exporter - also in the television business. Its TV productions are internationally popular and have earned the country a reputation for quality programming. At the same time, the German television market is one of the most competitive in the world. One special characteristic of the TV landscape is its dual system, which divides the market into public
and private broadcasting. Germany is home to some of the biggest TV stations by international comparison: the two public broadcasting groups ARD and ZDF and the two privately owned TV groups RTL and ProSiebenSat.1. ARD is an alliance of nine regional broadcasting the nationwide service Das Erste as well as their regional
channels. It reaches about 35 million TV households in Germany. Zweites Deutsches Fernsehen (ZDF) is the second nationwide public TV channels offer a full service - from news and current affairs programmes to TV series, television movies, feature films and light entertainment. The range of channels
offered by ARD and ZDF is complemented by speciality offerings such as Phoenix (documentary channel) and KIKA (for children), as well as international stations like Arte (a Franco-German cultural channel) and Sixt (a cultural channel) and Sixt (a cultural channel) and Sixt (a cultural channel) and KIKA (for children), as well as international stations like Arte (a Franco-German cultural channel) and Sixt (a cultural channel) and KIKA (for children), as well as international stations like Arte (a Franco-German cultural channel) and Sixt (a cultural channel) and Sixt (a cultural channel) and KIKA (for children), as well as international stations like Arte (a Franco-German cultural channel) and Sixt (a cultural channel)
European RTL Group and is owned by media giant Bertelsmann. It runs RTL, RTL II and VOX, among other channels. ProSieben and Kabel Eins among others, merged with the European SBS Group in 2007. The main pay-TV provider is Sky Deutschland,
which is controlled by Rupert Murdoch's News Corporation. ARD and ZDF are financed by licence fees, which are payable by every citizen who has a serviceable radio or TV set. They also generate advertising revenues. However, ARD and ZDF are financed by licence fees, which are payable by every citizen who has a serviceable radio or TV set. They also generate advertising revenues.
from licence fees amounted to 5.35 billion euros, which it also used to finance its regional stations. ZDF, which has no radio arm, received 1.73 billion euros per annum before the economic crisis. The commercial free-TV stations earned another 4.9 billion
euros from advertising in 2006. Unlike Britain, there is little controversy in Germany on whether the commercial channels should receive some of their revenue from the licence fee. The private stations in Germany have
an obligation to provide what is termed a basic information service. By contrast, as from 2010 the private channels will be allowed to earn additional revenue from product placement in their series, shows and sports programmes. This is a consequence of the EU's new directive on media services. The ban on product placement will continue to apply to
ARD and ZDF.ARD's joint nationwide service came out top of the latest viewer ratings. In 2008, Das Erste recorded a market share of 13.4%, followed by ZDF with 13.1%, RTL with 11.8% and SAT.1 with 10.3%. RTL generally topped the ratings among 14- to 49-year-olds, an important target group, with a market share of 15.7% in 2008. However, it
will soon be feeling more competition from ZDF. The Mainz-based station launched its new digital channel ZDFneo in November 2009. The aim is to attract more younger viewers with its own comedy formats and successful US series and thus to build on its hitherto low market share of 5% in this target group, which is so important for advertising
revenues. Ambassadors of culture: Four broadcasting companies from three different countries provide 3sat with a program of high-quality films, documentaries and reports. The public broadcasting company and the Swiss broadcasting
company. The ARD, another public broadcasting company in Germany, joined in 1993. www.3sat.de ARD.de With its national communal program "Das Erste" (Channel One) it reaches nearly all 38 million television households in Germany; the Association of Public Broadcasting Stations of the Federal Republic of Germany (Arbeitsgemeinschaft der
offentlich-rechtlichen Rundfunkanstalten der Bundesrepublik Deutschland, ARD). Here you'll find news from all the sections of the ARD. www.ard.de arte This is "television without borders". The culture channel ARTE, originally German-French, is now viewed throughout Europe. On the home page of this joint public television project you can access
the ARTE program, including summaries, and that's not all. www.arte-tv.com Bavarian Radio and Television Network In addition to a colorful mixture of entertainment and science, you'll find current news and police reports from the Free State of Bavaria at the website
of the Bavarian Radio and Television Network (BR). www.br-online.de Channel One - the Programming of the ARD Offering everything from information and culture, entertainment, soaps, crime stories and services, Channel One is the broadcaster operated by the National Radio and Television Network in Germany (ARD - Arbeitsgemeinschaft der
öffentlich-rechtlichen Rundfunkanstalten der Bundesrepublik Deutschland). www.daserste.de Deutsche Welle Media calling card: On May 3, 1953, the "Deutsche Welle Media calling card: On May 3, 1953, the "Deutsche Welle" (DW) went out over the airwaves for the very first time. Today, the international broadcaster provides information all over the world in up to 30 languages - whether Chinese or
Bengali. Via television, radio and Internet, the Deutsche Welle communicates a picture of Germany and promotes exchange between foreign cultures. www.dw.de hr online The Hessian Broadcasting Company (hr - Hessiache Rundfunk) sends its programs out over the airwaves between Kassel and Darmstadt. Classics from the state broadcasting
company located in Frankfurt include "The Hesselbachs" and the "Augsburger Puppenkiste" marionettes. Culture buffs will enjoy the concerts of the hr big band and the company's own symphony orchestra. www.hr-online.de KI.KA This is where children play the leading roles: the KI.KA program - the children's channel operated by the German state-
owned television stations, ARD and ZDF - broadcasts such programs as "Sesame Street" and "Schloss Einstein", kids' shows that are geared to what kids want. On the Internet, KI.KA goes on entertaining the little ones long after the sandman has said goodnight on TV. www.kika.de mdr Central German Radio and Television Network News from

over 30 and places a special focus on entertainment, i.e. "the greatest films of all time". You'll also find show classics and series on this station. www.kabel1.de MTV MTV was the first TV station to bring music videos into German living rooms. And that's not all - the Internet offshoot of the famous TV station has been around for quite some time, too.
www.mtv.de n-tv.de In 1992, n-tv was the first news-only television program to go on the air in Germany. The partners supporting this channel is, since the beginning of 2006, the German RTL Group. www.n-tv.de NICK Colorful and full of fun! The NICK gang, consisting of the most well-known cartoon figures on this station, welcome young visitors to
the website operated by NICK, the private kids' TV station. Since broadcasting began in September 2005, German children have also been able to follow along with the adventures of their small TV heroes on NICK. www.nick.de ProSieben.de "We love to entertain you" - that's the motto of ProSieben, the private German TV station that has been part
of ProSiebenSat.1 Media AG since 2000. The full-time television programming operates around the clock and is known for primarily broadcasting movies and such TV series as talk shows, sitcoms and comedy. www.prosieben.de RTL A "mixture of entertainment and information" - that's RTL's recipe, a broadcasting company that's the German
subsidiary of the Luxembourg-based RTL Group. RTL started up in 1988 as one of the RTL II "RTL II is just plain fun" was the motto of this member of the RTL family when it first went on the air in 1993. The primary target group is children and young people. With shows such as
"Big Brother", the station has received some very impressive ratings in recent times. www.rtl2.de Sat.1 Online Sat.1 started operations in 1984 and was the first privately owned television broadcasting company in Germany. At www.sat1.de, you can find out more about the full range of Sat.1 programming, from serious documentaries to comedy
shows as well as information on other stations that belong to ProSiebenSAT.1 Media AG, including broadcast times and dates, stars and series. www.sat1.de Sky Feature-length films and no commercials: Sky brought "pay TV" to Germany in 1990. If you want to watch the programs that are broadcast in coded form via cable and satellite TV, you need
a digital receiver. Once you have that, nothing stands in the way of watching your favorite films, sports programs, series and interactive shows for kids, along with classic movie hits and comedies for adults are what you'll find on
the schedule. Super RTL is operated in cooperation between the RTL Group and the Walt Disney Company. Since the station went on the air in 1995, it has developed into the leading children's station in Germany. Service providers in
television, radio, telemedia and online services are united in the Association of Private Broadcasting and Telemedia (VPRT). They work together to improve private broadcasting and the electronic communication channels. The VPRT focuses on media law and policies in Germany and Europe in particular. www.vprt.de VOX "VOX turns you on!" is the
motto of this nation-wide, privately-owned TV station located in Cologne. Entertainment and information: VOX offers a variety of magazines, documentaries and reports during its daytime and evening programming; there are also series and feature-length films. The station belongs to the German RTL Group. www.vox.de It was quite a normal Monday
during the first Covid-19 lockdown in the spring of 2020. People in Germany were sitting at home indulging in one of their TV screens on 23 March 2020. According to the AGF television research association, it was an average TV viewing day in
2020. On this typical viewing day in 2020 televisions were tuned in about half an hour longer than on average in 2019. This most likely had something to do with the Covid-19 pandemic as well. According to a survey carried out by the Foundation for Future Studies in 2020, television is one of the most popular leisure activities in Germany. 86 per cent
of the respondents said they watched television at least once a week. This was only exceeded by internet use which 96 per cent of people in Germany use at least once a week. The Germans' favourite television programmes Despite the presence of numerous private broadcasters, the public broadcasters are the most popular television stations. For
December 2020, the AGF figures showed that the third (regional) programmes of the ARD (working group of public broadcasters of the Federal Republic of Germany) came first with a total of 14.7 per cent of viewers, followed by ZDF (Zweites Deutsches Fernsehen) with 13.4 per cent, and the ARD's nationwide programme "Das Erste" with 12.1 per
cent. After this came the private broadcasters RTL with 7.5 and SAT 1 with 5.4 per cent. Daily consumption: 4 hours. Daily listeners: 53 million people. Number of radio stations in Germany: 443. Most popular radio stations: 1. Radio NRW (1.5 million listeners per day), 2. Bayern 1 (1.1 million), 3. SWR 3 (998,000). Newspapers Newspapers in
Germany 2019: 347 daily papers, 27 weekly papers, 7 Sunday papers. Regular newspapers eadership of printed and digital newspapers: 56 per cent of the German-speaking population. Highest circulation of national daily newspapers: 1.
Bild (1.32 million, Q2 2020), 2. Süddeutsche Zeitung (306,553, Q3 2020), 3. Frankfurter Allgemeine Zeitung (199,899, Q3 2020). Mobile phones: 110.7 million. Most used app (2019): 1. Whatsapp Messenger, 2. Facebook, 3. Amazon. Most often downloaded app (2019): 1. Whatsapp
Messenger, 2. Instagram, 3. Ebay classified ads (selling platform). Purchase on Tebex. Price is 30€ + tax Purchase RTX DEVELOPMENT TEAM (Kanikuly) Presents! New system for TVs, TVs in vehicles. Works for all frameworks such as ESX, QBCore, vRP, and also works on other frameworks. Our TV supports rendertarget which means that it's
possible to use even on curved displays. Our televisions support quite a lot of objects. It's possible to add more televisions allow you to install TVs in vehicles as well. It's possible to have them installed right from the get go. You have a
choice to make certain vehicles equiped with a television, or it's possible to add them with an item / event. That means that televisions are completely synchronized. Players only see the TV in the vehicle when they are inside. They support 13 different formats of URL
(YouTube, Twitch, MP3, MP4, Vimeo, Dailymotion, SoundCloud, Facebook, Streamable, Bilibili, Huya, Aparat, Kick) all of these formats are synchronized. They allow you to change the volume. Offsets for vehicles have to be created with our offset creator. Once that's done, you'll have to insert the values into your config of that vehicle. It's simple, and
we have a tutorial to show you if you have any trouble with this exact step. There is an unlimited amount of TVs you can have in your vehicle. Our script is completely standalone, you can use it in whatever framework you would like to use it in. Only exeption is with Vehicle Televison Install, that's for QBCore and ESX only. You can choose interface
color in config as well. It is possible to project an image (png, gif, jpg) on TV (You can activate or deactivate this function in the config). It is possible for specified TVs at given coordinates to be controlled by the player only when he has the given
permission. This script is protected via Escrow System, you can still configure almost everything in config.lua, language.lua, and you can also change it's style in html. > OneSync Infinity Ready > Easy to install > Standalone > ESX/QBCore Special Feature (vehicle television install via item, remote control item) > Configurable > Synchronized
Positionable Hud Carry Christmas GoPostal Mission Row Shops & Apartments Neons Traffic Islands Legion Square Shop Observatory Mosque Skatepark LSC Enhanced Weaponary Bunker Code is accessible No Subscription-based No Lines (approximately) 2500 Requirements N/A Support Yes 10 Likes so u did u take of browsing the web or can u still
browse the web For now you can't browse the web through our TV. Currently we support 9 different formats of URL for play videos/music (YouTube, Twitch, MP3, MP4, Vimeo, Dailymotion, SoundCloud, Facebook, Streamable) all of these formats are synchronized. 1 Like Awsome script for the television. The fact is: the ui is so beautiful in pink + a
clean working code, is awesome 2 Likes Thank you 1 Like I bought the television 10/10. Rtx have best customer support i ever seen. 1 Like Thank you Looks awesome, Great job! 1 Like Thank you Television got a new update! TVs were upgraded with a new function. Spawning TVs through config. You only need to type the model, coordinates, and
rotation, and your TV will spawn at that exact place. It's also now possible to integrate installation of your "other.lua" file for your own needs Television got a new update! It is now possible to set a separate distance for displaying the video on the TV and the distance for controlling
the TV. We have added new links that our TV supports, Bilibili and Huya have been added, now Chinese players can watch videos through these platforms! Now our TV supports 11 different links, Television got a new update! It is now possible to play all youtube videos. It is now possible to project an image (png. gif. jpg) on TV (You can activate or
deactivate this function in config) It is now possible for specified TVs at given coordinates to be controlled by the player only when he has the given permission. Television got a new update! It is now possible to have instanced TVs so that if
you are in a different instance, you will not see a video that plays on the same TV in a different routing bucket, this feature can be turned on or off the playing of given link types on the server, for example if you don't want players to play mp4 videos on the server you can turn them off in config. A new
link type has been added: aparat.com Television got a new update! Everyone, please download the new version of Television. All known bugs have been fixed. It is now possible to turn on streamermode via command, if you turn on streamer mode you will not hear any sounds from the TV. New permission system added, televisions that you specify in
config to be controlled only via permisisons can be opened not only via ace permisisons but now also via defining the player identifier or via job. It is now possible to play videos that you upload directly to your television folder. Television got a new update! Everyone, please download the new version of Television. All known bugs have been fixed. It is
now possible to control the TV via server exports, so it is possible to implement turning on the TV, changing the TV via your other scripts or commands. Exports that have been added: StartTelevision, PlayVideoOnTelevision, StopTelevision, StopTelevision got a new update!
Everyone, please download the new version of Television. All known bugs have been fixed. Added ability to control TV via target (qtarget, qbtarget, oxtarget). Added the ability to have screens
on the server that will have a web page or video running when the script is turned on, without player manipulation. (You can enable this function in Config. Television presets) How to disable ur notify system in config. Television got a new update!
Everyone, please download the new version of Television. All known bugs have been fixed. Added new function in config Config. EnableGetNearbyTvCoords to get
the exact coordinates of the TV, useful for example for the permission system, example: /getnearbytv prop_tv_flat_01 Page 2 Television got a new update! Everyone, please download the new version of Television got a new
update! Everyone, please download the new version of Television. All known bugs have been fixed. Replace all files, also config. Added a new system for rendering videos via render target. (generic texture renderer gfx is no longer needed) 1 Like Television got a new update! Everyone, please download the new version of Television. All known bugs
have been fixed. Replace all files, also config. Added option to enable the feature in config. Enable Control Permissions, you can enable this feature in config. Enable Control Permissions. In addition to a colorful mixture of

i have this error on F8 What websites work for it? More Information & Scripts can be found here! Basically, this serves as a free resource for servers that need a television script. With this resource, you will be able to do the following: Watch Youtube & Twitch Videos / Streams. Broadcast your Youtube / Twitch Stream as a server-wide channel
Display & Browse the Web. Display Images and Videos (via direct link in the browser). Preview What do I need? You will need the following for this script to work. Ox Lib (works with any framework) If you want to make a fork, please obtain permission with a valid reason. Installation Install the release version of
ox lib. Install both ptelevision and generic texture renderer gfx. Start all three resources, with ox lib being ensured first. Done. Contribute to PickleModifications/ptelevision development by creating an account on
GitHub. 75 Likes Great resource! What's the resmon like? 2 Likes The resmon is 0.0! 1 Like I seem to get this error Latest ox lib 3 Likes I must say this is one of the best of releases on the CFX forum I could have seen on this forum this month. Definitely good job man Keep on your good work 5 Likes This guy Has Some of the best scripts all his
scripts is a must have in your server! 2 Likes Fixed just now, download v1.0 in releases! 1 Like It seems not working for QBCore Why aren't my videos working?? Y paste the url and nothing happens. Also updated the script and ox lib and it says ox lib nill thing. How do I get this thing to work? Great! One at the bank seems to be working perfectly
now but others still not playing, Might be cause of this. Seems to be flooding the console with invalid attemtps for net id's 1 Like If you try the one at fleeca bank at legion it'll work but think might still be issue with others. 2 Likes Are those TVs in the configuration? Could you send yours here? 1 Like It's the default config, No changes made to the
script Alright when I'm awake I'll let everyone here know when it's patched. I was working on this script for 12 hours straight so I'll be up in a few hours. 5 Likes great script free for all 1 Like Free TV resource ??ahah
its amazing good work mate !! 2 Likes Christ, this is insane. Do you have paypal or something to tip? Can't get my script to work but it looks so cool on here. 1 Like Page 2 I will make PR later on, however I think what we need from OP is to check nearest TV and adjust it so we don't have to add televisions manually 1 Like Hopefully a bit less buggy
than pmms! Will try this out for sure! 1 Like Amazing resource! And free! King Pickle on the rise! 3 Likes Everything should be fixed! Also added some event handlers for those who want to add job checks or whatever. GitHub Added some event handlers for those who want to add job checks or whatever. GitHub Added some event handlers for those who want to add job checks or whatever.
Event Handling (Broadcast & ScreenInteract). Volume Option added. Fixed non-onesync support. Fixed non-onesync support. Fixed non-onesync support and redownload. Fixed non-onesync support. Fixed non-onesync sup
are you kidding? This script should cost 30 euros not for free!!! 1 Like damn i might get rid of my paid loaf resource for this. 1 Like New Update: GitHub Removed OneSync dependancy for Object Spawn Fixed Video Sync when
loading into server. Fixed offset not working. 1 Like New Update: GitHub Fixed Sync for real this time. Fixed Sync for real this time. 1 Like Nice work! Time to replace my old tv script with this! 3 Likes @PickleMods sometimes it's
giving this error on playing the Twitch video. very cool! i'm very impressed if you add a remote item for /tv too 1 Like Any tips on getting the web browser to properly sync? 1 Like Cant really do it without causing massive event spam What game build are you running on? How do I find the offset and scale of other TVs like the smaller ones? Page 3 me
pasa exactamente igual sale la tele pero no arranca You'd need to experiment with that, but it's simple to do. Perhaps you can get some inspiration from the script PMMS, such as disabling static emitters playing when content is rendered to props, adding vehicle and radio, speakers and phone props, etc etc. The script belongs to a friend of mine and
is open source so they have no problem with me recommending it. Hopefully it gives you some ideas. Also permissions could be neat too Edit: I have removed the link as to not advertise Permissions are already included, refer to Config. Events. As for disabling static emitters, sounds like a good idea! 1 Like Yeah, that way you're more immersed in
what's being streamed on the screen rather than the annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds of hip hop ambient sounds or those annoying sounds or the sound 
input either video or the browser option. Could I get some help on this? Pickle TV Version: 1.1.1 Ox Lib Version: 2.15.0 Download 1.1.2+ from the releases page. Should fix that particular issue. New update coming soon to support render-target & rotation 4 Likes Thanks for the help, here's one thing I noticed while using your script. When displaying
with other people it does not sync when you use the "interact with screen" button, for it does not update the screen on the other users end. Basically, they only see what you initially put in via website, while only you can see what you are interacting with. This is intentional, syncing scroll & clicks on browser windows would rely on too many event
ticks. 1 Like This error It should be two resources, you're probably running the extracted bundle folder and not the two resources seperately. Hi a have this error @ptelevision/client/tv.lua:87 attempt to index nil value (global lib) same 1 Like [ c-scripting-core] Failed to load script @ox lib/init.lua. 1 Like It requires ox lib. Install it to your servers
@thomp5on @Frequency Studios 1 Like for some reason my bring didnt realize oxlib different from oxmysgl lol im slow sometimes, guestion? do i have to place each Tv or will just automactally work on most? DOPE free release! Thank you! Can this play stuff from a browser? How easy is it to set up TVs? Would this work for something like this?
[MLO] [RELEASE] Cinema Doppler - FiveM Resource Development & Modding / Releases - Cfx.re Community 1 Like Flis a need tutorial for installation, i am brazilian my framwork is creative. 2 Likes Fage 4 Hey! Did you get any
fix on this? We downloaded latest version and still getting the same error. I had to reconnect and it works. Sorry to bother you and thank you for the amazing script/client/main.lua^7:42) ^3> fn^7 (^5@TV-Script/client/main.lua^7:144) ^1SCRIPT
