Â «Former Librisâ» is a leaf that sticks (and sometimes still sticks) inside the cover of a book to indicate, with a heraldic shield or a symbolic image, to its owner. In modern times, the illustrations and part of the information have been transferred to the cover or to the superad and other information in the verse of the cover. They have a numeraction of a different number of the text; They are printed on a special role, almost always a coated role. [42] Value of the book The value of a book is not given only by the cost of production, but should be considered first of all that the book is a work of ingenuity, Colin H. Scripture, a Signs System that allows transmitting and conserving the information, began to develop between VII and IV Millennium A.C. In the form of mnemothetical symbols that were then converted into a system of ideograms or pictograms through simplification. The pergamino used certainly should be of low quality, with such thick skins that the students who had them bend their knees. Therefore, the most popular forms of writing known were mainly loggraphic. They had the advantage of being reusable: the wax could merge and reform a «blank page.» In the third century, the percentage increased from 1.5% to around 17%; Clearly, the coder was having successful. 70Å refer to school textbooks that help primary students learn reading and writing techniques . . The study of these inscriptions is known as epigraphy. Since the invention in 1455 of Gutenberg's mobile printing, for more than four centuries the real mass of real masses has been «printed word» [7] [8] Scripture is the condition for the existence of the text and the book. Google estimated that in 2010 approximately 130 million different titles were printed. [3] With the diffusion of digital and Internet technologies, the printed books have joined the use of electronic books, or electronic books, or electronic books, or electronic books. [4] Etymology of the Témino The Italian word book derives from the Latin Liber. In this hour, different types of ink were used, generally prepared with hollin and rubber, and later also with rooster walnut and ferrous sulfate. However the It never gained much popularity in the pagan Hellenistic world, and only within the Christian community did it achieve great diffusion.[15] This change took place anyway very gradually over the course of the 3rd and 4th centuries, and the reasons for the adoption of the code model are manifold: the size is cheaper, since both sides of the writing material can be used, and it is portable, easy to search, and easy to hide. Roberts and T.C. Skeat, The Birth of the Codex, OUP Oxford (1983), pp. Around 1450, in what is commonly regarded as an independent invention, the German Johannes Gutenberg invented the movable characters in Europe, along with the mold for the metal casting of the characters for each of the letters of the Latin alphabet. See also Annex IV. The word membranae, literally "skins", is the name that the Romans gave to the codex of the parchment; the gift that the aforementioned historians should have accompanied was almost certainly a copy of Marcial's complete work, fifteen books in the form of a codex and not a scroll, more common at that time. Substantially, for both format and econicity, it finds precedents in the history of the front book of the printer, as it starts from the Antichody (the "Book that is found in a hand": in the encheiridiA3n of the Greek world, in Latin I Pugillares, in the middle age of the book of the Bisaccia). Modernly, the pocket book is a bonding system in which the files or signatures are grinded on the back of the back and the loose leaves are stuck to a strip of canvas or plastic always to the later (called "Ground Brokeura"). The typefaces of monotypes and linotypes were introduced in the late nineteenth century. XIX. Theoretically, in Egypt, a land rich in papyrus plant, the papyrus code should have reigned supreme, but this was not the case: the parchment code appears in the area at the same time as the papyrus code, in the second century A.D. Although the eleven codices of the Bible dated there, There are about 18 codices of the same century with pagan writings and four of them are on parchment. [19] In addition, some interesting information comes from a letter of the time, found in an Egyptian village - a son writes to his father that "God came to us and will show us the six scroll codes." The history of the book continues to develop with the gradual transition from the scroll to the codex, moving from the Middle East of the II-II millennium B.C. to the first Byzantine period, during the 4th and 5th centuries A.D., when the spread of Christianity and monasticism fundamentally changed the course of history.
