Flowseal butterfly valve installation manual

Flowseal range of high performance butterfly valves Further information technical data sheets, operating and maintenance instructions can be found on the Flowseal website or accessed from the following link Flowseal® High Performance Butterfly Valves are a standard in many industries including heating, ventilating and air conditioning, power generation, hydrocarbon processing, water and waste water treatment, and marine and commercial shipbuilding. Our products are also installed in applications as diverse as food and beverage processing, snowmaking and pulp and paper production. Configurations are available for harsh conditions as well as applications requiring nominal pressure and temperature ratings. Flowseal® High Performance Butterfly Valves are a standard in many industries including heating, ventilating and air conditioning, power generation, hydrocarbon processing, water and waste water treatment, and marine and commercial shipbuilding. Should you need more information on the product, kindly write your details to us. Crane's High Performance Butterfly Valve is designed for ANSI Class 150 and features a RTFE soft seat that provides a bi-directional bubble tight shutoff (zero leakage). The unique seat design creates a self-energized seal in vacuum-to-low pressure applications. Under higher pressure conditions, the seat is also designed to permit, confine, and direct movement of the soft seat against the disc edge. This high performance butterfly valve is the standard in many industries including heating, ventilating and air conditioning, power generation, hydrocarbon processing, water and waste water treatment, and marine and commercial shipbuilding. High performance Designed for maximum flow and equal percentage control RTFE soft seat to ensure zero leakage Seat replacement is simple and requires no special tools Size: 3 - 8 in. Type: 150# ANSI Flange Material: Carbon Steel Housing and Stainless Steel Construction Disc Material: Stainless Steel Seal: RTFE Soft Material O-Ring: Silicone Chemical/Petrochemical Processing Hydrocarbon Processing Marine and Commercial Shipbuilding Power and Utilities Pulp and Paper
