Here you got its working hurry up guys. Click Here For More Premium Apps New Premium Pro Games For Gamers Pokemon Magikarp Jump is a free download Pokemon game developed and released by Select Image. It was launched in May of this year for iOS and Android devices. This fun Pokemon app allows players train their favorite Pokemon for competition in various competitions happening across the globe. One of the best features of the game is that you don't have to purchase anything to play the game. You can simply download the Pokemon app and log into the game. The app has several features that make the game experience more exciting. Features such as the leaderboards challenge meters and status indicators are available with a one time fee. The feature will unlock certain features for free and other features for one price. This makes the game more lucrative and enjoyable. Pokemon Magikarp Jump apk download latest version 2021 There are four major regions in the game, which are the Cinnabar Island, Cerulean Beach, Poni Island, and the Driftwood Forest. The different caves in the region each have a specific Pokemon boss. One new feature in the game is the optional dungeons. These dungeons are available after you have completed the game and allow you to gain access to new areas and bosses. The best part of the game is the ability to transfer your save data from one platform to another. This allows you to continue where you left off in the main story without having to start all over again on the other platform. The in-game menu lets you do this easily. If you need to make changes, the options available in the Settings menu let you do so in real-time. One feature missing in the game is the ability to see the current progress of your friends. This can be done by sending them an email. You can also see the same in the in-game menu. The system is still in the testing phase at this time. As soon as it is available, however, it will add a whole new dimension to the way the game is played. One of the most anticipated and popular features is the ability to trade and collaborate with friends. This is probably the one feature that excites the most players the most. You can trade Pokemon, you no longer have or ones that you already own. You can send them messages and meet them in-game. When you do, you instantly add them to your friend's list. This increases your chances of getting items from these people. The last feature we are going to mention is the latest update. It is called the Diamond update and was released just recently. This update improves upon the original Diamond game in several ways. This update adds a whole new region called the Plasma Islands, gives every player a new gym, and adds new legendary Pokemon and Kalos fay. This one update changes the game completely and may be the reason for the great popularity of the Magikarp Jump. Download Pokemon Magikarp Jump apk unlocked There are many other things that have been changed or added to this popular online game. For example, the ability to use more than one save file at any given time is one of the biggest changes. Also, trainers can now purchase the creatures they are looking for from several different stores. It is always important to keep up with the latest versions of games such as Pokemon Diamond and the Pokemon Magikarp Jump. There are many sites that offer these games for free, but many times the versions available are outdated or not very good. Fortunately, many people are looking for a great online community. These sites allow players to discuss their games and share tips, secrets, and help one another. One of the best aspects of this online game is the ability to play it for free. This is a big attraction for many people who enjoy this type of game. The best part is that the game is constantly being updated. That means that you will never be stuck with a game that does not have the latest features. New Update 2021 The game is available for download from a number of different websites. You can choose the best ones for your needs and start playing immediately. Many people play the game multiple times because they find it to be very addicting. No matter which version of the Magikarp Jump you prefer, you can be sure that it is a very fun game. This online game offers you a challenging experience. Pokemon Go was massive and people expected Nintendo to bring us something even better as a followup. Instead the gave us a game that centers entirely on the most boring Pokemon ever conceived. Never in the history of Game Boy has anyone ever said `Yeah,I just caught a Magikarp! Even the PokeDex doesn't get excited. The guys at Nintendo aren't completely stupid. They know the Magikarp is all but useless so the whole game has a light feel to it, like an April Fools Joke that everybody is in on. Gameplay Pokemon: Magikarp Jump starts out in Hoppy Town, the only town in all of existence that truly loves Magikarp. To the people of this town Magikarp is too valuable to risk in battle so instead they raise their favorite Pokemon and compete them in jumping leagues. That's right, these crazy people raise fish just to see how high they can jump. You'll start by fishing your own Magikarp out of the local river then start training its Jump Power (JP). Training is hard work so your Magikarp will instead spend all of its time swimming around the pond and eating a few berries. Keep in mind that Magikarp aren't the smartest bait in the barrel so you'll have to direct it on how to eat as well. ALSO CHECK: Taxi Game 2 for PC (Free Download)Eating regularly keeps your Magikarp strong and increases its Jump Power. Once its energy levels are up you can take it for special training sessions outside of the pond but only if you have training points to spend. The special training sessions are basically just quick-time events where you have to tap the screen at just the right time to make Magikarp tackle a sandbag or jump through a hoop. Training sessions give you a lot of jump points but you're number of training sessions is dependent on how many training points you have which are very hard to find. You can test your Magikarp's might at local League Battles to see if your training sessions were worth it. These play out in the same format as the training sessions. Each League gets tougher as you progress so you'll have to keep increasing your Magikarp's jump power to keep up with your opponents. The Good You know not to take this game seriously so you can take a laugh at this unique twist to a Pokemon game. The League matches feel just like gyms in classic Pokemon games so you can still feel accomplished from leveling up your Pokemon high enough to beat the toughest trainers in town. The Bad Hardcore Pokemon fans will spit on this release, but then Pokemon fans have always been fickle. They're also used to being disappointed so they'll get get over it when the next release comes out. Conclusion You spend so much time feeding Magikarp that Pokemon: Magikarp Jump feels more like a pet simulator than anything else. It makes up for this by bringing in the classic Pokemon features such as leveling up, League Games and a variety of different Magikarp games but ultimately this game will be forgotten quickly and anyone who mentions it again will be given dirty looks every single time. I hope you enjoyed this guide, please rate and share. If you have problems running Pokemon: Magikarp Jump on your PC or any other issues, leave a comment below.
