your Complete Free Linux Training Guide
